The Masks Of Lucifer Technology And The Occult In Twentiethcentury Popular:

The Masks of Lucifer David Morris,1992 This book examines ufology and belief in extra terrestrials as a cultural phenomenon The author examines how 19th century occultism particularly theosophy has been revitalized under the guise of scientific speculation and captured the popular imagination Unexplained or mysterious phenomenon such as UFOs alien visitors crop circles and the evidence for the astronaut gods theory are habitually interpreted by those who claim to have witnessed them in scientific terms a fact that the author believes can be explained partly by tensions and anxieties within society caused by political social and technological change

Spiritualism and British Society Between the Wars Jenny Hazelgrove,2000-09-02 Historians of modern British culture have long assumed that under pressure from secular forces interest in spiritualism had faded by the end of the Great War Jenny Hazelgrove challenges this assumption and shows how spiritualism grew between the wars and became part of the fabric of popular culture This book provides a fascinating and lively insight into an alternative culture that flourished and continues to flourish alongside more conventional outlets for spiritual beliefs and needs

Contesting Earth's History in Transatlantic Literary Culture, 1860-1935 Richard Fallon,2025-02-14 By the mid nineteenth century geologists and palaeontologists had reconstructed an authoritative narrative of Earth s deep history from the planet s molten origins to the rise of humanity Many figures in transatlantic science across subsequent decades however had problems with this narrative it was too secular inhuman and evolutionary or controlled too exclusively by elite scientists Speaking from palaeoscience s unevenly professionalized and controversy racked borders Christian fundamentalists charismatic psychics and respected scholars alike voiced their objections Until now no study has brought their work together for detailed comparative analysis Spanning from the 1860s to the interwar decades *Contesting Earth's History* examines the fascinating stories of five significant examples of fringe or borderline palaeoscience old and young earth creationism hollow earth theory clairvoyant time travel and sunken continent catastrophism Innovatively combining methods from literary studies with the history of science this book attends not just to the conceptual content of these strange sciences but also to their proponents communication of truth claims through diverse genres ranging from the scientific textbook and the technical monograph to the lost world romance and the epic poem By paying close attention to the hitherto overlooked textual forms and literary strategies of these works of pseudoscience this volume throws into relief the variant conceptions of audience evidence and method that jostled and competed in wider scientific culture during this period It also demonstrates that for all their diversity authors of borderline palaeoscience shared the desire to shift the balance of power creating textual spaces where exclusive hierarchies of scientific expertise could be levelled away These conjurers of lost worlds often captivated wide audiences and many of their bizarre astonishing and iconoclastic ideas remain with us to this day Some even inspired early science fiction by the likes of H P Lovecraft and Edgar Rice Burroughs Hijacking geologists and palaeontologists longstanding effort at making the prehistoric past visible authors on the borderlines of palaeoscience

asserted their right to scientific authority and encouraged readers to gaze into time's abyss with bold new eyes **Fred Hoyle's Universe** Jane Gregory, 2005-05-26 Fred Hoyle was one of the most widely acclaimed and colourful scientists of the twentieth century a down to earth Yorkshireman who combined a brilliant scientific mind with a relish for communication and controversy Best known for his steady state theory of cosmology he described a universe with both an infinite past and an infinite future He coined the phrase big bang to describe the main competing theory and sustained a long running sometimes ill tempered and typically public debate with his scientific rivals He showed how the elements are formed by nuclear reactions inside stars and explained how we are therefore all formed from stardust He also claimed that diseases fall from the sky attacked Darwinism and branded the famous fossil of the feathered Archaeopteryx a fake Throughout his career Hoyle played a major role in the popularization of science Through his radio broadcasts and his highly successful science fiction novels he became a household name though his outspokenness and support for increasingly outlandish causes later in life at times antagonized the scientific community Jane Gregory builds up a vivid picture of Hoyle's role in the ideas the organization and the popularization of astronomy in post war Britain and provides a fascinating examination of the relationship between a maverick scientist the scientific establishment and the public Through the life of Hoyle this book chronicles the triumphs jealousies rewards and feuds of a rapidly developing scientific field in a narrative animated by a cast of colourful astronomers keeping secrets losing their tempers and building their careers here on Earth while contemplating the nature of the stars **Look at the Evidence** John Clute, 2016-11-24 For more than 50 years John Clute has been reviewing science fiction and fantasy Look at the Evidence is a collection of reviews from a wide variety of sources including Interzone the New York Review of Science Fiction and Science Fiction Weekly about the most significant literatures of the twenty first century science fiction fantasy and horror the literatures Clute argues should be recognized as the central modes of fantastika in our times It covers the period between 1987 and 1992 **Ghosts** P. Buse, A. Stott, 1999-01-28 Did you know that the father of psychoanalysis believed in ghosts or that Frederick Engels attended seances Ghosts Deconstruction Psychoanalysis History is the first collection of theoretical essays to evaluate these facts and consider the importance of the metaphor of haunting as it has appeared in literature culture and philosophy Haunting is considered as both a literal and figurative term that encapsulates social anxieties and concerns The collection includes discussions of nineteenth century spiritualism gothic and postcolonial ghost stories and popular film with essays on important theoretical writers including Freud Derrida Adorno and Walter Benjamin **The New Monuments and the End of Man** Robert Slifkin, 2019-11-05 How leading American artists reflected on the fate of humanity in the nuclear era through monumental sculpture In the wake of the atomic bombings of Japan in 1945 artists in the United States began to question what it meant to create a work of art in a world where humanity could be rendered extinct by its own hand The New Monuments and the End of Man examines how some of the most important artists of postwar America revived the neglected tradition of the sculptural monument as a way

to grapple with the cultural and existential anxieties surrounding the threat of nuclear annihilation Robert Slifkin looks at such iconic works as the industrially evocative welded steel sculptures of David Smith the austere structures of Donald Judd and the desolate yet picturesque earthworks of Robert Smithson Transforming how we understand this crucial moment in American art he traces the intersections of postwar sculptural practice with cybernetic theory science fiction cinema and literature and the political debates surrounding nuclear warfare Slifkin identifies previously unrecognized affinities of the sculpture of the 1940s and 1950s with the minimalism and land art of the 1960s and 1970s and acknowledges the important contributions of postwar artists who have been marginalized until now such as Raoul Hague Peter Grippe and Robert Mallary Strikingly illustrated throughout *The New Monuments and the End of Man* spans the decades from Hiroshima to the Fall of Saigon when the atomic bomb cast its shadow over American art *Notes and Queries*, 1992 **Forthcoming Books** Rose Arny, 1993 **British Book News** British Council, 1992 Includes no 53a British wartime books for young people
