Annals of the Kingdom of Ireland, by the Four Masters, from the Earliest Period to the Year 1616 John O'Donovan,1848 *The Hidden Ground of Love* Thomas Merton,1985 Evelyn Waugh at the start of Thomas Merton s monastic career advised him to write serious letters and also urged him to make an art of it This advice flowered in the

sixties especially after his monastic superiors ordered him to cease publishing anything on war and peace Monk concerned with peace Bad image Merton seethed in a letter and launched his series of privately circulated mimeographed Cold War Letters one third of which are published for the first time in this book The Hidden Ground of Love is a rich collection of Merton's letters in a period of his greatest concern about religion's seeming powerlessness against global violence and nuclear war Though the book concentrates primarily on the last decade of his 27 years as a Trappist it opens with a few early letters to Catherine Doherty before he became a monk His extraordinary growth as a mystic and religious thinker deeply concerned about the materialistic world's drift toward the abyss is revealed in these pages

Sea Monsters Joseph Nigg, 2020-03-04 The mythic creature expert and author of Phoenix takes readers through a bestiary of sea monsters featured on the famous 16th century map Carta Marina In the sixteenth century sea serpents giant man eating lobsters and other monsters were thought to swim the waters of Northern Europe threatening seafarers who ventured too far from shore Thankfully Scandinavian mariners had Olaus Magnus who in 1539 charted these fantastic marine animals in his influential map of the Nordic countries the Carta Marina In Sea Monsters mythologist Joseph Nigg brings readers face to face with these creatures and other magnificent components of Magnus's map Nearly two meters wide in total the map's nine wood block panels comprise the largest and first realistic portrayal of the region But in addition to its important geographic significance Magnus's map goes beyond cartography to scenes both domestic and mystic Close to shore Magnus shows humans interacting with common sea life boats struggling to stay afloat merchants trading children swimming and fisherman pulling lines But from the offshore deeps rise some of the most terrifying sea creatures imaginable like sea swine whales as large as islands and the Kraken In this book Nigg draws on Magnus's own text to further describe and illuminate these inventive scenes and to flesh out the stories of the monsters Sea Monsters is a stunning tour of a world that still holds many secrets for us land dwellers who will forever be fascinated by reports of giant squid and the real life creatures of the deep that have proven to be as bizarre and otherworldly as we have imagined for centuries It is a gorgeous guide for enthusiasts of maps monsters and the mythic A beautiful new exploration of the Carta Marina Wired
