The Meaning Of The Built Environment A Nonverbal Communication Approach:

The Meaning of the Built Environment Amos Rapoport,1990 The Meaning of the Built Environment is a lively illustrated study of the meanings of everyday buildings for their users Professor Rapoport uses examples and vignettes drawn from many cultures and historical eras as well as contemporary America to explicate a new framework for understanding how the built environment comes to have meaning both for individual people and whole societies   The Meaning of the Built Environment Amos Rapoport,1982-11-01 The Meaning of the Built Environment is a lively illustrated study of the meanings of everyday buildings for their users Professor Rapoport uses examples and vignettes drawn from many cultures and historical eras as well as contemporary America to explicate a new framework for understanding how the built environment comes to have meaning both for individual people and whole societies this book fills a significant gap it introduces the notion of environmental meaning so clearly that no reader will doubt the basic premise that the environmment holds meaning as part of a cultural system of symbols and influences our actions and our determinations of social order Design Book Review Fall 1984   **Meaning of the built environment; a nonverbal communication approach** A. Rapoport,1982   The Built Environment Wendy R. McClure,Tom J. Bartuska,2011-09-09 This book takes a sweeping view of the ways we build things beginning at the scale of products and interiors to that of regions and global systems In doing so it answers questions on how we effect and are affected by our environment and explores how components of what we make from products buildings and cities are interrelated and why designers and planners must consider these connections   **Cognitive Approaches to Ancient Religious Experience** Esther Eidinow,Armin W. Geertz,John North,2022-08-11 Explores the religious rituals and beliefs of ancient Greece and Rome using modern research into human cognition to better understand the experiences of men and women Integrates literary epigraphic visual and archaeological evidence Accessible to those without prior knowledge either of cognitive theory or of the ancient world   Cityscapes and Monuments of Western Asia Minor Eva Mortensen,Birte Poulsen,2017-12-21 Cityscapes consist of houses streets civic buildings sanctuaries tombs monuments and inscriptions created by multiple generations of citizens and foreigners with an interest in the city they are interpreted and reinterpreted as expressions of past lives changing relations of power memories and various identities The present volume publishes 25 contributions written by scholars specializing in the history and archaeology of western Asia Minor New and well known material literary epigraphical numismatic and archaeological is presented and analyzed through the twin lenses of memory and identity The contributions cover more than 1000 years of cultural diversity during changing political systems from the Lydian and Persian hegemony in the Archaic period through Athenian supremacy and Persian satrapal rule in the Classical period then autocratic kingship in Hellenistic times until finally more than half a millennium of Roman rule Identities are voiced through several media and visible at many levels of the ancient societies So are the places of memory the Lieux de M moire and the studies presented here provide new insights into how human beings chose deliberately or

subconsciously to commemorate their past and their ancestors and how identity was displayed and expressed under shifting political rule **Coming Together** Attila Gyucha,2019-02-28 The pursuit for universally applicable definitions of the terms urban and city has frequently distracted scholars from scrutinizing processes of how ancient nucleated settlements evolved and developed Based on the premise that similar social dynamics to a great extent governed nucleation trajectories throughout human history Coming Together focuses on both prehistoric aggregated and early urban settlements Drawing from a variety of theoretical and methodological approaches archaeologists anthropologists and classicists discuss how nucleation unfolded in strikingly different sociopolitical contexts in North America Europe and the Near East The major themes of the volume are nucleation s origins pathways to sustainability and the transformative role of these sites in sociopolitical and cultural change *Social Complexity and Complex Systems in Archaeology* Dries Daems,2021-02-22 Social Complexity and Complex Systems in Archaeology turns to complex systems thinking in search of a suitable framework to explore social complexity in Archaeology Social complexity in archaeology is commonly related to properties of complex societies such as states as opposed to so called simple societies such as tribes or chiefdoms These conceptualisations of complexity are ultimately rooted in Eurocentric perspectives with problematic implications for the field of archaeology This book provides an in depth conceptualisation of social complexity as the core concept in archaeological and interdisciplinary studies of the past integrating approaches from complex systems thinking archaeological theory social practice theory and sustainability and resilience science The book covers a long term perspective of social change and stability tracing the full cycle of complexity trajectories from emergence and development to collapse regeneration and transformation of communities and societies It offers a broad vision on social complexity as a core concept for the present and future development of archaeology This book is intended to be a valuable resource for students and scholars in the field of archaeology and related disciplines such as history anthropology sociology as well as the natural sciences studying human environment interactions in the past **Vernacular Architecture in the Pre-Columbian Americas** Christina Halperin,Lauren Schwartz,2016-09-13 Vernacular Architecture in the Pre Columbian Americas reveals the dynamism of the ancient past where social relations and long term history were created posthole by posthole brick by brick This collection shifts attention away from the elite and monumental architectural traditions of the region to instead investigate the creativity subtlety and variability of common architecture and the people who built and dwelled in them At the heart of this study of vernacular architecture is an emphasis on ordinary people and their built environments and how these everyday spaces were pivotal in the making and meaning of social and cultural dynamics Providing a deeper and more nuanced temporal perspective of common buildings in the Americas the editors have deftly framed a study that highlights sociocultural diversity while at the same time facilitating broader comparative conversations around the theme of vernacular architecture With diverse case studies covering a broad range of periods and regions Vernacular Architecture in the Pre Columbian Americas is

an important addition to the growing body of scholarship on the indigenous architecture of the Americas and is a key contribution to our archaeological understandings of past built environments   Vernacular Buildings and Urban Social Practice: Wood and People in Early Modern Swedish Society Andrine Nilsen,2021-01-14 Wooden buildings housed the majority of Swedish urban populations during the early modern era but many of these buildings have disappeared as the result of fire demolition and modernisation This book reveals the fundamental role played by the wooden house in the formation of urban Sweden and Swedish history   At Home with Density Nuala Rooney,2003-05-01 Hong Kong has one of the lowest crime rates in the world and is one of the most prosperous societies but much of the population lives in low quality high density housing Through qualitative interviews with long term residents of public housing this book explores residents experience of high density space It traces the development of Hong Kong housing forms and analyses how people s expectations of domestic space have been affected by social mobility and shifting cultural values of space lifestyle and design The accompanying award winning documentary film A Thousand Pieces of Gold will enable readers to experience these spaces and listen to revealing interviews with the tenants   Theorizing Built Form and Culture Kapila D. Silva,Nisha A. Fernando,2024-03-08 In this collection of essays Theorizing Built Form and Culture The Legacy of Amos Rapoport a felicitation volume to celebrate the significance of Professor Amos Rapoport s lifelong scholarship scholars from around the world discuss the analytical relevance expansion and continuing application of these contributions in developing an advanced understanding of mutual relationships between people and built environments across cultures Professor Amos Rapoport has espoused an intellectual and theoretical legacy on environmental design scholarship that explains how cultural factors play a significant role in the ways people create and use environments as well as the way environments in turn influence people s behavior This volume presents a hitherto not seen unique and singular work that simultaneously articulates a cohesive framework of Rapoport s architectural theories and demonstrates how that theoretical approach be used in architectural inquiry education and practice across environmental scales types and cultural contexts It also acknowledges for the very first time how this theoretical legacy has pioneered the decolonizing of the Eurocentric approaches to architectural inquiry and has thus privileged an inclusive cross cultural perspective that laid the groundwork to understand and analyze non Western design traditions The book thus reflects a wide range of cross cultural and cross contextual range to which Professor Rapoport s theories apply a general notion of theoretical validity he always advocated for in his own writings The volume is a paramount source for scholars and students of architecture who are interested in understanding how culture mediates the creation use and preservation of the built environment   Architecture's New Media Yehuda E. Kalay,2004 A comprehensive examination of computer aided architectural design and its potential effect on architectural design practice for practitioners educators students and researchers Computer aided design CAD technology has already changed the practice of architecture and it has the potential to change it even more radically With Architecture s New Media Yehuda

Kalay offers a comprehensive exposition of the principles methods and practices that underlie architectural computing He discusses the aspects of information technology that are pertinent to architectural design analyzes the benefits and drawbacks of particular computational methods and looks at the potential of emerging computational techniques to affect the future of architectural design CAD technology introduced in the postwar era and adopted in everyday architectural practice beginning in the 1970s is now so indispensable that as William Mitchell observes in his foreword architectural practice without it is as unimaginable as writing without a word processor Yet Kalay argues it has had little qualitative effect This book provides a detailed introduction for practitioners educators students and researchers to aspects of CAD that go beyond the improvements in drafting modeling and rendering for which it is commonly used Computer aided architectural design CAAD is capable of modeling and manipulating objects not merely their graphical representations reasoning about and predicting performance of design solutions generating new design solutions through algorithmic and other methods managing vast amounts of information and taking advantage of opportunities offered by the Internet for collaboration across time and space and for design of the virtual space of the Internet itself Architecture s New Media covers five main topics design methods and computer technology and the relationship between computers and design the principles of communication and representation generative design methods the advantages of computational methods for predicting and evaluating the performance of design solutions and current and future developments in technology including collaborative design intelligent design assistants construction automation and virtual design environments **Urban Architecture and Local Spaces in Pakistan** Suneela Ahmed,2022-10-27 This book is set in Karachi Pakistan and investigates the possibility of achieving localness through identifying urban process and their impact on built form addressing how locals associate with the urban spaces and how they value it Thus the investigation using the local terminology maqamiat goes beyond the physicality of space and develops a framework that helps to understand the social ethnic economic ecological and other the non physical aspects of space which are of value to the locals The aim is to investigate the possibility of achieving localness through identifying urban design elements that can be incorporated into the process of designing new built forms that acknowledges what is valued by the locals instead of superimposing imported designs negating the contextual realties both physical and social For this purpose the book includes three case studies from Karachi The book questions the aspiration of many cities in the South Asian context to imitate the built forms of Western cities increasingly Singapore and Shanghai which are viewed as modern and represents future The book will make a theoretical contribution to the existing literature on postcolonial urbanism and explore space from a local vantage point for understanding how to look inwards for aspiration **The American Statehouse** Charles T. Goodsell,2001 The American statehouse then is not just a temple of the state but a temple of democracy of the people BOOK JACKET **Language of Space** Bryan Lawson,2007-08-15 Helps to reconnect your everyday implicit knowledge with your professional conceptual knowledge Gain a greater understanding of clients by

questioning the values you commonly hold Promotes easier communication by taking the abstract idea of space and placing it in real terms **Impact of Artificial Intelligence, and the Fourth Industrial Revolution on Business Success** Bahaaeddin Alareeni,Allam Hamdan,2022-07-29 This book constitutes the refereed proceedings of the International Conference on Business and Technology ICBT2021 organized by EuroMid Academy of Business Technology EMABT held in Istanbul between 06 07 November 2021 In response to the call for papers for ICBT2021 485 papers were submitted for presentation and inclusion in the proceedings of the conference After a careful blind refereeing process 292 papers were selected for inclusion in the conference proceedings from forty countries Each of these chapters was evaluated through an editorial board and each chapter was passed through a double blind peer review process The book highlights a range of topics in the fields of technology entrepreneurship business administration accounting and economics that can contribute to business development in countries such as learning machines artificial intelligence big data deep learning game based learning management information system accounting information system knowledge management entrepreneurship and social enterprise corporate social responsibility and sustainability business policy and strategic management international management and organizations organizational behavior and HRM operations management and logistics research controversial issues in management and organizations turnaround corporate entrepreneurship innovation legal issues business ethics and firm gerial accounting and firm financial affairs non traditional research and creative methodologies These proceedings are reflecting quality research contributing theoretical and practical implications for those who are wise to apply the technology within any business sector It is our hope that the contribution of this book proceedings will be of the academic level which even decision makers in the various economic and executive level will get to appreciate **The Theory of Architecture** Paul-Alan Johnson,1994-04-18 The Theory of Architecture Concepts Themes Practices Paul Alan Johnson Although it has long been thought that theory directs architectural practice no one has explained precisely how the connection between theory and practice is supposed to work This guide asserts that architectural theory does not direct practice but is itself a form of reflective practice Paul Alan Johnson cuts through the jargon and mystery of architectural theory to clarify how it relates to actual applications in the field He also reveals the connections between new and old ideas to enhance the reader s powers of critical evaluation Nearly 100 major concepts themes and practices of architecture as well as the rhetoric of architects and designers are presented in an easily accessible format Throughout Johnson attempts to reduce each architectural notion into its essential concept By doing so he makes theory accessible for everyday professional discussion Topics are arranged under ten headings identification definition power attitudes ethics order authority governance relationship and expression Areas covered under these headings include Utopic thought in theories of architecture Advocacy and citizen participation in architecture The basis of architectural quality and excellence The roles of the architect as artist poet scientist and technologist Ethical obligations of architecture Rationales for models and methods of

design How authority is determined in architecture How architects structure their concepts Conventions of communication within the architectural profession Each section begins by showing the etymology of key terms of the topic discussed along with a summary history of the topic s use in architecture Discussions probe the conceptual and philosophical difficulties of different theories as well as their potential and limitations in past and present usage Among the provocative issues discussed in terms of their relationship to architecture are chaos theory feminism service to the community and the use of metaphor Johnson points out with stunning clarity the intentions as well as the contradictions and inconsistencies of all notions and concepts All architects and designers as well as students and teachers in these disciplines will gain many insights about architectural thought in this groundbreaking text   **The Routledge Handbook on Historic Urban Landscapes in the Asia-Pacific** Kapila Silva,2019-12-23 The Routledge Handbook on Historic Urban Landscapes in the Asia Pacific sheds light onto the balancing act of urban heritage management focusing specifically on the Asia Pacific regions in which this challenge is imminent and in need of effective solutions Urban heritage while being threatened amid myriad forces of global and ecological change provides a vital social cultural and economic asset for regeneration and sustenance of liveability of inhabited urban areas worldwide This six part volume takes a critical look at the concept of Historic Urban Landscapes the approach that UNESCO promotes to achieve holistic management of urban heritage through the lens of issues prospects and experiences of urban regeneration of the selected geo cultural context It further discusses the difficult task that heritage managers encounter in conceptualizing mapping curating and sustaining the plurality poetics and politics of urban heritage of the regions in question The connective thesis that weaves the chapters in this volume together reinforces for readers that the management of urban heritage considers cities as dynamic entities palimpsests of historical memories collages of social diversity territories of contested identities and sites for sustainable liveability Throughout this edited collection chapters argue for recognizing the totality of the eco cultural urban fabric embracing change building social cohesion and initiating strategic socio economic progress in the conservation of Historic Urban Landscapes Containing thirty seven contributions written by leading regional experts and illustrated with over 200 black and white images and tables this volume provides a much needed resource on Historic Urban Landscapes for students scholars and researchers   *Political Theory and Architecture* Duncan Bell,Bernardo Zacka,2020-02-20 What can political theory teach us about architecture and what can it learn from paying closer attention to architecture The essays assembled in this volume begin from a common postulate that architecture is not merely a backdrop to political life but a political force in its own right Each in their own way they aim to give countenance to that claim and to show how our thinking about politics can be enriched by reflecting on the built environment The collection advances four lines of inquiry probing the connection between architecture and political regimes examining how architecture can be constitutive of the ethical and political realm uncovering how architecture is enmeshed in logics of governmentality and in the political economy of the city and asking to what extent we can think of architecture

tributary as it is to the flows of capital as a partially autonomous social force Taken together the essays demonstrate the salience of a range of political theoretical approaches for the analysis of architecture and show that architecture deserves a place as an object of study in political theory alongside institutions laws norms practices imaginaries and discourses
