The Watcher, the Mechanic and the Doctor's Wife Michael Taylor, 2024-02-02 In a perilous era only the most skilled are summoned to safeguard our way of life Amidst the allure of sex and drugs the deceit of crooks and the intricate dance between the police and doctors this tale offers a deep dive into the world of clinical medicine It spotlights a unique cadre of practitioners determined to make a difference even as they navigate the challenges of an underfunded NHS a government stretched thin and a public often left in the dark Medicine is not just a profession it's a calling It demands relentless dedication continuous learning and the rare euphoria that comes from saving a life This story captures the essence of this dedication juxtaposing the highs of medical triumphs against the relentless onslaught of disease **Where the Wild**

Things Were Henry Jenkins, 2025-02-25 Explores iconic works from *The Cat in the Hat* to *The Twilight Zone* to explain cultural trends in parenting and how we conceptualize childhood The 60s produced a Baby Boom generation that catalyzed the dawn of a new era the space age the age of television the global age and the beginnings of civil rights At the same time a new paradigm for parenting was unfolding that put emphasis on permissiveness defined by what it permitted the free and unfettered impulses of children Others worried that the wildness of children personified by the characters in Maurice Sendak's 1963 classic children's book *Where the Wild Things Are* was destructive disruptive and disrespectful *Where the Wild Things Were* centers on the exploding contentious national conversation about the nature of childhood and parenting in the postwar US emblemized by Dr Spock's *Baby and Child Care* Renowned scholar Henry Jenkins demonstrates that the language that shaped a growing field of advice literature for parents also informed the period's fictions in film television comics children's books and elsewhere produced for and consumed by children In particular Jenkins demonstrates the era's emblematic child was the boy in the striped shirt white male suburban middle class Christian and above all American Weaving together intellectual histories and popular texts Jenkins shows how boy protagonists became embodiments of permissive child rearing as well as the social ideals and contradictions that permissiveness entailed From *Peanuts* comic strips and TV specials to *The Cat in the Hat* *Dennis the Menace* and *Jonny Quest* the book reveals how childhood and the stories about it became central to Cold War concerns with democracy citizenship globalization the space race science race relations gender and sexuality Written by a former boy in a striped shirt *Where the Wild Things Were* explores iconic works from *Mary Poppins* to *Lost in Space* contextualizing them through a critical but respectful engagement with the core animating ideas of the permissive imagination

The Machine Anxieties of Steampunk Kathe Hicks Albrecht, 2021-11-04 What is steampunk and why are people across the globe eagerly embracing its neo Victorian aesthetic Old fashioned eye goggles lace corsets leather vests brass gears and gadgets mechanical clocks the look appears across popular culture in movies art fashion and literature But steampunk is both an aesthetic program and a way of life and its underlying philosophy is the key to its broad appeal Steampunk champions a new autonomy for the individual caught up in today's technology driven society It expresses optimism for the future but it also delivers a note of caution about our human role in a world of ever more ubiquitous and powerful machines Thus despite adopting an aesthetic and lifestyle straight out of the Victorian scientific romance steampunk addresses significant 21st century concerns about what lies ahead for humankind The movement recovers autonomy from prevailing trends even as it challenges us to ask what it is to be human today

An Inner Approach to Cranial Osteopathy Timothy Marris, 2023-08-21 This book is for the current Cranial Osteopathic practitioner It looks into Cranial Osteopathy from a more profound inner approach to help the practitioner to understand Cranial Osteopathy from a deeper and broader perspective The book starts by taking the reader on an inner journey of understanding more about themselves as the practitioner discussing the osteopathic toolbox and the need to be inner centred when diagnosing and

treating It then looks at aspects of diagnosis of tissue and fluid states giving the reader several inner considerations which they should apply when assessing a patient The book then looks at the whole body and using an inner approach to assess and treat each area Each chapter gives an overview of the relevant anatomy and discusses the osteopathic relevance and new ways of working Case studies clinical experiences are described and hands on exercises which can be accessed via audio files are given for the reader to practise These exercises should be done at the treatment table and will prepare the reader to use the approaches described with their patients The audio leads the listener through a guided tour of the anatomy and explains the exercise while they use their hands to feel what the author is describing This guide will help Cranial Osteopathic practitioners enhance their skills knowledge and understanding to a much advanced level *The Nineteenth-century Visual Culture Reader* Vanessa R. Schwartz, Jeannene M. Przyblyski, 2004 The nineteenth century is central to contemporary discussions of visual culture This reader brings together key writings on the period exploring such topics as photographs exhibitions and advertising Two Bells, 1928 **Alone Together** Sherry Turkle, 2011-01-11 A groundbreaking book by one of the most important thinkers of our time shows how technology is warping our social lives and our inner ones Technology has become the architect of our intimacies Online we fall prey to the illusion of companionship gathering thousands of Twitter and Facebook friends and confusing tweets and wall posts with authentic communication But this relentless connection leads to a deep solitude MIT professor Sherry Turkle argues that as technology ramps up our emotional lives ramp down Based on hundreds of interviews and with a new introduction taking us to the present day **Alone Together** describes changing unsettling relationships between friends lovers and families **Experimentation with Human Beings** Jay Katz, Alexander Morgan Capron, Eleanor Swift Glass, 1972-07-24 In recent years increasing concern has been voiced about the nature and extent of human experimentation and its impact on the investigator subject science and society This casebook represents the first attempt to provide comprehensive materials for studying the human experimentation process Through case studies from medicine biology psychology sociology and law as well as evaluative materials from many other disciplines Dr Katz examines the problems raised by human experimentation from the vantage points of each of its major participants investigator subject professions and state He analyzes what kinds of authority should be delegated to these participants in the formulation administration and review of the human experimentation process Alternative proposals from allowing investigators a completely free hand to imposing centralized governmental control are examined from both theoretical and practical perspectives The conceptual framework of **Experimentation with Human Beings** is designed to facilitate not only the analysis of such concepts as harm benefit and informed consent but also the exploration of the problems raised by man's quest for knowledge and mastery his willingness to risk human life and his readiness to delegate authority to professionals and rely on their judgment *Nations Are Built of Babies* Cynthia R. Comacchio, 1993 *Nations Are Built of Babies* documents a national campaign by Ontario physicians to reduce infant and maternal mortality in the early twentieth century Armed with

a secure faith in science and aided by the increasingly important position of experts in Canadian society the medical profession tackled the national tragedy of infant and maternal mortality by advocating scientific motherhood Canadian mothers were believed to be handicapped by an ignorance that could be remedied only through expert tutoring and supervision of child rearing duties Working within a Marxist feminist framework Cynthia Comacchio demonstrates that the campaign was part of a conscious plan to modernize Canadian families to meet the ideological imperatives of industrial capitalism Doctors reasoned that if infants could be saved and their physical mental and moral health regulated the benefits in socio economic terms would more than offset any individual or state investment
