Kallen, 2005 In the Middle Ages, merchants changed the face of Europe as they spent their lives buying and selling goods. *Medieval Merchant* explores the daily lives of the men and women of the merchant class where they traveled, how they were educated, how they conducted business, and how their business affairs influenced and improved the lives of average citizens. *Seafarers, Merchants and Pirates in the Middle Ages* Dirk Meier, 2006 The first sailors braved the North Sea and the Baltic in open wooden boats; their aims were varied: to fish, to trade, to conquer, and to plunder. Without maps or compasses, they steered by the sun or by landmarks on the coast. Nevertheless, they discovered Iceland and North America and explored the rivers that flowed through Europe and Russia into the Black Sea. With the Frisians and the Vikings, extensive trade routes, better ships, larger harbours, and wealthy coastal towns developed. The pinnacle of these advances was the Hansa, a commercial network that ran from Bruges to Riga. In recent years, archaeologists have discovered much about the development of their ships: the elegant Viking longboat, the ubiquitous cog, the carrack, and the caravel. Much too has been revealed about life in Viking settlements and the bustling Hanseatic cities. In this engaging and highly illustrated volume, Dirk Meier brings to life the world of the medieval seaman based on evidence from ship excavations and contemporary accounts of voyages. Dr. Dirk Meier teaches ancient and medieval history and is Head of Coastal Archaeology at the Christian Albrechts University in Kiel, Germany. **Medieval Merchants** Jennifer Kermode, Jenny Kermode, 2002-07-18 This book is based on some 1400 individuals who lived in three northern English towns during the later Middle Ages. It analyses the many aspects of merchant society: visible to the historian, achievements in politics, attitudes towards religion, the family, wider circles of friends and business acquaintances, and the nature and conduct of trade at every level. Merchants were at the core of urban society, accumulating more wealth than most other townsmen and developing a distinctive outlook and entrepreneurship in response to the opportunities and pressures of long-distance trade. They played a central role in the development of urban mentality, using political rhetoric to promote a corporatist view of urban society while their spending on charity, on public works, and on religious observance shaped social attitudes. Algorithms, Monks, And Merchants: Computing In Everyday Life In The Middle Ages Giorgio Ausiello, 2025-02-25 This book explores the tight relationship that existed between application needs and computational problem-solving methods during the Middle Ages, particularly the period between the 9th and 15th centuries. It was a time of great cultural and economic evolution, starting with the blooming phase of Arab science and continuing with the acquisition of Hindu-Arabic computation methods based on the decimal positional number system in Western Europe. The aim

is to show by means of suitable examples how in the Middle Ages mathematics and computation were tightly related to the solution of everyday life problems These ranges from religious problems like computing the date of Easter to land measurement and financial computations as well as handling various volumes and managing agricultural resources In particular during the late medieval centuries when the economy saw a substantial upswing merchants activity required strong computational skills to solve a great variety of problems It is such need that led to the creation of the so called abacus schools that the sons of merchants primarily Italians but also from other European regions attended during their boyhood to learn computing techniques

Urban Space in the Middle Ages and the Early Modern Age Albrecht Classen,2009-12-15 Although the city as a central entity did not simply disappear with the Fall of the Roman Empire the development of urban space at least since the twelfth century played a major role in the history of medieval and early modern mentality within a social economic and religious framework Whereas some poets projected urban space as a new utopia others simply reflected the new significance of the urban environment as a stage where their characters operate very successfully As today the premodern city was the locus where different social groups and classes got together sometimes peacefully sometimes in hostile terms The historical development of the relationship between Christians and Jews for instance was deeply determined by the living conditions within a city By the late Middle Ages nobility and bourgeoisie began to intermingle within the urban space which set the stage for dramatic and far reaching changes in the social and economic make up of society Legal historical aspects also find as much consideration as practical questions concerning water supply and sewer systems Moreover the early modern city within the Ottoman and Middle Eastern world likewise finds consideration Finally as some contributors observe the urban space provided considerable opportunities for women to carve out a niche for themselves in economic terms
