An Approach to the Comparative Study of History* Neagu Djuvara, 2019-06-25 And in the shadow of the major civilization before it disappeared in its turn how many other cultures have perished without a trace This immense

tragedy is being lived now by many cultures with great intensity One has to belong to such a culture in course of extinction or dying slowly even before its flourishing to understand the infinite distress of those who are helplessly watching the inexorable disappearance of their most precious values With each dying culture it is a unique flower that is withering never to bloom again an incomparable fragrance that fades away forever There is in the smallest idioms there is in the Weltanschauung of the smallest tribe doomed to extinction treasures of wisdom and poetry Lost lost for all eternity In the life of peoples as in the whole Creation the most striking thing that actually shocks the mind is the infinite waste of Nature Those who at present are fortunate enough to belong to the universal cultures may still live with the illusion of their perpetuity But for how long Indeed what is left of Ancient Egypt of Mesopotamia of Crete of Mexico and of Peru And how can we be sure that our conceited race that for centuries extends its domination over peoples and things will not also fall one day in torpor and become apathetic Neagu Djuvara

into perspective In addition the author describes the human responses to increases in atmospheric carbon dioxide after the last ice age and in the last 150 years Near the end of the last ice age atmospheric carbon dioxide was about half of what it is today Due to the lack of carbon dioxide most of the vegetation disappeared from the middle and high latitudes Without plants to eat many large animals became extinct North America lost three fourths of its large animals including the woolly mammoth mastodon and saber tooth cat Humans too had little to eat in these areas and their population declined dramatically The book then explains how and why atmospheric carbon dioxide increased by about 50% after the last ice age ended encouraging a population explosion among plants animals and humans all of which then migrated into many previously barren areas More recently the 28% increase in atmospheric carbon dioxide in the last 150 years has caused a six fold increase in the human population Changes in the next 300 years will reverse some of the current trends This book has value for anyone interested in the ice age extinction glaciers the glacial cycle the atmosphere and oceans and the past and future of plants animals and humans It provides long term information on atmospheric carbon dioxide global warming and cooling

History of Civilizations Mayson Kirby, 2018-08-11 The History of Civilizations traces the history of man in this vast region from the Palaeolithic beginnings to circa 700 B C when the foundations for the formation of the great Empire were laid Many different elements must come together before a human community develops to the level of sophistication commonly referred to as civilization The first is the existence of settlements classifiable as towns or cities This requires food production to be efficient enough for a large minority of the community to be engaged in more specialized activities such as the creation of imposing buildings or works of art the practice of skilled warfare and above all the administration of a centralized bureaucracy capable of running the machinery of state Despite the major role played by Central Asia in shaping the history of the past and of today this vast region stretching from the Caspian Sea to Mongolia and western China had not been studied as a whole cultural entity in time and space This multi volume History of Civilizations of Central Asia published in English is the first attempt to present a comprehensive picture of the cultures that flourished and vanished at the heart of the Eurasian continent from the dawn of civilization to the present day The book is an engaging and thought provoking philosophical account that demonstrates that critical inquiry is an ongoing process with strains of continuity and evolution of Civilizations

Technology: A World History Daniel R. Headrick Professor of Social Sciences and History Roosevelt University, 2009-02-25 Today technology has created a world of dazzling progress growing disparities of wealth and poverty and looming threats to the environment Technology A World History offers an illuminating backdrop to our present moment a brilliant history of invention around the globe Historian Daniel R Headrick ranges from the Stone Age and the beginnings of agriculture to the Industrial Revolution and the electronic revolution of the recent past In tracing the growing power of humans over nature through increasingly powerful innovations he compares the evolution of technology in different parts of the world providing a much broader account than is found in other histories of technology We also discover how small changes sometimes have dramatic results how for instance the stirrup revolutionized war and gave the Mongols a deadly advantage over the Chinese And how the nailed horseshoe was a pivotal breakthrough for western farmers Enlivened with many illustrations Technology offers a fascinating look at the spread of inventions around the world both as boons for humanity and as weapons of destruction

Imhotep Today Jean-Marcel Humbert, 2016-06-16 This book presents and analyses the results of the use and adaptation of ancient Egyptian architecture in modern times It traces the use of ancient Egyptian motifs and constructions across the world from Australia the Americas and Southern Africa to Western Europe It also inquires into the cultural economic and social contexts of this practice Imhotep Today is exceptional not only in its global coverage but in its analyses of thorny questions such as what was it about Ancient Egypt that inspired such Egyptianizing monuments and was it just one idea or several different ones which formed the basis of such activities The book also asks why only certain images such as obelisks and sphinxes were incorporated within the movement The contributors explore how these monuments fitted into the local architecture of the time and in this context they investigate whether Egyptianizing architecture is an ongoing movement and if so how it differs from earlier similar activities
