Israel, Jordan, and the Peace Process Yehuda Lukacs, 1997 Israel and Jordan, even though self-proclaimed enemies of one another, practiced a relationship of interdependence based on corresponding interests. In the years following the 1967 war, these two countries' fates were delicately intertwined because of many factors like mutual reliance on natural resources, especially water, and parallel interests in the subordination of the Palestinian national movement. These conditions of commonality led to extensive ties between the two countries and approximated a state of de facto peace that ironically made an official peace treaty almost impossible to sign. A formal peace treaty would have required not only Israel's withdrawal from the West Bank but also Jordan's acknowledgment of the clandestine contacts between the two former enemies. Yehuda Lukacs gives us an account of how this relationship changed in 1988 when Jordan disengaged from the West Bank. This event combined with the Palestinian uprising and the Gulf War paved the way for Israel and Jordan in 1994 to sign the Israeli-Jordanian peace treaty. By systematically examining the impact of functional cooperation between two former enemies, Lukacs makes an important contribution to Middle East studies and international conflict resolution.

Statecraft in the Middle East Imad Mansour, 2016-09-27 What role do ideas play in state building and state activity? This book argues that government policies in both foreign relations and domestic politics must always be situated within a broader ideational and societal context. Imad Mansour analyses how governments in the contemporary Middle East have governed internally and acted externally based on societal narratives which bring together a variety of ideas about a society's history and place in the world. He argues that there is a dominant societal narrative that acts as a primary building block of statecraft, where statecraft is understood as an ongoing set of local, regional, and global state building processes. Mansour investigates the ways in which statecraft in the Middle East has been guided by narratives through a close historical reading and comparative discussion of the political activity of six states: Egypt, Israel, Syria, Turkey, Saudi Arabia, and Iran in the second half of the twentieth century and the early twenty-first century. His book demonstrates the analytical power of narratives in understanding statecraft and explains why governments' decisions need to be understood in complex ways. *Overlapping*

Regional Orders in the Middle East and North Africa Jordi Quero, 2023-11-24 Focused on a set of overlapping international orders of regional scope present in the Middle East and North Africa this book argues that rules and primary institutions have sanctioned the foreign behavior of the sub system s international actors since 1945 The author avoids recent IR trends focused on narrow case studies instead providing a comprehensive overview of the MENA s regional politics The normative content and evolution of multiple international orders are examined constituting the intra Arab order the Arab Israeli order and the Arab Iranian order as well as the expression of the global order in regional interactions Drawing on Area Studies and English School and constructivist IR theories the author argues that a plurality of overlapping regional orders have coexisted since 1945 not just one as is commonly suggested in the literature Each of these orders is integrated by different participants and has developed its own differentiated norms and institutions setting parameters on legitimate behavior This analytical proposal helps make sense of foreign relations otherwise labeled as incoherent The book has wide appeal accessible both to students wishing to learn about the politics history and sociology of the Middle East as well as to specialists seeking original research on the functioning of the MENA s regional orders

The Arab-Israeli Conflict Transformed Hemda

Ben-Yehuda, Shmuel Sandler, 2012-02-01 The Middle East conflict be it between the state of Israel and Arab states or between Jews and Palestinians is a staple of international news Utilizing both theoretical approaches and empirical evidence Hemda Ben Yehuda and Shmuel Sandler argue that despite the recent upswing in violence particularly over the Palestinian issue conflict has gradually been giving way since the 1970s to a more orderly regime of conflict management By integrating ethnonational theoretical literature into their analysis the authors move beyond the current International Relations debate over the relative merits of realist neo realist approaches versus neo liberal institutional approaches Ethnic state disputes are the primary source for failing to terminate the Arab Israeli conflict
