been evolved through the philosophy of numbers From this source many unwritten laws can be made plain Pythagoras said The heavens and earth vibrate to the single numbers or digits of numbers Each single number from 1 to 9 are digits To find your own numbers divide the alphabet into nine parts To get a scientific cause for the expression of life and to understand what has been taught us by Pythagoras Plato Aristotle and Socrates we must realize that these philosophers were mystics A mystic at that time as at present believed in the Oneness of All that everything came from one source that every separate thing was entirely dependent upon every other separate thing yet all the separate things were joined in the Great Universal Chain of Infinite Lives As many persons want to know how the vibration of numbers can be understood and used we would recommend this book and The Ancient Science of Numbers to such enquirers Chapter XXIII explains the vibrations of numbers to States and it is rather interesting after having found one s own name vibration to know what States will harmonize with such vibration so that a person can make a successful selection of locality to live in It is an interesting book of 168 pages and no doubt will receive a hearty reception
