The Photographic Lenses Ernesto Martinez, 2022-09-05 The objective or lens of our camera is the most important and delicate part of your photographic equipment One of the differences between a compact camera and a SLR is the possibility of using high quality and interchangeable lenses These lenses are designed and built especially for professional use they symbolize the high range in terms of optical quality and versatility since you can use a specific lens for each type of photography or video Once you have your first SLR camera you will have to look for a lens other than the one

that came in the kit When we are starting out it is perfectly understandable that we feel satisfied with our new SLR and a single lens with a more or less wide zoom and that it is enough to cover all our photographs But as we progress as we aspire to grow in our training we think about what objective to put on our camera to replace complement or expand the ones we already have There are objectives that provide added value They are a tool that you can use to expand your creativity or even give your images a more professional touch That is why I intend to expose and explain everything you need to know about the different types of photographic lenses that exist we will examine all their hidden characteristics and a detailed review of the existing lens offers for sale their greater or lesser benefit and its influence on the type of photos we take Photography is an exciting world an art that allows you to treasure unique moments When you decide to take the leap and buy a reflex camera is when you begin to learn even more about the possibilities it offers thanks mainly to the use of high quality interchangeable lenses The series includes the following titles 1 Black and White Art 2 Color and Photography 3 The Exposure 4 Focus and Sharpness 5 Photographic Illumination 6 Composition and Photographic Language 7 The Digital Camera 8 Photographic Lenses 9 Practical guide of Lightroom 10 Photoshop for Photographers Contents The Importance of the Objective The Lens Groups The Target Mount The Luminosity of a Target The Diaphragm and the Numbers f The Image Stabilizer The Focus System How Does Autofocus Work Focus by phase detection or by contrast detection Hybrid Focus and Dual Pixel Minimum Focus Distance Classification by Types of Objectives Fixed Focal Objectives Variable Focal Objectives Special Objectives The Focal Length of the Objective Image Circle or Crop Factor Identification Elements in the Objectives Basic Terminology for Objectives Acronyms in Canon Nikon Pentax Tamron MTF Charts to Measure the Sharpness of a Target Objective Diffraction Equivalent Resolution and Apparent Resolution Choosing a Telephoto Lens Choice of All Terrain Objectives Choice of Wide Angle Objectives Choice of Macro Objectives
