The Pills In Your Life:

The Pill That Steals Lives - One Woman's Terrifying Journey to Discover the Truth About Antidepressants Katinka Newman, 2016-07-07 While going through a divorce documentary filmmaker Katinka Blackford Newman took an antidepressant Not unusual except that things didn't turn out quite as she expected She went into a four day toxic psychosis with violent hallucinations imagining she had killed her children and in fact attacking herself with a knife Caught up in a real life nightmare when doctors didn't realise she was suffering side effects of more pills she went into a year long decline Soon she was wandering around in an old dressing gown unable to care for herself and dribbling She nearly lost everything but luck stepped in treated at another hospital she was taken off all the medication and made a miraculous recovery within weeks By publicising her story Katinka went on to make some startling discoveries Could there really be thousands around the world who kill themselves and others from these drugs What of the billions of dollars in settlements paid out by drug companies Could they really be the cause of world mass killings such as the Germanwings pilot who took an airliner down killing 150 while on exactly the same medication as the author when she became psychotic And how come so many people are taking these drugs when experts say they are no more effective than a sugarcoated pill for people like her who are distressed rather than depressed Moving frightening and at times funny this is the story of how a single mum in Harlesden North West London juggles life and her quest for love in order to investigate Big Pharma For more information visit www.thepillthatsteals.com

New Methuselahs John K. Davis,2024-03-19 An examination of the ethical issues raised by the possibility of human life extension including its desirability unequal access and the threat of overpopulation Life extension slowing or halting human aging is now being taken seriously by many scientists Although no techniques to slow human aging yet exist researchers have successfully slowed aging in yeast mice and fruit flies and have determined that humans share aging related genes with these species In New Methuselahs John Davis offers a philosophical discussion of the ethical issues raised by the possibility of human life extension Why consider these issues now before human

life extension is a reality Davis points out that even today we are making policy and funding decisions about human life extension research that have ethical implications With *New Methuselahs* he provides a comprehensive guide to these issues offering policy recommendations and a qualified defense of life extension After an overview of the ethics and science of life extension Davis considers such issues as the desirability of extended life whether refusing extended life is a form of suicide the Malthusian threat of overpopulation equal access to life extension and the right against harm In the end Davis sides neither with those who argue that there are no moral objections to life enhancement nor with those who argue that the moral objections are so strong that we should never develop it Davis argues that life extension is on balance a good thing and that we should fund life extension research aggressively and he proposes a feasible and just policy for preventing an overpopulation crisis
