you ever walked into a room and known immediately that something was off Maybe your skin tingled or your stomach
clenched maybe you noticed how eyes were averted or chatter was strained Or maybe the opposite was true and you were
walking into a place of safety and comfort where your breathing came more easily your heart rate calmed and your tension
melted away In this groundbreaking interdisciplinary book Alan Briskin and Mary V Gelinas weave together a combined
eighty years of experience in social psychology systems thinking and contemplative practices to explain how fields influence
us physically emotionally and intuitively often without our conscious awareness What if we could learn to pay attention to
these fields that are operating in and around us understand their messages and use them to act more intentionally and
compassionately Discover how awareness of these dynamic spaces can help foster collaborative relationships bridge social
political and religious divides and effect more constructive meaningful and lasting change **Media, Technology and the
Imagination** Marie Hendry, Jennifer Page, 2013-08-19 The dynamic precarious relationship between technology and
imagination or more broadly between the sciences and the humanities is a thrilling crux offering possibilities scholars and
artists of previous generations might have only hoped for in the most abstract way No longer is technological advancement
confined to the laboratory or to the pages of speculative fiction it is an accepted expected aspect of modern existence
including contemporary art performance and literature From the ways we communicate to the ways we create technology
has become a conduit as well as an inspiration for imaginative innovation The advent and accessibility of new media
communication outlets and innovative software programs have democratized the creative landscape building a community of

professionals and amateurs who can freely discuss and shape the way literature art and performance are created and perceived Just as technology has been liberated from categorical confines it has helped art and literature be realized as entities that occur in places besides galleries and libraries Tablets and e readers for example make it possible for literary enthusiasts to read books that are out of print difficult to find or even self published by amateur writers which would have merely been a bibliophile s dream as little as a decade ago Correspondingly the essays in this volume examine the intersection of technology and imaginative creation as it applies to and influences modern film fiction graphic novels and pedagogical practice The contributors investigate how technology has indelibly changed the practice of literary and cultural analysis and even the most basic facets of contemporary society communication relation and creation **Billboard**
