The Political Economy Of Communist China:

The Political Economy of Communist China Jan S. Prybyla, 1970 **China's Political Economy** Carl Riskin, 1987
This comprehensive interpretive economic history presents the dramatic recent changes in China's approach to economic organization and development in an historical context **The Socialist System** János Kornai, 1992-04-12 This book presents a comprehensive analysis of socialist economics It addresses the reasons for the early successes of socialist systems and the reasons for their gradual breakdown **The Political Economy of Chinese Development** Mark Selden, 2016-09-16 The first edition of *The Political Economy of Chinese Socialism* reconceptualized the political economy of China by highlighting the changing character of urban rural and state society conflicts in the era of Mao Zedong's leadership and in the contemporary post Mao reforms The economic and social crises that engulfed China and indeed much of the rest of the socialist world in the late 1980s culminating in the 1989 democratic movement and its suppression stimulated a rethinking of central propositions of the first edition It particularly led the author to inquire anew into the meaning of socio political as well as economic development in a populous and poor agrarian nation This volume then assesses the economic performance and social consequences of China's political economy over four decades with a focus on China's countryside and city countryside relations In addition to a reconceptualization and updating of the introductory chapter there is a new chapter *The Social Origins and Limits of the Chinese Democratic Movement* **Power over Property** Matthew Noellert, 2020-10-13 Following the end of World War II in 1945 the Chinese Communist Party CCP spent the next three decades carrying out agrarian reform among nearly one third of the world's peasants This book presents a new perspective on the first step of this reform when the CCP helped redistribute over 40 million hectares of land to over three hundred million impoverished peasants in the nationwide land reform movement This land reform the founding myth of the People's Republic of China 1949 present and one of the largest redistributions of wealth and power in history embodies the idea that an equal distribution of property will lead to social and political equality *Power Over Property* argues that in practice however the opposite occurred the redistribution of political power led to a more equal distribution of property China's land reform was accomplished not only through the state's power to define the distribution of resources but also through village communities prioritizing political entitlements above property rights Through the systematic analysis of never before studied micro level data on practices of land reform in over five hundred villages *Power Over Property* demonstrates how land reform primarily involved the removal of former power holders the mobilization of mass political participation and the creation of a new social political hierarchy Only after accomplishing all of this was it possible to redistribute land This redistribution moreover was determined by political relations to a new structure of power not just economic relations to the means of production The experience of China's land reform complicates our understanding of the relations between economic social and political equality On the one hand social equality in China was achieved through political not economic means On the other hand the

fundamental solution was a more effective hierarchy of fair entitlements not equal rights This book ultimately suggests that focusing on economic equality alone may obscure more important social and political dynamics in the development of the modern world

The Price and Promise of Specialness Jin Li Lim,2019-06-04 In *The Price and Promise of Specialness* Jin Li Lim revises narratives on the overseas Chinese and the People's Republic of China by analysing the Communist approach to overseas Chinese affairs in New China's first decade as a function of a larger political economy Jin Li Lim shows how the party state centred its approach towards the overseas Chinese on a perception of their financial utility and thus sought to offer them a special identity and place in New China so as to unlock their riches Yet this contradicted the quest for socialist transformation and as its early pragmatism fell away the radicalising party state abandoned its promises to the overseas Chinese who were left to pay the price for their difference

The Political Economy of Corruption in China Julia Kwong,2015-04-08 This text examines all facets of corruption meaning incidence monetary value the kinds of goods exchanged the perpetrators and their strategies in China since 1949 It explores the irony of how ideology and organizational structures under socialism can both restrain and encourage corruption

China's Political Economy Gungwu Wang,John Wong,1998-01-01 1997 was truly an eventful year for China with many momentous happenings In February of that year Deng Xiaoping passed away thus marking the end of an era Shortly after the post Deng Chinese leadership under Jiang Zemin had to mobilise great efforts to ensure the smooth resumption of sovereignty over Hong Kong on June 30 This was then followed by intensive preparation for the holding of the 15th National Congress of the Chinese Communist Party in September which set national priorities for China's medium and long term development as well as decided on the core team of younger leaders responsible for leading China into the 21st century

The Political Economy of Reform in Post-Mao China Elizabeth J. Perry,Christine Wong,2020-10-26 In December 1978 the Chinese Communist Party announced dramatic changes in policy for both agriculture and industry that seemed to repudiate the Maoist road to socialism in favor of certain capitalist tendencies The motives behind these changes the nature of the reforms and their effects upon the economy and political life of countryside and city are here analyzed by five political scientists and five economists Their assessments of ongoing efforts to implement the new policies provide a timely survey of what is currently happening in China Part One delineates the content of agricultural reforms including decollectivization and the provisions for households to realize private profits and examines their impact on production marketing peasant income family planning local leadership and rural violence Part Two examines the evolution of industrial reforms centering on enterprise profit retention and their impact on political conflict resource allocation investment material and financial flows industrial structure and composition of output Through all ten chapters one theme is conspicuous the multiple interactions between politics and economics in China's new directions since the Cultural Revolution

Communists constructing capitalism Julian Gruin,2019-07-04 Why has China's transition to a market economy not catalysed corresponding political transformation In an era of deepening synergy

between authoritarian politics and capitalist economics this book offers a novel perspective on this central dilemma of contemporary Chinese development shedding light on how the Chinese Communist Party achieved rapid economic growth while preserving political stability Drawing on extensive fieldwork and over sixty interviews with policymakers bankers and former party and state officials the book delves into the role of China's state owned banking system since 1989 showing how political control over capital has been central to the country's experience of capitalist development It challenges existing state market paradigms of political economy and reveals the Eurocentric assumptions underpinning liberal perspectives towards Chinese authoritarian resilience
