The Politics Of Belleville A Profile Of The Civil Community:

The Politics of Belleville Daniel Judah Elazar, 1971

The Closing of the Metropolitan Frontier Daniel

Elazar, 2017-07-12 The period from the mid 1960s to the early 1980s signaled the end of the prosperity of the postwar years enjoyed by the cities of the prairie those cities located immediately within or adjacent to the Mississippi River drainage system or what is usually called the American Heartland During this period the bottom dropped out of local economies and all collapsed except those upheld by massive state institutions With this collapse optimism for new opportunities ended signaling the close of the American frontier The Closing of the Metropolitan Frontier looks at mid sized cities Champaign Urbana Decatur Joliet Moline Peoria Rockford Rock Island and Springfield Illinois Davenport Iowa Duluth Minnesota and Pueblo Colorado Elazar examines how they adapted to change during the period immediately after World War II through the Vietnam War and the Nixon years He considers the roles of federal and state governments as instruments of change including their efforts to impose new standards and ways of doing business The Closing of the Metropolitan Frontier analyzes the struggle between federalism and managerialism in the local political arena In his new introduction Daniel J Elazar discusses this volume's place as part of a forty year study of the cities of the prairie as well as the changes and developments in that region over that forty year span This volume will be of great interest to economists political scientists and sociologists interested in the Great Society and the New Federalism and their aftermath

Developing Frontier Cities Harvey

Lithwick, Yehuda Gradus, 2013-04-17 The Unique Nature of Frontier Cities and their Development Challenge Harvey Lithwick and Yehuda Gradus The advent of government downsizing and globalization has led to enormous competitive pressures as well as the opening of new opportunities How cities in remote frontier areas might cope with what for them might appear to be a devastating challenge is the subject of this book Our concern is with frontier cities in particular In our earlier study Frontiers in Regional Development Rowman and Littlefield 1996 we examined the distinction between frontiers and peripheries The terms are often used interchangeably but we believe that in fact both in scholarly works and in popular usage very different connotations are conveyed by these concepts Frontiers evoke a strong positive image of sparsely settled territories offering challenges adventure unspoiled natural landscapes and a different and for many an attractive life style Frontiers are lands of opportunity Peripheries conjure up negative images of inaccessibility inadequate services and political and economic marginality They are places to escape from rather than frontiers which is where people escape to Peripheries are places of and for losers

Exploring Federalism Daniel J. Elazar, 1987-01-30 In this comprehensive analysis of federal

or convenantal forms of government Elazar explores the roots of federalism traces its historical development and portrays how federalism has been employed to promote workable governmental systems for people with diverse traditions He identifies the several elements of federalism as a basis of political association and describes how federalism defines political justice shapes political behavior and directs humans toward civic synthesis of the two Elazar scans the centralizing and

decentralizing trends in contemporary federal systems and explains why federalism is resurfacing as a significant political force in the postmodern epoch He contends that through its covenantal foundations federalism is an idea whose importance is akin to natural law in defining justice and delineating the origins and proper constitution of political society ISBN 0 8173 0240 9 28 95

Opening Cybernetic Frontiers Daniel Judah Elazar, The Opening of the Cybernetic Frontier is the third installment in the Cities of the Prairie project It completes an ongoing multi generational comparative study of ten medium sized communities located in five Prairie and Plains states Illinois Iowa Minnesota Wisconsin and Colorado This long term study was initiated by Daniel J Elazar in 1959 to develop a comprehensive theory explaining and forecasting the development of the civil community based upon the changing relationship between internal developments and external factors In this new volume Elazar and his colleagues trace developments in these communities during the 1980s and 1990s The study examines how local communities function politically socially and economically and then analyzes the impact that regional national and international trends and patterns have on local political systems in general and the cities of the prairie in particular It revisits these communities at the dawning of a new frontier the city cybernetic frontier which is characterized by a knowledge intensive economic base made possible by computer and communication technologies Changing technology has accelerated the settlement patterns that emerged after World War II Ongoing population sprawl means that individuals are leaving the suburbs to live in the exurbs and beyond creating a citybelt phenomenon that relies upon new technologies
