## **The Politics Of Crime And Conflict A Comparative History Of Four Cities:**

**The Politics of Crime and Conflict** Ted Robert Gurr, Peter N. Grabosky, Richard C. Hula, 1977 The Politics of Crime and Conflict is a significant contribution to the comparative study of criminal justice Its strengths lie in the authors rigorous scholarly analysis and attention to detail the utility of the conceptual framework as an ordering device for the case studies the often fresh and insightful conclusions the authors draw from their analysis of the diverse body of data they present and the valuable heuristic contribution of Prof Gurr s theoretical model of urban disorder Finally the study is well written and remarkably free from jargon Policy Studies Journal Vol 6 No 3 Spring 1978 one can only praise and applaud these authors efforts to raise the study of urban crime and repression from *The Politics of Crime and Conflict* Ted Robert Gurr, Peter N. Grabosky, Richard C. Hula, 1977

**Comparative Histories of Crime** Barry Godfrey, Clive Emsley, Graeme Dunstall, 2013-01-11 This book aims to both reflect and take forward current thinking on comparative and cross national and cross cultural aspects of the history of crime Its content is wide ranging some chapters discuss the value of comparative approaches in aiding understanding of comparative history and providing research directions for the future others address substantive issues and topics that will be of interest to those with interests in both history and criminology Overall the book aims to broaden the focus of the historical context of crime and policing to take fuller account of cross national and cross cultural factors

*Political Rebellion* Ted Robert Gurr, 2015-01-09 This volume comprises key essays by Ted Robert Gurr on the causes and consequences of organized political protest and rebellion its outcomes and strategies for conflict management From the Castro inspired revolutionary movements of Latin America in the 1960s to Yugoslavia s dissolution in ethnonational wars of the 1990s and the popular revolts of the Arab Spring millions of people have risked their lives by participating in protests and rebellions Based on half a century of theorizing and social science research this book brings together Gurr s extensive knowledge and addresses the key questions surrounding this subject What grievances hopes and hatreds motivated the protesters and rebels What did they gain that might have offset myriad deaths and devastation How effective are protest movements as alternatives to rebellions and terrorism What public and international responses lead away from violence and toward reforms The essays in the volume are updated and are organized around the evolving themes of the author s research including theoretical arguments interpretations and references to the evidence developed in his empirical research and case studies The concluding essays bring theory and evidence to bear on the past and future of political violence in Africa This book will be of much interest to student of rebellion political violence conflict studies security studies and IR

**Crime, Justice, History** Eric H. Monkkonen, 2002 Crime in the U S and the institutions for its control are deeply embedded in and shaped by history The historical origins have often become invisible and their recovery difficult but any understanding of the contemporary situation requires historical context For over twenty five years Eric H Monkkonen has worked on some of the puzzles and problems in recovering the history of crime and police Much of his work has appeared in articles often in

specialized journals or not in English which this book collects for the first time In addition to Monkkonen's major published articles this volume includes several new ones The topics embrace violence public disorder policing popular culture and contrasts between the U S and Europe Some articles illuminate special methodological and source issues that challenge historians of criminal justice As well as dealing with serious crime this book includes several articles on specifically urban problems and solutions associated with disorder crime and poverty In contrast to the more technical articles several chapters which originally appeared as op ed pieces show how historical understanding can help address current policy issues in crime and crime control All too often current policy debates occur without proper historical background As a result old ideas that have been tried and rejected are re introduced or new and sometimes simple ideas are ignored

**The Civilization of Crime** Eric Arthur Johnson, Eric H. Monkkonen, 1996 Along with most of the rest of Western culture has crime itself become more civilized This book exposes as myths the beliefs that society has become more violent than it has been in the past and that violence is more likely to occur in cities than in rural areas The product of years of study by scholars from North America and Europe The Civilization of Crime shows that however violent some large cities may be now both rural and urban communities in Sweden Holland England and other countries were far more violent during the late Middle Ages than any cities are today Contributors show that the dramatic change is due in part to the fact that violence was often tolerated or even accepted as a form of dispute settlement in village dominated premodern society Interpersonal violence declined in the seventeenth and eighteenth centuries as dispute resolution was taken over by courts and other state institutions and the church became increasingly intolerant of it The book also challenges a number of other historical sociological theories among them that contemporary organized crime is new and addresses continuing debate about the meaning and usefulness of crime statistics CONTRIBUTORS Esther Cohen Herman Diederiks Florike Egmond Eric A Johnson Michele Mancino Eric H Monkkonen Eva sterberg James A Sharpe Pieter Spierenburg Jan Sundin Barbara Weinberger

**Gambling, the State and Society in Thailand, c.1800-1945** James A. Warren, 2013-07-18 During the nineteenth century there was a huge increase in the level and types of gambling in Thailand Taxes on gambling became a major source of state revenue with the government establishing state run lotteries and casinos in the first half of the twentieth century Nevertheless over the same period a strong anti gambling discourse emerged within the Thai elite which sought to regulate gambling through a series of increasingly restrictive and punitive laws By the mid twentieth century most forms of gambling had been made illegal a situation that persists until today

This historical study based on a wide variety of Thai and English language archival sources including government reports legal cases and newspapers places the criminalization of gambling in Thailand in the broader context of the country's socio-economic transformation and the modernization of the Thai state. Particular attention is paid to how state institutions such as the police and judiciary and different sections of Thai society shaped and subverted the law to advance their own interests. Finally the book compares the Thai government's policies on gambling with those on opium use and prostitution placing the latter in the context of an international clampdown on vice in the early twentieth century.

**Making Histories And Constructing Human Geographies** Allan Pred, 2019-02-22 This book is intended to acquaint American historians anthropologists and sociologists with a discourse that questions the prioritizing of the temporal over the spatial the historical over the geographical. Allan Pred argues that neither the study of history nor the execution of social or cultural analysis can be divorced from human geographical.

Evidence-Based Crime Prevention David P. Farrington, Doris Layton MacKenzie, Lawrence W. Sherman, Brandon C. Welsh, 2003-09-02 Crime prevention policy and practice is on the whole far from objective. Instead of being based on scientific evidence the crime policy agenda is seemingly driven by political ideology anecdotal evidence and programme trends. Evidence Based Crime Prevention seeks to change this by comprehensively and rigorously assessing the existing scientific knowledge on the effectiveness of crime prevention programmes internationally. Reviewing more than 600 scientific evaluations of programmes intended to prevent crime in settings such as families schools labour markets and communities this book grades programmes on their scientific validity using the scientific methods scale. This collection which brings together contributions from leading researchers in the field of crime prevention will provide policy makers researchers and community leaders with an understandable source of information about what works what does not work and what is promising in preventing crime.
