Schemmann,2002 The relationship between adult education research and theory is one of tension On the one hand there are several empirical studies carried out without any theoretical guidance On the other hand there is theorizing and theory building taking place without any empirical support *Social Science Theories in Adult Education Research* the third volume of the Bochum Studies in International Adult Education series pleads for the importance of the combination of empirical and theoretical work in a symbiotic way Good empirical studies need theoretical guidance and good theory building needs a solid empirical basis thus the book explores and displays the most often used theories and theoretical perspectives in adult education research in the last decade within the European discourse and analyzes their potentials for adult education research The chapters presented in this volume have a more or less similar underlying structure They display the most important contours of the theory or perspective in question they analyze and discuss the relation to adult education research focusing on examples of other researcher s work and they give an outlook on what can be expected of the respective paradigm s in the future **Child Sexual Exploitation: Why Theory Matters** Jenny Pearce,2019-12-02 The issue of Child

Sexual Exploitation CSE is firmly in the public spotlight internationally and in the UK but just how well is it understood To date many CSE related services have been developed in reaction to high profile cases rather than being designed more strategically This much needed book breaks new ground by considering how psychosocial feminist and geo environmental theories amongst others can improve practice understanding and interventions Edited by one of the leading scholars in the field this is an essential text for students and those planning strategic interventions and practice activities in social youth and therapeutic work with young people as it supports understanding of how CSE arises and how to challenge the nature of the abuse Comparative Sociology and Social Theory Graham Crow,1997-06-09 Recent developments have made obsolete the

division of the globe into three worlds of capitalist state socialist and underdeveloped countries This book traces the interconnectedness of the disorganisation of capitalism in the industrialised west the transformation of former state socialist societies and the divergent fortunes of third world countries It argues that comparative sociology continues to have relevance in the age of globalisation and provides a framework within which these developments can be placed in their proper perspective **Entrepreneurship and New Value Creation** Alain Fayolle,2007-11-22 Why do some individuals decide

they want to create businesses and then actually do so Why do others decide against this course of action even though they appear to have what it takes to succeed These two questions were among the first that researchers in the field of entrepreneurship tried to answer Recently it seems that the problem is much more difficult to solve than it first appeared

thirty years ago The venture creation phenomenon is a complex one covering a wide variety of situations The purpose of this book is to improve our understanding of this complexity by offering both a theory of the entrepreneurial process and practical advice on how to start a new business and manage it effectively Entrepreneurship and New Value Creation is a fascinating research driven book that will appeal to graduate students researchers and reflective practitioners concerned with the dynamics of the entrepreneurial process
