The Postnational Constellation:

The Postnational Constellation Jürgen Habermas, 2001-02-02 translated edited and with an introduction by Max Pensky Does a global economy render the traditional nation state obsolete Does globalization threaten democratic life or offer it new forms of expression What are the implications of globalization for our understanding of politics and of national and cultural identities In *The Postnational Constellation* Jürgen Habermas addresses these and other questions He explores the historical and political origins of national identity the achievements and catastrophes of the twentieth century the future of democracy in the wake of the era of the nation state the political and moral challenges facing the European Union and the status of global human rights in the ongoing debate on the sources of cultural identity In their scope critical insight and clarity the essays present a powerful vision of the contemporary political scene and the opportunities and challenges facing us Those new to Habermas's work will find in this book a lucid and engaging introduction to one of the twentieth century's most influential thinkers Those familiar with Habermas's writings will appreciate the application of his social and political theories to current political realities

The Politics of Belonging Alain Dieckhoff, 2004-01-01 *The Politics of Belonging* represents an innovative collaboration between political theorists and political scientists for the purposes of investigating the liberal and pluralistic traditions of nationalism Alain Dieckhoff introduces an indispensable collection of work for anyone dealing with questions of identity ethnicity and nationalism

NGOs as Legitimate Partners of Corporations Dorothea Baur, 2011-08-21 The interaction between corporations and non governmental organizations NGOs has become an important topic in the debate about corporate social responsibility CSR Yet unlike the vast majority of academic work on this topic this book explicitly focuses on clarifying the role of NGOs not of corporations in this context Based on the notion of NGOs as political actors it argues that NGOs suffer from a multiple legitimacy deficit they are representatives of civil society without being elected the legitimacy of the claims they raise is often controversial and there are often doubts regarding the legitimacy of the behaviour they exhibit in putting forward their claims Set against an extended sphere of political action in the postnational constellation this book argues that the political model of deliberative democracy provides a meaningful conceptualization of NGOs as legitimate partners of corporations and it develops a conceptual framework that specifically allows distinguishing legitimate partner NGOs from two related actor types with whom they share certain characteristics but who differ with respect to their legitimacy These related actor types are interest groups on the one hand and activists on the other hand In conclusion it argues that a focus on the behaviour of NGOs is most meaningful for distinguishing them from interest groups and activists

Habermas and Contemporary Society J. Sitton, 2003-08-15 Over the last four decades Jürgen Habermas has forged an innovative and much discussed theory of contemporary capitalist society Building on Max Weber's thesis that the dynamic of capitalism actually erodes individual freedom and the meaningfulness of social life famously resulting in a culture of specialists without spirit sensualists without heart Habermas traces contemporary social conflict to

resistance to this dynamic by a variety of social groups His theory of communicative action attempts to show the possibilities in contemporary society for moving toward a more balanced social life that unlike other political currents today would not sacrifice the truly progressive features of complex modern societies By marginalizing methodological and other more specialized theoretical concerns this book focuses on Habermas's substantive portrayal of contemporary society and its discontents **Jürgen Habermas**, 2011 *A Critical Theory of Global Justice* Malte Frøslee Ibsen, 2022-12-20 This book

offers the first systematic treatment of the idea of a critical theory of world society Malte Frøslee Ibsen develops a reconstruction of the Frankfurt School tradition as four paradigms of critical theory in original interpretations of the work of notable theorists **Contextualizing Urban Narratives through the Socio-Spatial Dialectic** Ankur Konar, 2024-03-26

This book examines how urban narratives explore the complexities of city life including the diversity of its inhabitants the challenges of urbanization and the impact of social and economic disparities They may delve into such topics as crime poverty gentrification and the struggle for identity and belonging in different bustling metropolis settings like Delhi Mumbai Kolkata Benaras Edinburgh and Glasgow This monograph provides a lens through which authors and storytellers examine and reflect upon the complexities challenges and opportunities of urban life It seeks to reiterate how the discourse of urban narratives refers to the specific language themes and ideas that are commonly found in stories set in urban environments and encompasses the ways in which urban spaces are portrayed the issues and conflicts that arise within these settings and the social cultural and political commentary that is often embedded in these narratives Rethinking Democracy and the European Union Erik Oddvar Eriksen, John Erik Fossum, 2013-06-17

While the Lisbon treaty was meant to clarify the European Union's role and political identity it remains a challenge for politicians and decision makers to define Rethinking Democracy and the European Union looks at both the concept of the EU as a political system and analyses the meaning and status of democracy in Europe today This book draws upon leading scholars and practitioners from the RECON project Reconstituting Democracy in Europe to frame and analyse a range of institutional realms and policy fields including constitutionalisation representative developments gender politics civil society and public sphere identity and security and globalisation Drawing together these strands the book questions whether EU politics require a new theory of democracy and evaluates the relationship between union and state and the possible future of post national democracy Lucid and accessible this book is at the forefront of the intellectual debate over the character of the EU presenting research theory and analysis on a critical political issue of our time Rethinking Democracy and the European Union will be of interest to students and scholars of democracy European Union politics and international relations **The European Constitution, Welfare**

States and Democracy Christoffer C. Eriksen, 2011-10-06 This book explores how the right to the free movement of goods persons services and capital in the European Union legal order affects welfare states These four freedoms as they are known are vital instruments for the protection of a European market unencumbered by internal frontiers The European Constitution

Welfare States and Democracy explore the relationships and conflicts that have emerged between the European constitution and the legal regulation of mixed economies and markets within welfare states. In particular, it examines the threat posed to the discretionary powers enjoyed by national governments and administrative authorities. Christoffer C. Eriksen has undertaken a comprehensive analysis of a series of judgments in which the European Court of Justice has clearly indicated the ways in which the four freedoms may be incompatible with the current practice of entrusting national administrative authorities with discretionary powers and thus highlights how the four freedoms are provoking democratic dilemmas previously neglected in the academic literature. The book is written in a style which communicates beyond an audience of specialized legal scholars and although it includes analysis of black letter law, its methodology also draws from the disciplines of philosophy, political science and sociology.
