The Privatization Of China The Great Reversal 19781989:

Great Reversal William Hinton,1990 The Great Reversal is the first critical study of the widely heralded reforms currently transforming China's economy From his long experience in Chinese agriculture Hinton first examines the course of agricultural reform over the past decade then looks at its consequences in different areas of the countryside and considers its implications for the country as a whole He raises troubling questions about China's capitalist future the growing landlessness increasing inequality and above all the destruction of the nation's natural resources and the collectively built infrastructure that was the great achievement of the revolution In so doing he sheds new light on the sources of discontent behind the demonstrations that culminated in the Tiananmen massacre of June 1989 Recognized inside and outside China as an expert on the country's agriculture Hinton spent five or six months there every year but one since 1978 when the wave of reform was first introduced He witnessed the events of June 1989 first hand This experience gives authority to an analysis that digs deeper and more widely than anything else available His essays open up a new perspective on Mao and his successors one that has been totally obscured by the Western media The Great Reversal ,2016 **Privatizing the Land** Ivan Szelenyi,2002-09-11 Privatizing the Land provides an overview of reforms in the state socialist agrarian systems especially during the 1970s and 1980s in Eastern Europe and the Soviet Union Using empirical evidence the contributors provide a balanced assessment of how agrarian economies performed in different communist countries The Soviet and Eastern European experience is contrasted with reforms in China Vietnam and Cuba to provide the first comprehensive account of agricultural restructuring after the collapse of communism in Europe and Asia **China Under Communism** Alan Lawrance,2002-09-11 China Under Communism examines how Marxism took root flourished and developed within the context of an ancient Chinese civilization Through analysis of China's history and traditional culture the author explores the nature of Chinese communism and how it has diverged from the Soviet model This book also provides insight into the changing perceptions Westerners have of the Chinese and vice versa Key features include assessment of controversial issues The Great Leap Forward the Cultural Revolution and Mao's record coverage of gender and family ethnicity nationalism and popular culture long historical context This timely evaluation details how China's political and economic policies have been inextricably linked and assesses past failures and successes as well as major problems for the future **Socialism** C. M. Hann,2003-09-02 Socialism as a political system may be on the wane yet no one can doubt that its cultural legacies will make themselves felt for years to come and on a worldwide scale The contributors to this volume adopt a variety of anthropological approaches to illuminate changes which have removed socialists from power in many countries Presenting detailed ethnographic accounts across a wide range of countries they bring out the factors which have given socialism such a profound worldwide impact including a substantial impact upon the discipline of anthropology itself The first sustained and wide ranging investigation of socialism by social anthropologists this volume will enable readers to understand better how

socialism has been experienced by millions of people and thereby to now better understand how they may cope with post socialist dilemmas *International Bibliography of the Social Sciences* British Library of Political and Economic Science,1992 The IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences *China In The Post-utopian Age* Christopher J. Smith,2019-04-11 China in the Post Utopian Age is an interdisciplinary book about China in the post utopian age focusing on the transformations that have occurred during the leaderships of Deng Xiaoping and Jiang Zemin throughout the 1980s and 1990s *The Party and the Arts in China* Richard Curt Kraus,2004-04-02 In this original exploration of the dynamic and potent interface between Chinese culture and politics Richard Kraus examines the impact of the market on the once comprehensive system of state patronage of the arts in the PRC The author uses all genres of art to explore the changing nature of politics seen through such phenomena as ideology propaganda censorship and the relationship of artists to the state Kraus makes three provocative arguments First the commercialization of China's cultural life has been intellectually liberating but also poses serious economic challenges that artists are sometimes slow to master Second despite conventional wisdom in the West that China's economic reforms have not been followed by serious political reform he shows that the shift from state patronage to a mixed system of private and public sponsorship is in fact a fundamental political change Third Western recognition of the reformation in China's cultural life has been obscured by a combination of ignorance ideological barriers and foreign policy rivalry Cogent witty and deeply informed this comprehensive overview of the Chinese arts scene will be an essential text for all observers of contemporary China *The Mirage of China* Xin Liu,2012 Today's world is one marked by the signs of digital capitalism and global capitalist expansion and China is increasingly being integrated into this global system of production and consumption As a result China's immediate material impact is now felt almost everywhere in the world however the significance and process of this integration is far from understood This study shows how the a priori categories of statistical reasoning came to be re-born and re-lived in the People's Republic as essential conditions for the possibility of a new mode of knowledge and governance From the ruins of the Maoist revolution China has risen through a mode of quantitative self-objectification As the author argues an epistemological rift has separated the Maoist years from the present age of the People's Republic which appears on the global stage as a mirage This study is an ethnographic investigation of concepts of the conceptual forces that have produced and been produced by two forms of knowledge life and governance As the author shows the world of China contrary to the common view is not the Chinese world it is a symptomatic moment of our world at the present time *The Land Question in China* Shaohua Zhan,2019-01-15 This book interrogates the inevitability and practicability of full scale land intensive capitalist agriculture in China whilst analyzing the labor intensive industrious revolution as an alternative rural development path It presents a critical account of the recent rise of agrarian capitalism as a force that would undermine hundreds of millions of

people's livelihoods in the populous country. The Land Question in China traces the roots of the industrious revolution in China back to the eighteenth century, drawing comparisons between contemporary rural development and economic prosperity in the mid-Qing dynasty. In the context of neoliberal restructuring, it argues that vigorous rural development with broad access to land offers a solution to mitigate precarious urban employment and population pressure, while the transfer of land from villagers to large producers and urban investors will exacerbate these problems. Comparisons with South Africa and the East Asian economies of Japan, South Korea, and Taiwan further illustrate this and help to develop a new interpretation of the industrious revolution and its contemporary relevance. Providing a critical examination of the new land reform in China from a world historical perspective, this book will be useful to students and scholars of sociology, economics, and development, as well as Chinese Studies.
