1990s to protect the threatened rainforest in the borderlands of Mexico Belize and Guatemala Currently the Maya Forest is a biodiversity hotspot composed of a network of protected areas and heritage sites However issues related to water land and forests have often been treated as separate political units and not as part of the same history Written by two authors with decades of hands on experience in this region this book sheds light on the complex dynamics by which conservation and natural resource management geopolitically shape borderlands such as the Maya Forest The book introduces the novel concept of forest waterlands as borderlands and fluid edges which are now subject to concern by conservationists These are entangled spaces in which conservation peoples and politics interact connect and disconnect with the nexus of waters forests and lands The book sheds light on the building and mapping of the Maya Forest ecoregion with particular attention to water as an often neglected but unifying element It showcases how the Maya Forest is a distinct region characterized by transformations entangled with the Maya trails of biological stations the shared history of chicleros chewing gum hunters fluid international rivers and transboundary basins and various geopolitical discrepancies It offers a contemporary glimpse into the Maya Forest s intertwined bio and geopolitics which urge us to rethink borders and boundaries This book will be of great interest to students and scholars of nature conservation global environmental politics geopolitics borderlands international relations and natural resource management

The Maya World Matthew Restall, 1999-02-01 This pathbreaking work is a social and cultural history of the Maya peoples of the province of Yucatan in colonial Mexico spanning the period from shortly after the Spanish conquest of the region to its incorporation as part of an independent Mexico Instead of depending on the Spanish sources and perspectives that have formed the basis of previous scholarship on colonial Yucatan the author aims to give a voice to the Maya themselves basing his analysis entirely on his translations of hundreds of Yucatec Maya notarial documents from libraries and archives in Mexico Spain and the United States most of which have never before received scholarly attention These documents allow the author to reconstruct the social and cultural world of the Maya municipality or cah the self governing community where most Mayas lived and which was the focus of Maya social and political identity The first two parts of the book examine the ways in which Mayas were organized and differentiated from each other within the community and the discussion covers such topics as individual and group identities sociopolitical organization political factionalism career patterns class structures household and family patterns inheritance gender roles sexuality and religion The third part explores the material environment of the cah emphasizing the role played by the use and exchange of land while the fourth part describes in detail the nature and significance of the source documentation its genres and its language Throughout the book the author pays attention to the comparative contexts of changes over time and the similarities or differences between Maya patterns and those of other colonial era Mesoamericans notably the Nahuas of central Mexico
