## **The Meaning And End Of Religion:**

**The Meaning and End of Religion** Wilfred Cantwell Smith,1991 Wilfred Cantwell Smith maintained in this vastly important work that Westerners have misperceived religious life by making religion into one thing He shows the inadequacy of religion to capture the living endlessly variable ways and traditions in which religious faith presents itself in the world

**The Meaning and End of Religion** Wilfred Cantwell Smith,1964 **The Meaning and End of Religion** Wilfred Cantwell Smith,1978 **The Meaning and End of Religion** ,1978 *The Will to Arise* Caleb Oluremi Oladipo,2006 One of the most important developments of Christianity in the twentieth century was its transformation in South Africa where it became a vibrant religion rooted in African idioms and cultures The church also became engaged in the struggle against social and political injustice and church leaders employed the vocabularies of faith to secure civil liberty This hard hitting book focuses on post apartheid Christian character and establishes the theological and spiritual authority of African

Christians calling contemporary Christians to renew their faith and Christian identity It shows too that one cannot seriously consider contemporary Christianity apart from the African experience **Religion Dans L'histoire** Michel

Despland,Gérard Vallée,Canadian Corporation for Studies in Religion,1992-03-03 The history of the concept of religion in Western tradition has intrigued scholars for years This important collection of eighteen essays brings further light to the ongoing debate Three of the invited participants W C Smith M Despland and E Feil has each previously written impressive books treating this subject the last two acknowledged the impact and continuing influence of Smith s work *The Meaning and End of Religion* An introduction and a recapitulation of Smith s contribution as a scholar set the stage for a retrospective look at the published literature Contributors then examine the transformation of words the classical religio to the modern religion particularities of religion in nineteenth century France Troeltsch s concept of religion the study of religion from an Asian point of view and the categorization of World Religions The concluding essays elaborate contemporary anthropological cross disciplinary semiological deconstructive and psychoanalytical methodological approaches to the concept and study of religion Exploring critically different aspects of the concept and study of religion these provocative essays typically reflect the methodological pluralism currently existing in the field of Religious Studies Of interest to scholars and students alike this collection also contains a complete bibliography of W C Smith s publications **Encountering Religious Pluralism** Harold

Netland,2001-08-14 Harold Netland traces the emergence of the pluralistic ethos that challenges Christian faith and mission interacting heavily with philosopher John Hick and providing a framework for developing a comprehensive evangelical theology of religions **The Meaning and End of Religion, Etc** Wilfred Cantwell Smith,1964 *Printing Religion after the Enlightenment* Timothy Stanley,2022-07-26 Over the course of the seventeenth to eighteenth centuries an interior private notion of religion gained wide public recognition It then spread through settler colonial contexts around the world It has since been criticized for its abstract immaterial nature as well as its irrelevance to traditions beyond the European context

However such critiques obscure the contradiction between religion's definition as a matter of interior privacy and its public visibility in various printed publications Timothy Stanley responds by re-evaluating the cultural impact of the exterior forms in which religious texts were printed such as pamphlets broadsheets books and journals He also applies that evidence to critical studies of religion shaped by the crisis of representation in the human sciences While Jacques Derrida is oft cited as a progenitor of that crisis the opposite case is made Additionally Stanley draws on Derrida's thought to reframe the relation between a religious text's internal hermeneutic interests and its external forms In sum this book provides a new model of how people printed religion in ways that can be compared to other material cultures around the world

**A Guide to the Phenomenology of Religion** James Cox, 2006-08-15 Provides an introduction and overview to the Phenomenology of Religion through describing analysing and evaluating the ideas of key thinkers in the phenomenology of religion This book also examines the thinking of scholars within the Dutch British and North American schools of religious phenomenology

**The European Wars of Religion** Wolfgang Palaver, Harriet Rudolph, Dietmar Regensburger, 2016-12-05 In recent years religion has resurfaced amongst academics in many ways replacing class as the key to understanding Europe's historical development This has resulted in an explosion of studies revisiting issues of religious change confessional violence and holy war during the early modern period But the interpretation of the European wars of religion still remains largely defined by national boundaries tied to specific processes of state building as well as nation building In order to more thoroughly interrogate these concepts and assumptions this volume focusses on terms repeatedly used and misused in public debates such as religious violence and holy warfare within the context of military conflicts commonly labelled religious wars The chapters not only focus on the role of religion but also on the emerging state as a driver of the escalation of violence in the so called age of religious war By using different methodological and theoretical approaches historians philosophers and theologians engage in an interdisciplinary debate that contributes to a better understanding of the religious political situation of early modern Europe and the interpretation of violent conflicts interpreted as religious conflicts today By adopting a multidisciplinary approach new and innovative perspectives are opened up that question if in fact religion was a primary driving force behind these conflicts

*Religion and the Secular* Timothy Fitzgerald, 2014-12-05 Religion has dominated colonialism since the 16th century Religion and the Secular critically examines how religion has been used to subject indigenous concepts to the needs of colonial powers Essays present the colonial relationship from the perspective of colonized cultures including Mexico Guatemala Vietnam India Japan South Africa and Canada and colonizing powers namely England Germany and the United States The volume offers a historical and ethnographical analysis of the relationship between the sacred and the secular examining religion in relation to politics economics and civil power

**The Oxford Handbook of Religion and Race in American History** Kathryn Gin Lum, Paul Harvey, 2018 The Oxford Handbook of Religion and Race in American History brings together a number of established scholars as well as younger scholars on the rise to provide a scholarly

overview for those interested in the role of religion and race in American history Thirty four scholars from the fields of History Religious Studies Sociology Anthropology and more investigate the complex interdependencies of religion and race from pre Columbian origins to the present The volume addresses the religious experience social realities theologies and sociologies of racialized groups in American religious history as well as the ways that religious myths institutions and practices contributed to their racialization Part One begins with a broad introductory survey outlining some of the major terms and explaining the intersections of race and religions in various traditions and cultures across time Part Two provides chronologically arranged accounts of specific historical periods that follow a narrative of religion and race through four plus centuries Taken together The Oxford Handbook of Religion and Race in American History provides a reliable scholarly text and resource to summarize and guide work in this subject and to help make sense of contemporary issues and dilemmas

The Insider/Outsider Problem in the Study of Religion Russell T. McCutcheon, 1999-03-07 Thirty classic and contemporary readings from such writers as Kant Hume Schleiermacher and Otto to Ninian Smart Mircea Eliade Karen McCarthy Brown and Wendy Doniger      **The Notion of "religion" in Comparative Research** Ugo Bianchi, 1994 Nel 1990 si tenne a Roma il XVI Congresso del I A H R che ebbe come tema la nozione di religione Venne particolarmente analizzato l'uso di tale termine da parte degli studiosi di lingua europea nei rapporti con le culture non europee e viceversa      **The Dialectic Between W.C. Smith's The Meaning and End of Religion, and W. Mountcastle's Religion in Planetary Perspective** Wayne H. Mitchell, 1981      **A Trinitarian Theology of Religions** Gerald Robert McDermott, Harold A. Netland, 2014 How are Christians to think of non Christian religions How are they to relate to people who do not share their faith Two senior scholars survey the field of theology of religions from an evangelical perspective and propose fresh approaches to long debated questions such as salvation revelation the relationship between culture and religion conversion and social action      **Pluralism: The Future of Religion** Kenneth Rose, 2013-03-28 Theology of religions has defaulted in the last two decades to an epicyclic inclusivism which seeks to undermine pluralism with claims that it is covertly triumphalistic and that it mirrors the logic of exclusivism With the exception of pioneers in the field such as John Hick and Paul Knitter most major figures in this theological field have retreated from pluralism and promote versions of particularism and inclusivism Pluralism The Future of Religion argues for an apophatic pluralism that is motivated by the insight that it is impossible to secure universal assent for changeable bodies of religious teachings This insight implies the non finality and consequent departicularization of all religious teachings and their inclusivistic defenses These conclusions point us inevitably toward pluralism and lead us out of the inclusivistic impasse of contemporary theology in religions      **Triangulating Religion, Belief, and Faith in the Twenty-First Century** Bradford McCall, 2025-01-16 This book gives the reader the ability to make new inroads to understanding how faith belief and religion not only differ but also how they can contribute to comparative theology These three topics broadly covered herein can heighten the understanding of the Sacred by those who

study them As to a few preliminaries what is faith Further what is belief Which one comes first in a person s journey toward the Sacred Moreover does religion factor into these two terms and if so where and how Does Augustine s well worn line faith seeking understanding mean anything today If it does would it mean belief comes prior to faith and or religion One can argue both sides of this debate and still be considered orthodox seemingly Perhaps it is the case that belief precedes faith most of the time but not all of the time Perhaps it is the other way around What exactly is the demarcation between belief and faith Many a person believes a thing to be true in their very bones such a stance borders on what is commonly referred to as faith Is religion the combination of belief and faith together into a coherent system of thought or is it emergent from the two existing as a separate mental or spiritual entity Explore these questions and more

**The Science of Religion: A Defence**

Donald Wiebe, 2018-10-16 Donald Wiebe Professor of Philosophy of Religion at Trinity College University of Toronto has spent much of his academic career arguing for a clear demarcation between Theology and Religious Studies The Science of Religion A Defence offers a brilliant overview of Professor Wiebe s contributions on methodology in the academic study of religion of the development of his thinking over time and of his intellectual commitment to a science of religion The work is divided into three parts The first part identifies pertinent connections between religion religious studies and science and why reductionism in the academic study of religion when properly applied can bridge the explanatory gap between the sceptic and the devotee The second part treats conceptual debates in the academic study of religion with particular reference to the place of belief understanding and meaning in the modern study of religion The third part addresses the theological resistance to the scientific study of religion and how that resistance can be overcome Finally two new essays are included a critique on The Preconceptions of a Science of Religion by Anthony J Palma and an accompanying reply by Donald Wiebe The Science of Religion A Defence is an essential resource for both scholarly and non scholarly audiences alike and will be of particular interest to both defenders and critics of a scientific study of religion
