BOOKJACKET *The Right Medicine* David Cundiff, Mary Ellen McCarthy, 2012-12-06 When Dr David Cundiff called me with a proposal to help research and write *The Right Medicine* I was intrigued but skeptical His ideas for reform of the US health care system were visionary radical and highly original but would they work As a Wall Street analyst and long time student of the health care system I had my

doubts had read David's book on hospice care Euthanasia Is Not the Answer and was impressed And I had recently witnessed the slow death of my grandmother from the complications of Alzheimer's disease Despite the fact that she was and had been suffering for years and despite the fact that her care was an extraordinary emotional and financial burden nursing home administrators and physicians encouraged one last ditch treatment after another pulling her back each time from the brink of what would have been a merciful death I knew that David was correct in his contention that hospice care and a more sparing application of high technology medicine were major keys to improving health care I also realized after a decade of analyzing the health care industry that a government funded system along the lines of Canada's was probably the only way to rein in rampant inflation and provide universal coverage But David had other ideas too He argued that preventive care could dramatically cut both the incidence and costs associated with the most common causes of illness in America today

United States. Congress. House. Committee on Agriculture,1971 **Eating Promiscuously** James McWilliams,2017-05-01 A bold and bracing argument for the complete reimagining of the human diet by the critically acclaimed author of Just Food The human practice of farming food has failed There are 7 500 known varieties of domesticated apples we regularly eat about five Seventy five percent of the world's food derives from five animals and twelve plants Factory farmed meat is a major source of greenhouse gas emissions about 14 percent larger than transportation and consumes 75 percent of the water in drought prone regions such as the West We are stuck in a rut of limited choices and the vast majority of what we eat is detrimental to our health and the welfare of the planet But what if we could eliminate agriculture as we know it What if we could start over James McWilliams's search for more expansive palate leads him to those who are actively exploring the fringes of what we can eat a group of outliers seeking nutrition innovation outside the industrial food system Here we meet insect manufacturers seaweed harvesters road kill foragers plant biologists and oyster farmers who seek to open both our minds and our mouths and to overturn our most basic assumptions about food health and ethics Eating Promiscuously generates hope for a more tasteful future one in which we eat thousands of foods rather than dozens with a new philosophy that could save both ourselves and our planet **Relations.
