The Media Elite Americas New Powerbrokers:

The Media Elite S. Robert Lichter, Stanley Rothman, Linda S. Lichter, 1986 *Hollywood's America* Stephen P Powers, 2018-02-19 American motion pictures still dominate the world market with an impact that is difficult to measure Their role in American culture has been a powerful one since the 1930s and is a hallmark of our culture today Though much has been written about the film industry there has been very little systematic attention paid to the ideology of its creative elite How does the outlook of that elite impact on the portrayals of America that appear on the screen How do their views interact with the demands of the market and the structure of the industry to determine the product that is seen by mass audiences *Hollywood's America* is a marvellously rich and careful discussion of these questions It combines a meticulous systematic content analysis of fifty years of top grossing films with a history of the changing structure of the industry To that mixture it adds an in depth survey of Hollywood's creative elite comparing them to other leadership groups The result is a balanced discussion of unique breadth and depth on a subject of national importance Placing the film industry in the context of American society as a whole the authors point out that Hollywood's creative leadership impacts the larger society even as it is influenced by that society The creators of films cannot remove themselves too far from the values of the audiences that they serve However the fact that films are made by a relatively small number of people who as the authors demonstrate tend to share a common outlook means that over time motion pictures have had an undeniable impact on the beliefs lifestyles and action of Americans This study contributes to the debate over the role and influence of those who create and distribute the products of mass culture in the United States The book also contains a devastating critique of the poststructuralist theories that currently dominate academic film criticism demonstrating how they fail in their attempt to explain the political significance of motion pictures *The Rise and Fall of the Media Establishment* NA NA, 2016-09-27 Darrell West argues against prevailing wisdom that the media has increased in influence in the past decade Covering over 200 years of American history beginning in colonial America and ending with the present day *The Rise and Fall of the Media Establishment* provides an overview of the media in various key stages of American History paying particular attention to the rise and fall in influence of the media elite West organizes the book into five distinct media eras the Partisan Commercial Objective Interpretive and Fragmented Media Each chapter organized around these media eras includes case studies that illustrate the theme of that chapter Ideal for the general reader as well as the academic *The Rise and Fall of the Media Establishment* offers an accessible engaging book with a challenging thesis **Media Ownership and Concentration in America** Eli M. Noam, 2009-10-19 The concentration of private power over media has been the subject of intense public debate around the world Critics have long feared waves of mergers creating a handful of large media firms that would hold sway over public opinion and endanger democracy and innovation But others believe with equal fervor that the Internet and deregulation have opened the media landscape significantly How concentrated has the American information sector really become What are the

facts about American media ownership In this contentious environment Eli Noam provides a comprehensive and balanced survey of media concentration with a methodical scientific approach He assembles a wealth of data from the last 25 years about mass media such as radio television film music and print publishing as well as the Internet telecommunications and media related information technology After examining 100 separate media and network industries in detail Noam provides a powerful summary and analysis of concentration trends across industries and major media sectors He also looks at local media power vertical concentration and the changing nature of media ownership through financial institutions and private equity The results reveal a reality much more complex than the one painted by advocates on either side of the debate They show a dynamic system that fluctuates around long term concentration trends driven by changing economics and technology Media Ownership and Concentration in America will be essential reading and a trove of information for scholars and students in media telecommunications IT economics and the history of business as well as media industry professionals business researchers and policy makers around the world Critics and defenders of media trends alike will find much that confirms and refutes their world view But the next round of their debate will be shaped by the facts presented in this book **Press and Public** Leo Bogart,2023-01-06 This book reviews the challenges that face American newspapers at the end of the 1980s after a decade of circulation losses for many dailies and several decades of accelerating social change It describes how content of newspapers is changing in the context of a discussion of the nature of news Macro Socio-economics: From Theory to Activism David Sciulli,2016-09-16 Contributors to this volume respond to the normative capsule framing economic behaviour that Amitai Etzioni has explored The text also looks at his works on organisations public policy socio economics and communitarianism Congress, the Press, and Political Accountability R. Douglas Arnold,2013-10-31 Congress the Press and Political Accountability is the first large scale examination of how local media outlets cover members of the United States Congress Douglas Arnold asks do local newspapers provide the information citizens need in order to hold representatives accountable for their actions in office In contrast with previous studies which largely focused on the campaign period he tests various hypotheses about the causes and consequences of media coverage by exploring coverage during an entire congressional session Using three samples of local newspapers from across the country Arnold analyzes all coverage over a two year period every news story editorial opinion column letter and list First he investigates how twenty five newspapers covered twenty five local representatives and next how competing newspapers in six cities covered their corresponding legislators Examination of an even larger sample sixty seven newspapers and 187 representatives shows why some newspapers cover legislators more thoroughly than do other papers Arnold then links the coverage data with a large public opinion survey to show that the volume of coverage affects citizens awareness of representatives and challengers The results show enormous variation in coverage Some newspapers cover legislators frequently thoroughly and accessibly Others some of them famous for their national coverage largely ignore local representatives The analysis also confirms that only those

incumbents or challengers in the most competitive races and those who command huge sums of money receive extensive coverage

The Politics of Persuasion Anthony R. DiMaggio, 2017-02-21 Examines how the US media covers high profile public policy issues in the context of competing claims about media bias Tracking the effects of media content on the public is a difficult endeavor and media effects vary on a subject to subject basis To address this challenge The Politics of Persuasion employs a multifaceted mixed method approach to studying mass media and public attitudes Anthony R DiMaggio analyzes more than a dozen case studies covering US domestic economic policy and examines a wide range of theories of how bias operates in mass media with regard to coverage of these issues While some research claims that journalists are overly negative and biased against government officials some reveals that journalists favor citizens groups Still other studies contend there is a liberal bias in the media a progovernment bias or a bias in favor of advertisers and business interests Through his analysis DiMaggio is the first to systematically examine all of these competing interpretations He concludes that reporters tailor stories to corporate and government interests but argues that the ability to manufacture consent from the public in favor of these elite views is far from guaranteed According to DiMaggio citizens often make use of their own personal experiences and prior attitudes to challenge official narratives

Environmental Cancer-- a Political Disease? S. Robert Lichter, Stanley Rothman, 1999-01-01 An examination of the controversies surrounding environmental cancer The authors draw on surveys by cancer researchers and environmental activists to reveal differences between the two groups viewpoints They examine these opposing views and document how they are reflected in the media

The Republican Noise Machine David Brock, 2005 Bestselling author David Brock documents the most important political development of the last thirty years How the Republican Right has won political power and hijacked public discourse in the United States Over the last several decades the GOP has built a powerful media machine newspapers and magazines think tanks talk radio networks op ed columnists the FOX News Channel Christian Right broadcasting book publishers and high traffic Internet sites to sell conservatism to the public and discredit its opponents David Brock s penetrating analysis of news stories from the disputed 2000 presidential election to the war in Iraq to the political battles of 2004 reveals that this booming right wing media market is largely based on bigotry ignorance and emotional manipulation closely tied to America s long standing cultural divisions and the buying power of anti intellectual traditionalists Writing with verve and deep insight Brock reaches far beyond typical bromides about media bias to produce an invaluable account of the rise of right wing media and its political consequences

Corporate Public Affairs Otto Lerbinger, 2006-08-15 Exploring the increasing interest in public affairs by organizations the author indicates that more and more frequently corporations are establishing public affairs positions typically within public relations departments to respond to issues and concerns arising out of the sociopolitical environment in which the corporation functions

Making Sense of Media and Politics Gadi Wolfsfeld, 2011-06-23 Politics is above all a contest and the news media are the central arena for viewing that competition One of the central concerns of

political communication has to do with the myriad ways in which politics has an impact on the news media and the equally diverse ways in which the media influences politics Both of these aspects in turn weigh heavily on the effects such political communication has on mass citizens In *Making Sense of Media and Politics* Gadi Wolfsfeld introduces readers to the most important concepts that serve as a framework for examining the interrelationship of media and politics political power can usually be translated into power over the news media when authorities lose control over the political environment they also lose control over the news there is no such thing as objective journalism nor can there be the media are dedicated more than anything else to telling a good story the most important effects of the news media on citizens tend to be unintentional and unnoticed By identifying these five key principles of political communication the author examines those who package and send political messages those who transform political messages into news and the effect all this has on citizens The result is a brief engaging guide to help make sense of the wider world of media and politics and an essential companion to more in depths studies of the field

Mediapolitik Lee Edwards, 2001 Drawing upon his lifelong study of politics and journalism political historian Lee Edwards offers the first scholarly examination of a powerful new phenomenon in world politics the mass media Edwards argues in his far ranging and innovative work that the media have become as important a factor in determining the course of international affairs and the future of nations as economic prosperity military strength natural resources and national will The author calls this vital new component of world politics *mediapolitik* He uses case studies from around the world to show how the mass media have influenced and even determined the outcome of major political acts such as the collapse of communism in Eastern and Central Europe the Tiananmen Square massacre in China the ousting of Chilean dictator Augusto Pinochet and the political resurrection of South Africa's Nelson Mandela The author argues that these case studies show that the mass media can either enrich or enslave the human spirit depending upon their moral foundation If the media follow a liberal democratic model as in the United States and Western Europe they contribute to a free and just society If they follow an authoritarian model as in South Africa before Mandela or a totalitarian model as in Saddam Hussein's Iraq or Fidel Castro's Cuba they perpetuate the regime in power and deny the fruits of freedom and democracy to the people Edwards addresses the question of how responsibly the American media the most influential media in the world handle their enormous power Using the results obtained from his survey of 100 leading journalists as well as close analysis of major news stories of the last decade the author confirms the rampant cynicism of the American media and its deleterious effect on American politics and government The solution he suggests is that American journalists must practice moral responsibility and strengthen the liberal democratic model of *mediapolitik* around the world

ABOUT THE AUTHOR Lee Edwards is senior fellow at the Heritage Foundation and adjunct associate professor of politics at The Catholic University of America He is senior editor of *The World* magazine and author or editor of numerous books including *The Collapse of Communism* *The Conservative Revolution* *The Power of Ideas* *The Heritage Foundation at 25 Years* and

Goldwater The Man Who Made a Revolution PRAISE FOR THE BOOK Mediapolitik is a broad gauged survey of what the mass media is and how it works around the world There is scarcely an issue or debate within media and media watching circles that Mr Edwards does not touch on and analyze with care and precision Reading Mediapolitik is the equivalent of at least a semester s worth of J School and more fun Washington Times Mediapolitik is superb a much needed comprehensive study of a crucial topic It is full of insight in its analysis and wisdom in its conclusions Peter W Rodman former Deputy Assistant to the President for National Security Affairs A revealing study of the mass media s impact on world politics You may not agree with all of his conclusions but Mediapolitik is well worth reading Hal Bruno former political director ABC News Edwards is a sterling advocate for more responsibility in journalism His cogent insights are always worthy of study and debate Stephen Hess The Brookings Institution author of The Little Book of Campaign Etiquette The author s case studies are valuable No one to my knowledge has presented such information and analysis in such a systematic fashion Prof Marvin Olasky Acton Institute A very plausible and reliable overview of the impact of changes in news and entertainment media on the politics of our world The Defining the Nation? Katharina Nötzold,2009-09-10 Katharina N tzold explores whether and how mass media can contribute to nation building after civil war Drawing on the example of Lebanon s audiovisual media organisations which are mostly privately owned by politicians she demonstrates how political elites use television to transmit their visions of post war society Lebanon s nation building process from 1990 to 2005 was characterized by Syrian dominance over political life From an extensive content analysis of Lebanese news and interviews with analysts journalists and managers from all Lebanese TV stations it emerges that political information on television focused more on divisive experiences than cohesive ones This has underpinned continued sectarianism in Lebanon in the media as in society at large and has impeded nationbuilding *Making Citizens* Philo C. Wasburn,Tawnya J. Adkins Covert,2017-01-24 This book assembles what political scientists sociologists and communication analysts have learned in almost six decades of research on political socialization the lifelong process by which we acquire political beliefs It also explores how people develop political values attitudes identities and behavioral dispositions Of particular interest to Philo C Wasburn and Tawnya J Adkins Covert is the process by which people are made into active citizens who are politically interested informed partisan tolerant and engaged Finally Wasburn and Adkins Covert identify some suggestions for institutional change that would lead to better citizenship **From Yahweh to Yahoo!** Doug Underwood,2010-10-01 Presenting religion as journalism s silent partner From Yahweh to Yahoo provides a fresh and surprising view of the religious impulses at work in contemporary newsrooms Focusing on how the history of religion in the United States entwines with the growth of the media Doug Underwood argues that American journalists draw from the nation s moral and religious heritage and operate in important ways as personifications of the old religious virtues Underwood traces religion s influence on mass communication from the biblical prophets to the Protestant Reformation from the muckraker and Social Gospel campaigns of the late nineteenth and early twentieth centuries to the

modern age of mass media While forces have pushed journalists away from identifying themselves with religion they still approach such secular topics as science technology and psychology in reverential ways Underwood thoughtful analysis covers the press s formulaic coverage of spiritual experience its failure to cover new and non Christian religions in America and the complicity of the mainstream media in launching the religious broadcasting movement Custodians of Conscience James S. Ettema, Theodore L. Glasser, 1998 Through in depth interviews with award winning investigative reporters and detailed analyses of the stories that brought them professional acclaim the authors explain how journalists resolve practically if not conceptually the paradox of a press that is committed to exposing wrongdoing and is at the same time adamant about its disinterest in questions of right and wrong

Media Bias? Tawnya J. Adkins Covert, Philo C. Wasburn, 2009-01-01 Media Bias addresses the question To what extent can mainstream news media be characterized as conservative or liberal The study involves a systematic comparative analysis of the coverage given to major domestic social issues from 1975 to 2000 by two mainstream newsmagazines Newsweek and Time and two explicitly partisan publications the conservative National Review and the liberal Progressive Working from the idea that some biased accounts of social issues can perform several positive functions for the maintenance and vitality of political democracy Adkins Covert and Wasburn offer a new methodology for analyzing bias empirically one that is capable of producing valid and reliable findings They begin by defining the meaning of bias and discuss possible methods of measuring media bias empirically and systematically By comparing each publication s coverage on poverty crime the environment and gender issues in which the line between the conservative and liberal positions are clearly delineated the authors consider both the positive and negative consequences of media bias and how the bias plays out within a media conscious democratic society

Abortion Politics in American States Mary C. Segers, Timothy A. Byrnes, 2016-09-16 The essays presented here draw from the Soviet Interview Project s evidence of the internal condition of the CPSU party during the era of stagnation and its role influence and impact on the operation of legal and economic institutions and state bureaucracies
