Winer,2013-06-17 Volume 28 of The Annual features stimulating original essays on the relationship between psychoanalysis and the neurosciences Edelman s Neural Darwinism informs Barry s investigation of the psychoanalytic theory of internalization and Fajardo s reassessment of breaks in consciousness whereas Gedo s hierarchical model of mental functioning informs Fisher s presentation of the treatment of an autistic child Elsewhere Hadley proposes a neurobiologically distinct motivational system devoted to the development of autonomy Solms attempts to bridge psychoanalysis and the neurophysiology of dreaming Levin and Trevarthen examine the relationship of conscious and unconscious functions to the executive control network ECN of the brain Levin examines the contributions of chaos theory to psychoanalysis and Modell explores metaphor as the crucial aspect of the developing mind and brain through which cognition itself occurs Moraitis s examination of why analysis has been so slow to integrate its findings with the insights of contemporary neuroscience and cognitive psychology and Sadow s reprise on the role of theory in the evolution of psychoanalysis usefully frame the contributions to this section Section II of Volume 28 reengages a subject area for which The Annual has become well known The four characteristically excellent studies in applied psychoanalysis found here cover the effect of early father loss on the work of the American watercolorist Charles Burchfield The Creativity of Women the unconscious influence of metaphor on

attitudes and value judgments and the application of self psychology to the dramas of Eugene O'Neill. It is altogether typical of this fine series that a collection of essays dedicated to the development of a psychobiologically sophisticated psychoanalysis should be followed by contributions that testify to the explanatory vitality of psychoanalysis with respect to issues of literature, art and creativity.

Core-Periphery Relations and Organization Studies R. Westwood, G. Jack, F. Khan, M. Frenkel, 2014-08-29 Core-Periphery Relations and Organization Studies draws together postcolonial and indigenous thinking through the conceptual lens of core-periphery relations to advance debate in organization studies. A particular aim of this book is to broaden, deepen and critically reassert a postcolonial imagination in this domain.

**Understanding Suicide's Allure** Stanley Krippner, Linda Riebel, Debbie Joffe Ellis, Daryl S. Paulson, 2021-01-13 This book explains why suicide can be alluring to a person aiming to stop his or her traumatic pain, whether its source is bullying, sexual assault, war, combat or other PTSD-invoking events and details approaches that can prevent suicide. Suicide has been a taboo topic in Western culture. The mere mention of suicide sparks reactive responses that include medical, moral, spiritual and religious debates. As a result, the authors open an important discussion here, offering an honest and non-judgmental examination of the many aspects involved in the nature of suicide, explaining that above all, people need to learn how to support those struggling with suicidal thoughts or to intercept their own suicidal thinking. The book also includes an extensive review and evaluation of the many available mental health treatments. Special consideration is given to military suicides. U.S. soldier suicides exceed one per day and continue to rise in all military branches while veteran suicide rates are even higher, averaging 17 per day. Communities, families, veterans and service members are in need of tools and insights for coping with navigating and exposing the suicidal attitudes affecting many current and former members of the military.

Indigenous Spiritualities at Work Chellie Spiller, Rachel Wolfgramm, 2015-06-01 Are you intrigued by ancient wisdom traditions? Do you ever wonder if they have any relevance in today's world? How do Indigenous ways of being and doing balance wealth creation and well-being? How might Indigenous peoples define success? What are Indigenous spiritualities? How are spiritualities manifested in Indigenous organizations today? These questions have intrigued us for many years. As a consequence, we invited scholars from around the world to contribute to a ground-breaking book, *Indigenous spiritualities at work: transforming the spirit of business enterprise*, to explore these questions from different worldviews. A key focus of this book is how Indigenous spiritual approaches revitalize identities and relationships within the workplace. However, the notion of workplace is not narrow as it includes communities of engagement and practice in ecologies of creativity and enterprise in the broadest sense. This enables *Indigenous spiritualities at work* to be explored from diverse perspectives, disciplines, cultures and sectors. In particular, the authentic voices of authors in this book enrich our understandings, offers points of enlightenment and amplifies spiritual traditions of Indigenous peoples in a way that honours traditions of the past, present and future. The contributions build bridges between scholarly work and practice. They include empirical studies of spiritualities, mindfulness, presence and
