The Metronome Its Precursors:

The Metronome and It's Precursors Rosamond Evelyn Mary Harding, 1983 **Beating Time & Measuring Music in the Early Modern Era** Roger Mathew Grant, 2014

Beating Time Measuring Music in the Early Modern Era chronicles the shifting relationships between ideas about time in music and science from the sixteenth through the early nineteenth centuries Centered on theories of musical meter the book investigates the interdependence between theories of meter and conceptualizations of time from the age of Zarlino to the invention of the metronome These formulations have evolved throughout the history of Western music reflecting fundamental reevaluations not only of music but also of time itself Drawing on paradigms from the history of science and technology and the history of philosophy author Roger Mathew Grant illustrates ways in which theories of meter and time informed by one another have manifested themselves in the field of music During the long eighteenth century treatises on subjects such as aesthetics music theory mathematics and natural philosophy began to reflect an understanding of time as an absolute quantity independent of events This gradual but conclusive change had a profound impact on the network of ideas connecting time meter character and tempo Investigating the impacts of this change Grant explores the timekeeping techniques musical and otherwise that implemented this conceptual shift both technologically and materially Bringing together diverse strands of thought in a broader intellectual history of temporality Grant s study fills an unexpected yet conspicuous gap in the history of music theory and is essential reading for music theorists and composers as well as historical musicologists and practitioners of historically informed performance

Maelzel's Chess Player Robert Wilcocks, 1994 This is the first study of Freud's texts to incorporate the intellectual findings of Adolf Grünbaum the archival material published by Jeffrey Masson the recently published correspondence between Freud and Wilhelm Fliess and Lewin's profile of long term cocaine users Wilcocks challenges literary critics who have granted Freud's writings scientific status and claims that the works are no more than the rhetorical deceptions of a talented writer Through a careful examination of the Freud Fliess correspondence and of Freud's case histories and through a novel comparison of Freud's rhetorical devices with Poe's rhetoric of deception in the essay *Maelzel's Chess Player* Wilcocks reveals that Freud was a talented but disturbed master of deception including self deception

Franz Schubert's Music in Performance David Montgomery, 2003 In *Franz Schubert's Music in Performance* David Montgomery challenges many operative myths about the music of this great but often misunderstood Viennese master Chief among them is the lingering notion that Schubert was poorly trained but still managed to turn out brilliant if often flawed scores Modern adherents of this view believe that Schubert could not notate his own musical wishes accurately and that he was principally a creature of intuition Accordingly musicians might allow themselves wide intuitive leeway in the interpretation of his music Another myth challenged by Montgomery is that Schubert was a conservative or perhaps even a chronological throwback Opposing recent attempts to legitimize performer generated embellishment of Schubert's music in the style of the eighteenth century He clarifies Schubert's contributions to the radical intellectualism of nineteenth century romanticism The book offers six informative chapters ranging from aesthetics and acoustics to the specifics of tempo and expression plus an appendix of pertinent Viennese pedagogical sources In addition to many years of musicological research Montgomery brings long experience as a concertizing pianist and conductor to this engaging and controversial work

The Sciences in Enlightened Europe William Clark, Jan Golinski, Simon Schaffer, 1999-07 Radically reorienting our understanding of the Enlightenment this book explores the complex relations between enlightened values and the making of scientific knowledge Here monsters and automata barometers and botanical gardens polite academics and boisterous clubs plans for violent wars and for universal peace are all relocated in the landscape of enlightened Europe The contributors show how changing forms of discipline machinery and instrumentation affected the emergence of new kinds of knowledge consider how institutions of public rate taste and conversation helped provide a common frame for the study of human and nonhuman natures and explore the regional operations of scientific culture at the geographical fringes of Europe Covering a wide range of scientific disciplines

both in the principal European countries and in areas peripheral to Europe the book also includes ample illustrations and an extensive bibliography Implicated in the rise of both fascism and liberal secularism the moral and political values that shaped the Enlightenment remain controversial today Through careful scrutiny of how these values influenced and were influenced by the concrete practices of its sciences this book gives us an entirely new sense of the Enlightenment from back cover

The Musical World ,1842 **The Fortepianist as Orator** George Barth,1988 **Transferential Poetics, from Poe to Warhol** Adam Frank,2014-12-15

Transferential Poetics presents a method for bringing theories of affect to the study of poetics Informed by the thinking of Silvan Tomkins Melanie Klein and Wilfred Bion it offers new interpretations of the poetics of four major American artists Edgar Allan Poe Henry James Gertrude Stein and Andy Warhol The author emphasizes the close reflexive attention each of these artists pays to the transfer of feeling between text and reader or composition and audience their transferential poetics The book s historical route from Poe to Warhol culminates in television a technology and cultural form that makes affect distinctly available to perception The peculiar theatricality of these four artists Frank argues can best be understood as a reciprocal framing relation between the bodily means of communicating affect by face and voice and technologies of graphic reproduction
