The Philosophy Of Development Revisited:

The Philosophy of Development Revisited Zvi Yehuda Hershlag, 1984 **Kuhn's The Structure of Scientific Revolutions Revisited** Vasso Kindi, Theodore Arabatzis, 2013-05-20

The year 2012 marks the 50th anniversary of the publication of Thomas S Kuhn's *The Structure of Scientific Revolutions*. Up until recently the book's philosophical reception has been shaped for the most part by the debates and the climate in philosophy of science in the 1960s and 1970s. This new collection of essays takes a renewed look at this work. This volume concentrates on particular issues addressed or raised in light of recent scholarship and without the pressure of the immediate concerns scholars had at the time of the *Structure*'s publication. There has been extensive research on all of the major issues concerning the development of science which are discussed in *Structure*, work in which the scholars contributing to this volume have all been actively involved. In recent years they have pursued novel research on a number of topics relevant to *Structure*'s concerns such as the nature and function of concepts, the complexity of logical positivism and its legacy, the relation of history to philosophy of science, the character of scientific progress and rationality and scientific realism, all of which are brought together and given new light in this text. In this way our book makes new connections and undertakes new approaches in an effort to understand the *Structure*'s significance in the canon of philosophy of science.

Primary Care Revisited Ben Yuk Fai Fong, Vincent Tin Sing Law, Albert Lee, 2020-06-03

This book adopts an interdisciplinary approach with a wide scope of perspectives on primary healthcare, describing related principles, care models, practices and social contexts. It combines aspects of development research and education applied in primary health care, providing practitioners and scholars with a comprehensive overview of the current knowledge and delivery models of healthcare in community settings. It covers the practical, philosophical and scholarly issues pertinent to the delivery, financing, planning, ethics, health politics, professional and technological development, resources and monitoring in primary health care. Contributors are from a diverse range of academic and professional backgrounds, bringing together collective expertise in mainstream medicine, nursing, allied health, Chinese medicine, health economics, administration, law, public policy, housing, management, information technology and mass communications. As such, the book does not follow the common clinical practice or service-based approach found in most texts on primary care. The contents will serve as a useful reference work for policymakers, researchers, community health practitioners, health executives and higher education students.

Hegel Reconsidered H. Tristram Engelhardt Jr., T. Pinkard, 2013-03-09

Much of contemporary philosophy, political theory and social thought has been shaped directly or indirectly by Georg Wilhelm Friedrich Hegel, though there is considerable disagreement about how his work should be understood. He has been described both as a metaphysician and characterized as an ironic narrator who anticipated the character of philosophy after metaphysics. His position is equally ambiguous with regard to his political thought. He has been construed both as an enemy of the liberal state and as a friend of freedom. This volume's revisionist reassessment building on the scholarship of Klaus

Hartmann explores these ambiguities in favor of a non metaphysical reading of Hegel's arguments. It also shows how the foundations of his political thought support a liberal democratic state. This reappraisal of Hegel's arguments resituates him as a philosopher who anticipates the difficulties of post modernity and offers a basis for reassessing ontology, aesthetics and revolution. Philosophers and those doing work in political theory will find this volume of great interest. Revisiting Gramsci's Notebooks, 2019-11-26. Revisiting Gramsci's Notebooks offers a rich collection of historical, philosophical and political studies addressing the thought of Antonio Gramsci, one of the most significant intellects of the twentieth century. Based on thorough analyses of Gramsci's texts, these interdisciplinary investigations engage with ongoing debates in different fields of study. They are exciting evidence of the enduring capacity of Gramsci's thought to generate and nurture innovative inquiries across diverse themes. Gathering scholars from different continents, the volume represents a global network of Gramscian thinkers from early career researchers to experienced scholars. Combining rigorous explication of the past with a strategic analysis of the present, these studies mobilise underexplored resources from the Gramscian toolbox to confront the actuality of our great and terrible world. Contributors include F. Antonini, A. Bernstein, D. Boothman, W. Buddharaksa, T. Chino, R. Ciavolella, C. Conelli, A. Crúz, G. V. Cuppi, Y. Douet, A. Freeland, F. Frosini, L. Fusaro, R. Jackson, A. Loftus, S. Meret, S. Neubauer, A. Panichi, I. Pohn, Lauggas, R. Roccu, B. Settis, A. Showstack, Sassoon, A. Suceca, P. D. Thomas, N. Vandeviver, M. N. Wrblewska.

Adult Development, Michael L. Commons, Cheryl Armon, Lawrence Kohlberg, Francis A. Richards, Tina A. Grotzer, Jan D. Sinnott, 1990-05-23. In recent years, researchers have begun to focus attention on postformal thought, the development of thought in late adolescence and adulthood, questioning Piaget's early terminus of structural development in adolescence. This volume brings together the works of distinguished authors in the field of postformal, operational, cognitive, social and perceptual development to examine the models and methodology used to investigate postformal thought. The contributors represent the variety of approaches that characterize this body of research while at the same time seeking to unify this diverse literature with a common language. An ideal text for advanced courses in adult development, this volume is also a primary reference for developmental and educational psychologists and students working in the fields of cognitive development, adolescent and adult development and lifespan development. Divided into four parts, the volume begins by examining both Piagetian and nonstructural models of adult cognitive development, considering them in light of current research developments. Individual papers address models of equilibrium, knowledge, reflective judgment, ego development and consciousness. In Part II, the contributors discuss the measurement and comparison of cognitive development in adults, exploring such topics as construct validity and theories of adult development, the structural and developmental relations between formal and postformal capacities and the relationship between Piagetian and Kohlbergian stages. The third section assesses the research and theory of adult reasoning in the moral domain, while the concluding chapter investigates critical evaluations of postformal research. Numerous tables and figures enhance the discussions. **Revisiting Russian Radicals**

Andrew M. Drozd, Brendan G. Mooney, 2024-12-13 *Revisiting Russian Radicals* is a collection of ten articles that seeks to promote a revisitation of the Russian Radicals who have been somewhat unjustly forgotten in the aftermath of the fall of the Soviet Union. Rather than viewing the radicals through the lens of the 1917 October Revolution, the authors seek to analyze them on their own terms and explore new aspects of their legacy. The chapters provide a fresh look at some well-known radicals like Chernyshevsky, Dobrolyubov, and Pisarev, as well as examinations of lesser-known figures and offer an interdisciplinary approach to their investigations combining historical and literary analysis. A lengthy introduction is included for those who are non-Slavists and for the newer generation of Slavists who may not be as familiar with these figures.

Kierkegaard's Relations to Hegel Reconsidered Jon Stewart, 2007-08-16 Jon Stewart's study is a major re-evaluation of the complex relations between the philosophies of Kierkegaard and Hegel. The standard view on the subject is that Kierkegaard defined himself as explicitly anti-Hegelian; indeed, that he viewed Hegel's philosophy with disdain. Jon Stewart shows convincingly that Kierkegaard's criticism was not of Hegel but of a number of contemporary Danish Hegelians. Kierkegaard's own view of Hegel was in fact much more positive to the point where he was directly influenced by some of Hegel's work. Any scholar working in the tradition of Continental philosophy will find this an insightful and provocative book with implications for the subsequent history of philosophy in the twentieth century. The book will also appeal to scholars in religious studies and the history of ideas.
