The Planning of Industrial Investment Programs David A. Kendrick, Ardy J. Stoutjesdijk, 1978      The Planning of Industrial Investment Programs David A. Kendrick, Ardy J. Stoutjesdijk, 1978 This report introduces a new series of research publications the planning of investment programs by outlining a systematic approach of sectorwide investment analysis placing special emphasis on complications arising in the presence of economies of scale Although the methodology is offered as a powerful aid to project identification the authors also provide a candid assessment of its limitations Readers unfamiliar with mathematical programming techniques will find this book a helpful grounding in linear and mixed integer programming facilitating understanding of subsequent books in the series Ongoing research at the World Bank has studied the importance for investment analysis of interdependence among economic activities with reference to particular industrial sectors Two main conclusions emerged First in the presence of significant economies of scale interdependence is important enough to warrant explicit recognition in the investment analysis phase Second computer technology now permits a far more comprehensive and systematic analysis of sectorwide investment problems than was ever possible before enabling the analyst to examine many variants of a given project or groups of interdependent projects In this methodological introduction the authors develop a planning model and suggest guidelines for its use which includes the ability to make decisions about size location time phasing technology and product mix to be made within its framework      **Agricultural Economics**

**Research** ,1981      **Commodity Models for Forecasting and Policy Analysis** Walter C. Labys, Peter K. Pollak, 2024-02-01 Originally published in 1984 this book remains as relevant as when it was first published At that time the oil crises of the 1970s and the growing international debt burden highlighted the extent to which events in primary commodity markets continue to influence the economies of developing and industrialized economies alike Commodity modelling has become a valuable tool in efforts to predict and understand the behaviour of commodity markets and thereby reduce their fluctuations This book provides an overview of the nature of the different types of commodity model as well as their diverse applications In non technical language the reader is introduced to the underlying modelling methodologies including their advantages limitations and commodity specific implications The book will be of interest to commodity economists traders and analysts economic planners and those involved in agricultural mineral and energy modelling      **Economic Structure and**

**Performance** Hollis B. Chenery, 2014-05-10 Economic Structure and Performance Essays in Honor of Hollis B Chenery briefly reviews the work of Hollis Chenery in the field of economics This book discusses the underlying themes in Chenery s work including structure strategy adjustment and models Organized into four parts encompassing 26 chapters this book begins with an overview of the patterns of structural change and their relation to growth This text then examines the objectives measures and implementation of policy as well as administrative capabilities and cultural characteristics Other chapters compare Chenery s econometric analysis of development patterns with the historical analyses and suggest that the

two approaches complement each other This book discusses as well the persistence of disequilibrium in segments of the economy The final chapter deals with simple criteria for detecting critical interdependencies and a formula for measuring their welfare consequences This book is a valuable resource for economists industrialists foreign capitalists and social scientists

**Modeling Mineral and Energy Markets** Walter C. Labys, 2012-12-06 This book provides a framework for analyzing and forecasting a variety of mineral and energy markets and related industries Such modeling activity has been at the forefront of the economic and engineering professions for some time having received a major stimulus following the first oil price shock in 1973 Since that time other shocks have affected these markets and industries causing disequilibrium economic adjustments which are difficult to analyze and to predict Moreover geopolitics remains an important factor which can destabilize crude oil markets and associated refining industries Mineral and energy modeling consequently has become a major interest of energy related corporations mining and drilling companies metal manufacturers public utilities investment banks national government agencies and international organizations This book hopes to advance mineral and energy modeling as follows

- 1 The modeling process is presented sequentially by leading the model builder from model specification estimation simulation and validation to practical model applications including explaining history analyzing policy and market and price forecasting
- 2 New developments in modeling approaches are presented which encompass econometric market and industry models spatial equilibrium and programming models optimal resource depletion models input output models economic sector models and macro oriented energy interaction models including computable general equilibrium
- 3 The verification and application of the models is considered not only individually but also in relation to the performance of alternative modeling approaches and
- 4 The modeling framework includes a perspective on new directions so that the present model building advice will extend into the future

**Recent Developments in Commodity Modeling** Walter C. Labys, 1988 A review of the state of the art of Bank commodity modeling for forecasting and analysis of supplies demand and prices

*Guidelines for Evaluating the Management Information Systems of Industrial Enterprises* Edilberto L. Segura, 1985 These guidelines are intended to assist in evaluating the adequacy of the management information systems MIS of industrial enterprises The introduction discusses the objectives of a management information system and suggests how to use the guidelines The guidelines are divided into five parts corresponding to the five functions of the enterprise

- i finance and accounting
- ii human resources
- iii marketing distribution and transportation
- iv operations including production materials management and maintenance
- v new investments and procurement

For each of these functions the guidelines will help evaluate the impact on the company's MIS of the business environment and management framework as well as the adequacy of the company's systems for strategic planning tactical planning management control and transaction recording processes In addition a section is provided to help quantify the evaluation of the MIS Furthermore the guidelines are meant to assist in evaluating the MIS systems of its potential borrowers but not intended to establish the Bank's requirements regarding MIS

under its loans and credits They may however prove of use to some enterprise managers in their own internal evaluation processes

**Computational Models in the Economics of Environment and Development** A.K. Duraiappah, 2012-12-06

Computational Models in the Economics of Environment and Development provides a step by step guide in designing developing and solving non linear environment development models It accomplishes this by focusing on applied models using real examples as case studies Additionally it gives examples of developing policy interventions based on quantitative model results Finally it uses a simple computer program GAMS to develop and solve models This book is targeted towards university lecturers and students in economic modeling and sustainable development but is also of particular interest to researchers at sustainable development research institutes and policy makers at international sustainable development policy institutions such the World Bank UNDP and UNEP
