**Parental Development** Jack Demick,Krisanne Bursik,Rosemarie DiBiase,2014-02-25 This volume seeks to identify and define the parameters of a relatively new problem area parental development Drawing on the grand developmental theories of Sigmund Freud Lawrence Kohlberg Jean Piaget Lev Vygotsky Heinz Werner and their descendants this book has the potential to generate an area of common concern for those interested in either child adolescent or adult development through the novel application of developmental principles and considerations to the ecological context of parenting To that end this volume brings together theory and research from the subfields of adult and child adolescent development Chapter authors place the problem area of parental development in theoretical context and examine selected psychological part processes implicated by focusing on cognitive and psychosocial development The authors then deal with a range of issues that are perhaps less traditional and or more in line with the complex character of everyday life That is they utilize either relatively novel comparison groups or treat parents at later stages of development rather than those in young adulthood as is often the case Finally the authors uncover both similarities and differences among their theoretical perspectives with an eye toward delineating some possible future research directions

**Beginnings & Beyond** Ann Miles Gordon,Kathryn Williams Browne,2004 Beginnings Beyond is the tool students need to develop vital skills necessary to become successful teachers and caregivers They will come to thoroughly understand the fundamentals of early childhood education through a discussion of the topic from an historical perspective present day issues and future trends In this sixth edition the authors have emphasized multiculturalism and NAEYC s developmentally appropriate practice to support the viewpoint that there is more than one correct way to care for and educate young children

*Handbook of Parenting: Being and becoming a parent* Marc H. Bornstein,2002 Despite the fact that most people become

parents and everyone who has ever lived has had parents parenting remains a mystifying subject about which almost everyone has opinions but about which few people agree Striking permutations on the theme of parenting are emerging single parenthood blended families lesbian and gay parents and teen versus fifties first time moms and dads Divided into four volumes the Handbook of Parenting is concerned with different types of parents basic characteristics of parenting forces that shape parenting problems faced by parents and the practical sides of parenting Contributors have worked in different ways toward understanding all of these diverse aspects of parenting and look to the most recent research and thinking in the field to shed light on many topics every parent has wondered about Because development is too subtle dynamic and intricate to admit that parental caregiving alone determines the course and outcome of ontogeny      **Dating and Sexuality in America** Jeffrey S. Turner, 2003-11-04 A highly informative account of trends concepts and problems related to dating and sexuality in the United States along with thought provoking coverage of today's most important issues and controversies A history of dating and sexuality illuminates new trends and problems that were absent just a few decades ago The most important dating and sexuality issues facing teenagers today are explored including solutions and implications for educational intervention The work elucidates how dating unfolds and how sexual attitudes and behaviors impact intimacy Valuable information about organizations and individuals as well as print and electronic resources are included in this authoritative work      *Human Development* Grace J. Craig, Don Baucum, 1999 Designed for students from a wide range of backgrounds this text takes a chronological and interdisciplinary approach to human development With its focus on context and culture the 8 E illustrates that the status of human development is inextricably embedded in a study of complex and changing cultures      *Therapeutic Hypnosis with Children and Adolescents* Laurence L. Sugarman, William Wester II, 2014-02-02 In this completely revised updated and expanded volume the editors have brought together some of the field's most outstanding contributors to examine the wide ranging applications and promise of the use of hypnosis with children The book develops core principles of clinical hypnosis with children and adolescents and each contributor delineates how they apply these precepts in a range of psychological and medical settings The result is a constellation of perspectives and clinical applications that move the reader beyond literature review to practical advice      *Growing Each Other Up* Sara Lawrence-Lightfoot, 2016-09-29 From growing their children parents grow themselves learning the lessons their children teach Growing up then is as much a developmental process of parenthood as it is of childhood While countless books have been written about the challenges of parenting nearly all of them position the parent as instructor and support giver the child as learner and in need of direction But the parent child relationship is more complicated and reciprocal over time it transforms in remarkable surprising ways As our children grow up and we grow older what used to be a one way flow of instruction and support from parent to child becomes instead an exchange We begin to learn from them The lessons parents learn from their offspring voluntarily and involuntarily with intention and serendipity often through resistance and struggle are embedded in their evolving

relationships and shaped by the rapidly transforming world around them With Growing Each Other Up Macarthur Prize winning sociologist and educator Sara Lawrence Lightfoot offers an intimately detailed emotionally powerful account of that experience Building her book on a series of in depth interviews with parents around the country she offers a counterpoint to the usual parental development literature that mostly concerns the adjustment of parents to their babies rhythms and the ways parents weather the storms of their teenage progeny The focus here is on the lessons emerging adult children ages 15 to 35 teach their parents How are our perspectives as parents shaped by our children What lessons do we take from them and incorporate into our worldviews Just how much do we learn often despite our own emotionally fraught resistance from what they have seen of life that we perhaps never experienced From these parent portraits emerges the shape of an education composed by young adult children an education built on witness growing intimacy and acceptance Growing Each Other Up is rich in the voices of actual parents telling their own stories of raising children and their children raising them watching that fundamental connection shift over time Parents and children of all ages will recognize themselves in these evocative and moving accounts and look at their own growing up in a revelatory new light

*Childbearing and Careers of Japanese Women Born in the 1960s* Yukiko Senda, 2015-05-11 This book provides the keys to understanding the

trajectory that Japanese society has followed toward its lowest low fertility since the 1980s The characteristics of the life course of women born in the 1960s who were the first cohort to enter that trajectory are explored by using both qualitative and quantitative data analyses Among the many books explaining the decline in fertility this book is unique in four ways First it describes in detail the reality of factors concerning the fertility decline in Japan Second the book uses both qualitative and quantitative methods to introduce the whole picture of how the low fertility trend began in the 1980s and developed in the 1990s and thereafter Third the focus is on a specific birth cohort because their experiences determined the current patterns of family formation such as late marriage and postponed childbirth Fourth the book explores the knife edge balance between work and family conditions especially with regard to childbearing in the context of Japanese management and gender norms After examining the characteristics of demographic and socioeconomic circumstances of postwar Japan in detail it can be seen that the change in family formation first occurred drastically in the 1960s cohort Using both qualitative interview data cumulatively from 150 people and quantitative estimates with official statistics this book shows how individual level choices to balance work and family obligations resulted in a national level fertility decline Another focus of this book is the increasing unintended infertility due to postponed pregnancy a phenomenon that is attracting great social attention because the average age of pregnancy is approaching the biological limit This book is a valuable resource for researchers who are interested in the rapid fertility decline as well as the work life balance and the life course of women in Japanese employment practice and family traditions
