ICT in Agriculture (Updated Edition) World Bank, 2017-06-27 Information and communication technology ICT has always mattered in agriculture Ever since people have grown crops raised livestock and caught fish they have sought information from one another Today ICT represents a tremendous opportunity for rural populations to improve productivity to enhance food and nutrition security to access markets and to find employment opportunities in a revitalized sector ICT has unleashed incredible potential to improve agriculture and it has found a foothold even in poor smallholder farms ICT in Agriculture Updated Edition is the revised version of the popular ICT in Agriculture e Sourcebook first launched in 2011 and designed to support practitioners decision makers and development partners who work at the intersection of ICT and agriculture Our hope is that this updated Sourcebook will be a practical guide to understanding current trends implementing appropriate interventions and evaluating the impact of ICT interventions

in agricultural programs *The Human Face of Water Security* David Devlaeminck, Zafar Adeel, Robert Sandford, 2017-03-09

This volume collects essays from academics and practitioners from a diversity of areas and perspectives in order to discuss water security at various levels and to illuminate the central idea of water security its focus on the individual Beginning with the big picture this book aims to illustrate the depth of the water security crisis and its interconnections with other aspects of societal development It particularly draws a connection to the 2030 Agenda for Sustainable Development and discusses that challenges faced in meeting the 17 sustainability development goals SDG by the year 2030 Moving from international to domestic and community perspectives this book provides a unique analysis of issues and solutions to the water issues we face today in light of the ever looming global changes brought on by climate change Over the past few decades the recognition of our common need for water has increased as policymakers have sought to place more focus on the individual within policy After the recognition of water and sanitation as a fundamental human right by the United Nations General Assembly in 2010 there is increasing recognition of the individual as the building block for the struggle for water security This reality also intersects with adverse impacts of global climate change and the book responds to the broader question will clean and safe water be available where we need it and when we need it in the future CIM Coursebook 08/09 Marketing Information and Research Matthew Housden, 2012-05-31
