Common Spiders of North America Richard A. Bradley, 2019-11-12 Spiders are among the most diverse groups of terrestrial invertebrates yet they are among the least studied and understood This first comprehensive guide to all 68 spider families in North America beautifully illustrates 469 of the most commonly encountered species Group keys enable identification by web type and other observable details and species descriptions include identification tips typical habitat geographic distribution and behavioral notes A concise illustrated introduction to spider biology and anatomy explains spider relationships This book is a critical resource for curious naturalists who want to understand this ubiquitous and ecologically critical component of our biosphere **All You Need to Know About Spiders** Wolfgang Nentwig, Jutta Ansorg, Angelo Bolzern, Holger Frick, Anne-Sarah Ganske, Ambros Hänggi, Christian Kropf, Anna Stäubli, 2022-04-07 All You Need to Know About Spiders Spiders are super predators and devour everything they can overpower To do this they have developed incredibly good catching techniques and with spider silk a tool that makes material technology green with envy The males are usually smaller than the females and in order to have sex they have to come up with a lot to avoid being misunderstood as easy prey Dancing drumming and gifts almost always help Spiders use their venom in very precise doses and since humans are not on their menu they are harmless to us Many people s unnecessary fear of spiders finds cultural roots as early as the Middle Ages Nevertheless spider fear is easily treatable There is no habitat or building without spiders And that s a good thing because spiders have fascinating properties and their world is full of surprises Everything you need to know about them is explained in this book in understandable language by experts for laymen In addition some of the most common spider species in the house and garden are briefly presented with tips for observation The authors This book is authored by eight scientists all of them members of the Association for the Promotion of Spider Research Wolfgang Nentwig Jutta Ansorg
