The Creative Turn Anne M. Harris, 2014-04-16 The conundrum of understanding practising and teaching contemporary creativity is that it wants to be all things to all people Almost all modern lists of creativity creative thinking and how to becoming creative books begin with one premise the creative individual artist is not special rather each of us is creative in a special way and these skills can and must be nurtured Increasingly industry and

education leaders are claiming that creativity is the core skill to take us into a prosperous future signalling the democratisation of creativity as industry Yet centuries of association between aesthetics mastery and creativity are hard to dismantle These days it is increasingly difficult to discuss creativity without reference to business industry and innovation Why do we love to think of creativity in this way and no longer as that rare visitation of the muse or the elite gift of the few This book looks at the possibility that creativity is taking a turn what that turn might be and how it relates to industry education and ultimately cultural role of creativity and aesthetics for the 21st century In proliferating discourses of the commodification of creativity there is one thing all the experts agree on creativity is undefinable possibly unteachable largely unassessable and becoming the most valuable commodity in 21st century markets *The Creative Imperative* Denis Harris,1993-02-01

Emergent Teaching Sam Crowell,David Reid-Marr,2013-01-16 *Emergent Teaching* inspires teachers to teach with more spontaneity and creativity within an educational environment that is highly constrained It demonstrates through descriptive stories creative strategies and provides an intellectual foundation for emergent teaching The authors show how teachers can relate subject matter to students lives and experience They illustrate rituals and processes that help establish a caring learning community Finally

the book applies the theories of complexity and chaos while reaffirming the natural wisdom that teachers possess within themselves The authors have chosen a narrative format that models rather than tells and encourages readers to connect to their own stories and experiences The book is consistent with the theoretical understandings and research in the complexity sciences but takes a narrative approach giving examples and illustrations of ideas through stories myths and parables that act as metaphors and illustrations Key topics and practices embedded in these stories include teaching the whole person strategies for creative teaching new understandings of process meaning centered learning building community in the classroom strengthening the student teacher relationship project based learning using art and nature in teaching embodied learning incorporating story and narrative in teaching rites of passage embracing the unpredictable uncharted spaces in teaching
