Smart Leading and Parenting of Teenage Kids in the Digital Era Dr. Siddhartha Ganguli, 2021-02-10 The physical features of teenage kids change to catch up with their brain circuits ready to take on the pre historic hunter gatherer roles The goal resource mobilisation for survival Resource mobilisation would not only help them survive but also to earn them invisible rewards by way of positive brain chemicals and electricity However the post industrialisation scenario has been quite different Teenagers get groomed via skill or academic development to take on economic roles latest by their mid twenties Such grooming strategy does not always lead to the invisible rewards which they would have earned had they been playing their pre historic hunter gatherer roles Most interestingly today s versatile digital gadgets offer ample scope for earning brain rewards at the cost of sedentary lifestyles The prevailing work and study from home culture has prompted the teenagers becoming dependent on digital technology and getting addicted to the gadgets for earning rewards There is thus a new need for the parents of today s teenagers They must smartly lead themselves and their kids so that digital technology is utilised for their healthy all round development thus preventing any possibility of addiction Divided into two parts the Part 1 of this book throws light on the realities combined with tips and Part 2 introduces the new concept of Brain Tools for the use of the kids and the parents based on the author s ongoing research on Neuro management NM Rethinking Working-Class History Dipesh Chakrabarty, 2018-06-05 Dipesh Chakrabarty combines a history of the jute mill workers of Calcutta with a fresh look at labor history in Marxist scholarship Opposing a reductionist view of culture and consciousness he examines the milieu of the jute mill workers and the way it influenced their capacity for class solidarity and revolutionary action from 1890 to 1940 Around and within this empirical core is built his critique of emancipatory narratives and their relationship to such Marxian categories as capital proletariat or class consciousness The book contributes to currently developing theories that connect Marxist historiography post structuralist thinking and the traditions of hermeneutic analysis Although Chakrabarty deploys Marxian arguments to explain the political practices of the workers he describes he replaces universalizing Marxist

explanations with a sensitive documentary method that stays close to the experience of workers and their European bosses He finds in their relationship many elements of the landlord tenant relationship from the rural past the jute mill workers of the period were preindividualist in consciousness and thus incapable of participating consistently in modern forms of politics and political organization

Rulers, Townsmen and Bazaars C. A. Bayly, 1988-05-19 Widely acclaimed when it first appeared in hard covers Dr Bayly's authoritative study traces the evolution of North Indian towns and merchant communities from the decline of Mughal dominion to the consolidation of mature Victorian empire following the mutiny of 1857 The first section of the book looks at the response of the inhabitants of the Ganges Valley to the Time of Troubles in the eighteenth century The second section shows how the incoming British were themselves constrained to build their new empire on this resilient network of towns rural bazaars and merchant communities and how in turn colonial trade and administration were moulded by indigenous forms of commerce and politics The third section focuses on the social history of the towns under early colonial rule and includes an analysis of the culture and business methods of the Indian merchant family It is based in part on the private records and histories of the business people themselves

The Global World of Indian Merchants, 1750-1947 Claude Markovits, 2000-06-22 Claude Markovits tells the story of two groups of Hindu merchants from the towns of Shikarpur and Hyderabad in the province of Sind Basing his account on previously neglected archival sources the author charts the development of these communities from the pre colonial period through colonial conquest and up to independence describing how they came to control trading networks throughout the world While the book focuses on the trade of goods money and information from Sind to the widely dispersed locations of Kobe Panama Bukhara and Cairo it also throws light on the nature of trading diasporas from South Asia in their interaction with the global economy This is a sophisticated and accessible book written by one of the most distinguished economic historians in the field It will appeal to scholars of South Asia as well as to colonial historians and to students of religion

An Economic History of India Dietmar Rothermund, 2002-11-01 Much has been written on the Indian economy but this is the first major attempt to present India's economic history as a continuous process and to place the development of agriculture industry and currency in a political and historical context
