The Meanings of the Built Environment Federico Bellentani,2021-01-18 This volume analyses the interpretation of the built environment by connecting analytical frames developed in the fields of semiotics and geography It focuses on specific

components of the built environment monuments and memorials as it is easily recognisable that they are erected to promote specific meanings in the public space The volume concentrates on monuments and memorials in post Soviet countries in Eastern Europe with a focus on Estonia Elites in post Soviet countries have often used monuments to shape meanings reflecting the needs of post Soviet culture and society However individuals can interpret monuments in ways that are different from those envisioned by their designers In Estonia the relocation and removal of Soviet monuments and the erection of new ones has often created political divisions and resulted in civil disorder This book examines the potential gap between the designers expectations and the users interpretations of monuments and memorials The main argument is that connecting semiotics and geography can provide an innovative framework to understand how monuments convey meanings and how these are variously interpreted at societal levels *The New Statesman* ,1921 The Millennial Kingdom William A. Hodgson,2019 After being proclaimed dead there is now a major revival of socialism ideology in the West But what does socialism mean This book shows that it is irretrievably associated with common ownership The twentieth century experience of comprehensive national planning with state ownership has been disastrous and in no case has democracy endured within large scale socialism This volume explains why The alternative socialist option of worker owned cooperatives must accept a major role for markets that many socialists reject Further experiments in that direction must be subordinate to higher principles of liberal solidarity involving a mixed market economy with a welfare state
