change usually exceeds people's understanding of how to do so effectively International Handbook of Educational Policy Nina Bascia, Alister Cumming, Amanda Datnow, Kenneth Leithwood, David Livingstone, 2008-05-14 Nina Bascia Alister Cumming Amanda Datnow Kenneth Leithwood and David Livingstone This Handbook presents contemporary and emergent trends in educational policy research in over fifty chapters written by nearly ninety leading researchers from a number of countries It is organized into five broad sections which capture many of the current dominant educational policy foci and at the same time situate current understandings historically in terms of both how they are conceptualized and in terms of past policy practice The chapters themselves are empirically grounded providing illustrations of the conceptual implications contained within them as well as allowing for comparisons across them The serendipity within chapters with respect to jurisdictional particularities and contexts allows readers to consider not only a range of approaches to policy analysis but also the ways in which policies and policy ideas play out in different times and places The sections move from a focus on prevailing policy tendencies through increasingly critical and outsider perspectives on policy They address in turn the contemporary strategic emphasis on large scale reform substantive emphases at several levels on leadership and governance improving teacher quality and conceptualizing learning in various domains around the notion of literacies and concluding finally with a contrasting topic workplace learning which has had less policy attention and thus allows readers to consider both the advantages and disadvantages of learning and teaching under the bright gaze of policy **Second International Handbook of Educational Change** Andy Hargreaves, Ann Lieberman, Michael Fullan, David Hopkins, 2010-08-13 The two volumes of the second edition of the International Handbook of Educational Change comprise a totally new and updated collection of the most critical and cutting edge ideas in educational change Written by the most influential thinkers in the field these volumes cover educational change at both the theoretical and practical levels The updated handbook remains connected to the classical concerns of the field such as educational innovation reform and change management and also offers new insights into educational change that have been brought about by social change and shifting contexts of educational reform Like the first best selling Handbook this one will also undoubtedly become an essential resource for people involved in all spheres of education from classroom teachers teacher leaders and administrators to educational researchers curriculum developers and university professors No other work provides such a wide ranging and comprehensive examination of the field of educational change Change Forces Michael Fullan, 1993 Knowledge of the processes of educational change is said to be the missing ingredient in attempts to bring about educational innovation and reform Whether these efforts involve grass roots innovation or large scale societal reform failure to understand and act on existing knowledge of the change process has accounted for the widespread lack of success in making educational improvements This volume analyzes what is known about successful or productive change processes and identifies corresponding action strategies at the individual school local and state levels Included in this book is a major treatment of the topic of the ethics of

planned change a neglected topic in recent literature especially since strategies for intervening in the change process are receiving more attention This book is intended to be used by teachers in training and in service teacher trainers educational researchers education historians and administrators

Movements of Educational Reform David A. Escobar Arcay, 2016-10-25 In a public education world of vast multiple rapid and often colliding educational reforms *Movements of Educational Reform* provides the novice as well as the veteran educator and administrator a sort of map of educational changes and processes *Movements of Educational Reform* is intended to help the devoted and dedicated education professional and scholar make sense of the successes and the pitfalls of reforms by tracing the landscape through four movements *Movements* promises to ignite and energize your passion for leading educational reform and to bring awareness of system strategies and its structural and cultural aspects many of which continue to challenge theorists practitioners and leaders of educational change

Educational Research: Discourses of Change and Changes of Discourse Paul Smeyers, Marc Depaepe, 2016-05-26 This collection addresses concepts and theories of change contexts and functions of reform discourses and fields of change in educational research It examines a wide variety of issues such as girls education in France educational neuroscience the professionalization in Child Protection and mathematics discourses It pays attention to the pervasiveness of crisis rhetoric in American Education Research to the current university climate and to perspectives for teacher education The volume presents in depth studies that integrate the perspective of history and philosophy of education Educational research has been typically carried out within a discourse of change changing educational practice changing policy or changing the world Sometimes these expectations have been grand as in claims of emancipation sometimes they have been more modest as in research as a support for specific reforms This book explores the answers to such questions as Are these expectations justified How have these discourses of change themselves changed over time What have researchers meant by change and related concepts such as reform improvement innovation progress and the new Does this teleological and hopeful discourse itself reflect a particular historical and national cultural point of view Is it over promising for educational research to claim to solve social problems and are these properly understood as educational problems In doing so it challenges prevailing ideas about the application of philosophy and history of education and demonstrates the relevance of philosophical and historical approaches for the practice and theory of education and for educational research This publication as well as the ones that are mentioned in the preliminary pages of this work were realized by the Research Community FWO Vlaanderen Research Foundation Flanders Belgium Philosophy and History of the Discipline of Education Faces and Spaces of Educational Research
