Bloch, M.D.,2012-05-31 Summary of Healers and Achievers ID No 110473 by Raphael S Bloch M D It is not widely known that throughout history physicians have contributed more than just medical care to civilization Healers and Achievers is a series of biographies of doctors from ancient Egypt to the twenty first century who distinguished themselves with lasting non medical accomplishments They include the architect of the first Egyptian pyramid a pope the Fathers of astronomy geology magnetism and taxonomy American Founding Fathers French Revolutionaries a buccaneer world class athletes a spy and an astronaut Their life stories are told in the context of the eras in which they lived and their fields of medical and non medical expertise are explained in terms comprehensible to both laymen and physicians      **From Moses to Moses** Irving Taylor,2019-03-23 The book is a fictional account of the life and times of Moses ben Maimon the Rambam Moses Maimonides one of the greatest Jewish theologians and philosophers who was also a distinguished physician to the Court of Saladin Born in Cordoba Spain in 1135 he will be remembered for his three brilliant books the Commentary on the Mishna the Mishneh Torah and the Guide of the Perplexed He also wrote ten medical treatises Due to persecution he was forced with his family to travel throughout Spain before moving to Fez in Morocco then Palestine and finally to Egypt where he was appointed as nagid to the Jewish community He died in 1204 and is buried in Tiberias Israel His tombstone reads From Moses to Moses there never arose a man like Moses      *A Vanished World* Christopher Lowney,2012-12-04 In a world troubled by religious strife and division Chris Lowney s vividly written book offers a hopeful historical reminder Muslims Christians and Jews once lived together in Spain creating a centuries long flowering of commerce culture art and architecture In 711 a ragtag army of Muslim North Africans conquered Christian Spain and launched Western Europe s first Islamic state In 1492 Ferdinand and Isabella vanquished Spain s last Muslim kingdom forced Jews to convert or emigrate and dispatched Christopher Columbus to the New World In the years between Spain s Muslims Christians and Jews forged a golden age for each faith and distanced Spain from a Europe mired in the Dark Ages Medieval Spain s pioneering innovations touched every dimension of Western life Spaniards introduced Europeans to paper manufacture and to the Hindu Arabic numerals that supplanted the Roman

numeral system Spain's farmers adopted irrigation technology from the Near East to nurture Europe's first crops of citrus and cotton Spain's religious scholars authored works that still profoundly influence their respective faiths from the masterpiece of the Jewish kabbalah to the meditations of Sufism's greatest master to the eloquent arguments of Maimonides that humans can successfully marry religious faith and reasoned philosophical inquiry No less astonishing than medieval Spain's wide ranging accomplishments was the simple fact its Muslims Christians and Jews often managed to live and work side by side bestowing tolerance and freedom of worship on the religious minorities in their midst A Vanished World chronicles this impossibly panoramic sweep of human history and achievement encompassing both the agony of jihad Crusades and Inquisition and the glory of a multicultural civilization that forever changed the West One gnarled root of today's religious animosities stretches back to medieval Spain but so does a more nourishing root of much modern religious wisdom

Carr,2022-07-18 A deep dive into the history of aquatics that exposes centuries old tensions of race gender and power at the root of many contemporary swimming controversies *Shifting Currents* is an original and comprehensive history of swimming It examines the tension that arose when non swimming northerners met African and Southeast Asian swimmers Using archaeological textual and art historical sources Karen Eva Carr shows how the water simultaneously attracted and repelled these northerners swimming seemed uncannily related to witchcraft and sin Europeans used Africans and Native Americans swimming skills to justify enslaving them but northerners also wanted to claim water's power for themselves They imagined that swimming would bring them health and demonstrate their scientific modernity As Carr reveals this unresolved tension still sexualizes women's swimming and marginalizes Black and Indigenous swimmers today Thus the history of swimming offers a new lens through which to gain a clearer view of race gender and power on a centuries long scale **Biomaterials**

**for Clinical Applications** Sujata K. Bhatia,2010-10-14 *Biomaterials for Clinical Applications* is organized according to the World Health Organization's report of the top 11 causes of death worldwide and lays out opportunities for both biomaterials

scientists and physicians to tackle each of these leading contributors to mortality The introductory chapter discusses the global burden of disease Each of the subsequent eleven chapters focuses on a specific disease process beginning with the leading cause of death worldwide cardiovascular disease The chapters start with describing diseases where clinical needs are most pressing and then envisions how biomaterials can be designed to address these needs instead of the more technologically centered approached favored by most books in the field This book then should appeal to chemical engineers and bioengineers who are designing new biomaterials for drug delivery and vaccine delivery as well as tissue engineering
