matter form and age as does the one which appears here in translation Its peculiar claim to be placed before English students that which distinguishes it from other works on the subject is its purpose of making us see what the ballad of the Middle Ages was really like In other words using Grundtvig s mammoth collection of Danish ballads as illustrations it sifts out chips away rubs off all impurities in the shape of diction metrical items and ideas which had no legitimate claim to existence before the sixteenth century In the residue thus purged and restored we have the genuine unalloyed ballad of the Middle Ages In another respect also this book merits consideration While Professor Steenstrup s studies lay bare the make up of the ballad as a universal form of literature by the very fact that he uses largely the ballads of Denmark for illustrative material he enriches for English readers the study of the subject in that they herein make the acquaintance of a ballad literature which in importance and bulk surpasses that of all other European nations Then too the circumstance that the ballads constitute the only vernacular literature of early Denmark makes them of peculiar interest in a comparative study of literature About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
