The Medieval University Masters Students Learning:

The Medieval University Helene Wieruszowski, 1966

Life in the Medieval University Robert S. Rait, 2012-03-22

First published in 1912 the book presents an account of the various aspects of life in medieval universities Theology as the Science of God Ximian Xu, 2022-06-13 The revival of Calvinism in the nineteenth century Netherlands entailed the neo Calvinist movement With Abraham Kuyper Herman Bavinck became a brand name of neo Calvinism Nonetheless not until the first decade of the twenty first century was scholarly interest in Bavinck s work increasing The conventional two Bavincks model used to read his work for much of the twentieth century argues that some contradictory and irreconcilable themes do exist in Bavinck s system which makes Bavinck a self contradictory thinker This dualistic reading characterised most of Bavinck scholars in the second half of the twentieth century Since James Eglinton s new reading of Bavinck s organic motif the conventional model became untenable and scholars are seeking for a reunited Herman Bavinck Bavinck as a holistic theologian has become the industry standard of Bavinck studies Ximian Xu aims on the one hand to maintain one Bavinck on the other hand and more importantly to fill in a notable gap in Bavinck scholarship that is no single work hitherto has focused on Bavinck s idea of theology as the wetenschap science of God This study demonstrates that the idea of scientific wetenschappelijke theology furnishes the meta paradigm and cardinal model that incorporates the fundamental characteristics and themes of Bavinck s dogmatic system Moreover it argues that Bavinck s scientific theology makes an attempt to engage with the other sciences Given this Bavinck s scientific theology is relevant today That is Bavinck s theological insights can be deployed to advance theology s engagement with the other sciences in contemporary secular universities *Reason, Community and Religious Tradition* Scott Matthews, 2017-10-05 This title was first published in 2001 Reason Community and Religious Tradition examines key questions about the relationship of rationality to its contexts by tracing the early history of the so called ontological argument The book follows Anselm s Proslogion from its origins in the private devotional context of an eleventh century monastery to its reception in the public and adversarial contexts of the friars schools in the thirteenth century Using unpublished manuscript evidence from the Dominican and Franciscan schools at Oxford Paris and Bologna in the thirteenth century Matthews argues that the debate over Anselm s argument embodied the broader religious differences between the Franciscan and Dominican communities By comparing the most famous figures of the period with their lesser known contemporaries Matthews argues that the Friars thought as communities and developed as traditions as they developed their arguments This book will interest anyone concerned with the nature of rationality and its relationship to communities and traditions and what this entails for rational debate across cultural divides In particular it offers a fresh perspective on traditional approaches to the rationality of religion and religious belief **German Refugee Historians and Friedrich Meinecke** Gerhard A. Ritter, 2010-05-10 The book deals with the relationship between Friedrich Meinecke who is often considered to be the leading German historian of the first half of the twentieth century and several of

his students who after the Nazi seizure of power were forced to emigrate because of their Jewish descent or their political views The letters published here to Meinecke from Hans Rothfels Dietrich Gerhard Hajo Holborn Felix Gilbert Hans Rosenberg and others show these scholars deep respect for their old teacher but also their growing distance from his historical interests and methods In a period of struggle between democracy and Nazi dictatorship the letters address the problems of emigration and remigration German Jewish and German American identity and historiography in both Germany and the United States

The Past, Present, and Future of the Business School Edward W. Miles, 2016-09-30 This book examines the criticism that modern business schools face and how these obstacles have evolved throughout history Through historical resource and professional school contexts it sheds light on the operating environment of the business school and the challenges endemic to various university based professional schools exploring the likelihood that potential interventions will result in success or failure Business schools are often accused of inhibiting the practice of business by producing research that is irrelevant and does not address real concerns facing managers This book investigates these accusations by outlining the historical values on which academic institutions are based the resources and funding available today and comparisons to other professional schools which undergo a similar level of scrutiny This extensive coverage will help academics administrators faculty and policy makers with the tools to understand better the ill will towards business schools in today's university structure and ultimately to deliver on the benefits they provide to stakeholders

The New Cambridge Bibliography of English Literature George Watson, Ian Roy Willison, 1974

Connected Stories Mohamed Meouak, Cristina Puente, 2022-06-06 Concepts such as influence imitation emulation transmission or plagiarism are transcendental to cultural history and the subject of universal debate They are not mere labels imposed by modern historiography on ancient texts nor are they the result of a later interpretation of ways of transmitting and teaching but are concepts defined and discussed internally within all cultures since time immemorial which have yielded very diverse results In the case of culture or better Arab Islamic cultures we could analyze and discuss endlessly numerous terms that refer to concepts related to the multiple ways of perceiving the Other receiving his knowledge and producing new knowledge The purpose of this book evolves around these concepts and it aims to become part of a very long tradition of studies on this subject that is essential to the understanding of the processes of reception and creation The authors analyze them in depth through the use of examples that are based on the well known idea that societies in different regions did not remain isolated and indifferent to the literary religious or scientific creations that were developed in other territories and moreover that the flow of ideas did not always occur in only one

direction Contacts both voluntary and involuntary are never incidental or marginal but are rather the true engine of the evolution of knowledge and creation It can also be stated that it has been the awareness of the existence of multidimensional cultural relations which has allowed modern historiography on Arab cultures to evolve and be enriched in recent decades

The Foundations of Modern Science in the Middle Ages Edward Grant,1996-10-28 Contrary to prevailing opinion the roots of modern science were planted in the ancient and medieval worlds long before the Scientific Revolution of the seventeenth century Indeed that revolution would have been inconceivable without the cumulative antecedent efforts of three great civilisations Greek Islamic and Latin With the scientific riches it derived by translation from Greco Islamic sources in the twelfth and thirteenth centuries the Christian Latin civilisation of Western Europe began the last leg of the intellectual journey that culminated in a scientific revolution that transformed the world The factors that produced this unique achievement are found in the way Christianity developed in the West and in the invention of the university in 1200 As this 1997 study shows it is no mere coincidence that the origins of modern science and the modern university occurred simultaneously in Western Europe during the late Middle Ages
