The Metaphysics Of Evolution:

The Metaphysics of Evolution David L. Hull,1989-11-14 This critical collection of essays represents the best of the best when it comes to philosophy of biology Many chapters treat evolution as a biological phenomenon but the author is more generally concerned with science itself Present day science particularly current views on systematics and biological evolution are investigated The aspects of these sciences that are relevant to the general analysis of selection processes are presented and they also serve to exemplify the general characteristics exhibited by science since its inception The Metaphysics of Evolution David L. Hull,1967 The Metaphysics of Evolution Chad Ripperger,2012-08 In his encyclical *Humani Generis* Pope Pius XII stressed the importance of preserving the traditional Catholic approach to philosophy In his work *The Metaphysics of Evolution* Fr Chad Ripperger demonstrates that the theory of evolution is incompatible with the metaphysics of the Catholic tradition **The Metaphysics of Evolution** Thomas WHITTAKER (Philosophical Writer.),1926 **The Metaphysics of Evolution** Thomas Whittaker,1928 The Metaphysics of Evolution Thomas Whittaker,1926 The Metaphysics of Evolution, Etc Thomas WHITTAKER (Philosophical Writer.),1928 *The Metaphysics of Evolution with Other Essays New and Republished by Thomas Whittaker* Thomas Whittaker, **Metaphysics and the Origin of Species** Michael T. Ghiselin,1997-07-10 This sweeping discussion of the philosophy of evolutionary biology is based on the author's revolutionary idea that species are not kinds of organisms but wholes composed of organisms individuals in the broadest ontological sense Although the book's primary focus is on species and speciation it deals with a wide variety of other fundamental units and basic processes and provides a reexamination of the role of classification in biology and other sciences In explaining his individuality thesis Michael T Ghiselin provides extended discussions of such philosophical topics as definition the reality of various kinds of groups and how we classify traits and processes He develops and applies the implications for general biology and other sciences and makes the case that a better understanding of species and of classification in general puts biologists and paleontologists in a much better position to understand nature in general and such processes as extinction in particular *Creative Evolution* Henri Bergson,Arthur Mitchell,1911 *Theological Anthropology at the Beginning of the Third Millennium* Kevin Wagner,Peter John McGregor,M. Isabell Naumann,2022-04-29 *Theological Anthropology at the Beginning of the Third Millennium* is the third volume of the *Theology at the Beginning of the Third Millennium* series Bringing together Catholic and Orthodox scholars of diverse disciplines this work sheds new light on the question what does it mean to be a human person Beginning with an overview on the state of the discipline in our time the book brings theological anthropology into dialogue with epistemology Christology science spiritual theology and pedagogy It explores how human persons who are created in God's image and likeness can come to knowledge of the self and the other such that the individual person can know love and be united to the God and Father of Jesus Christ *Evolution's Purpose* Steve McIntosh,2012-10 Presents the author's view of the scientific story of our evolutionary origins to show how

evolution's progressive generation of emergent value reveals a larger purpose within the process. He demonstrates how this purpose can be felt within each of us as the evolutionary impulse to make things better to grow toward ever widening realizations of beauty, truth, and goodness. Provided by publisher *Charles S. Peirce* Karl-Otto Apel, 2010-12-08. Reflecting a revival of Peirce studies and the rediscovery of the pragmatist tradition in American philosophical thinking, this study articulates a contemporary and relevant interpretation that may offer a challenge to neo-pragmatists. How Kant Matters For Biology Andrew Jones, 2023-03-15. Kant denied biology the status of proper science yet his account of the organism has received much attention from both philosophical and historical perspectives. This book argues that Kant's influence on biology in the British Isles is in part due to misunderstandings of his philosophy. Highlighting these misunderstandings exposes how Kant influenced various aspects of scientific method despite the underlying incompatibility between transcendental idealism and scientific naturalism. This book raises criticism against scientific naturalism as it demonstrates how some concepts that are central to biology have been historically justified in ways that are incompatible with naturalism. Approaching current issues in philosophy of biology from a Kantian orientation offers new perspectives to debates including our knowledge of laws of nature, the unity of science, and our understanding of organisms. Moreover, new avenues are forged to demonstrate the benefits of adopting Kant-inspired approaches to issues in contemporary philosophy of science.

Aristotle and the Ontology of St. Bonaventure Franziska van Buren, 2023-03-20. Contemporary scholarship on Bonaventure has characterized him as the Neo-platonic foil to the Aristotelianism of his day. The present book, however, shows a Bonaventure who is highly enthusiastic about utilizing the philosophy of Aristotle and who centers much of his philosophical project around interpreting and understanding the texts of Aristotle. Two goals are central to this book. The first is to shed light on Bonaventure's greatly understudied ontology and theory of forms, demonstrating how his philosophical system is an important and unique alternative to other medieval Aristotelian systems. The second is to establish more broadly how Bonaventure's interpretation of Aristotle is a resource which should be mined for contemporary efforts in thinking about and reading Aristotle himself. **Riddles of the Sphinx** Ferdinand Canning Scott Schiller, 1910. The Implications of Evolution for Metaphysics David H. Gordon, 2023-08-22. After the nineteenth-century turn from idealism when idealist philosophies were largely abandoned for materialist ones, many analytic philosophers have adhered to scientific naturalism as the new orthodoxy, largely due to the success of scientific advancements. The New Atheists such as Daniel Dennett and Richard Dawkins claim it is Darwin who deserves much of the credit for repudiating the traditional Mind-first world view. In The Implications of Evolution for Metaphysics, Theism, Idealism, and Naturalism, David H. Gordon explores questions such as: Is it true that evolution is incompatible with theism and necessarily results in naturalism? Is it possible as naturalism maintains that everything can be reduced to physical processes? Or are there too many recalcitrant phenomena that defy reduction? Can the epistemological conditions for metaphysical knowledge be met? If the underdetermination of theory allows for multiple

metaphysical theories to cover the same phenomena with each offering an epistemically adequate explanation then neither naturalism nor theism can be asserted to be objectively true Nevertheless it is possible to favor one over the other based on overall coherence and explanatory power **Maximus the Confessor and Evolutionary Biology** Andrew P.

Jackson,2024-11-04 This book brings Maximus the Confessor's logoi doctrine into dialogue with modern day evolutionary biology It explores the extent to which the logoi as described by Maximus exhibit features that are concordant with evolution before going on to consider more discordant aspects that cannot be ignored The author addresses the curious resonance between the logoi and evolution in a systematic way through a close reading of primary textual material allied with a deep understanding of both the classical Darwinian and extended evolutionary syntheses The study joins with other Maximian interpreters in attesting to the incarnational and theophanic nature of the logoi but seeks to extend this distinctively Eastern Christo cosmology into the problematic territory of biological evolution a territory historically dominated by Western scholarship The book will be of interest to scholars of religion and science as well as Patristics and the Eastern Orthodox theological traditions The Passion of Love in the Summa Theologiae of Thomas Aquinas Daniel Joseph Gordon,2023-05-19

This book is an introduction to three questions on love according to St Thomas Aquinas Summa Theologiae I II qq 26 28 These three questions reflect on the nature of love q 26 the causes of love q 27 and the effects of love q 28 It is thus an introduction to the entire phenomenon of love both as a bodily passion and an act of the will The purpose is to present the Thomistic and broadly scholastic account of human and divine love from a philosophical and theological perspective It aims to be a theological and philosophical study of the topic useful both for a graduate professional audience as part of an undergraduate or graduate course and perhaps for the educated reader The thesis of the book is that contrary to contemporary conceptions not all loves are created equal Some loves perfect us and some loves corrupt us The worth of a love depends on its object and end St Thomas thus presents an objective and teleological account of human and divine love that is of philosophical and theological interest The method is broadly exegetical presenting a careful reading of the text and supplying the philosophical and theological background which the text of Aquinas assumes The scope of the work is limited to three questions ST I II qq 26 28 References to interpretative disputes of Aquinas and references to further resources in the secondary literature will be mostly limited to the footnotes making the body of the text accessible to more readers

Paradise Mislaid Jeffrey Burton Russell,2006 In this stimulating book Russell sets out to rehabilitate heaven by forcefully attacking a series of ideas that have made belief in heaven not to mention belief in God increasingly difficult for modern people
