*China's One-Child Policy and Multiple Caregiving* Esther Goh, 2011-05-18 This book explores the effects of China s one child policy on modern Chinese families It is widely thought that such a policy has contributed to the creation of a generation of little emperors or little suns spoiled by their parents and by the grandparents who have been recruited to care for the child while the middle generation goes off to work Investigating what life is really like with three generations in close quarters and using urban Xiamen as a backdrop the author shows how viewing the grandparents and parents as engaged in an intergenerational parenting coalition allows for a more dynamic understanding of both the pleasures and conflicts within adult relationships particularly when they are centred around raising a child Based on both survey data and ethnographic fieldwork the book also makes it clear that parenting is only half the story The children of course are the other Moreover

these children not only have agency but constantly put it to work as a way to displace the burden of expectations and steady attention that comes with being an only child in contemporary urban China These lone tacticians as Goh calls them are not having an easy time and not all are living like spoiled children The reality is far more challenging for all three generations The book will be of interest to those in family studies education psychology sociology Asian Studies and social work

Creative Compounding in English Réka Benczes,2006-01-01 Metaphorical and metonymical compounds novel and lexicalised ones alike are remarkably abundant in language Yet how can we be sure that when using an expression such as land fishing in order to speak about metal detecting the referent will be immediately understood even if the hearer had not been previously familiar with the compound Accordingly this book sets out to explore whether the semantics of metaphorical and metonymical noun noun combinations can be systematically analysed within a theoretical framework where systematicity pertains to regularities in both the cognitive processes and the products of these processes that is the compounds themselves Backed up by recent psycholinguistic evidence the book convincingly demonstrates that such compounds are not semantically opaque as it has been formerly claimed they can in fact be analysed and accounted for within a cognitive linguistic framework by the combined application of metaphor metonymy blending profile determinacy and schema theory and represent the creative and associative word formation processes that we regularly apply in everyday language

Changing Families, Changing Responsibilities Marilyn Coleman, Lawrence Ganong,1999-05-01 This book explores the topic of family obligations following

changes in family structure caused by divorce and remarriage Family obligations are commonly defined as the rights and duties that accompany family roles They have been described as the glue that connects generations as well as the oughts and shoulds that surround individual family relationships This book is primarily concerned with normative beliefs about what family members should do for each other It differs from previous accounts of family obligation norms because it specifically focuses on family responsibilities after divorce and remarriage two events that affect an increasing number of families today The authors draw extensively upon the findings of 13 studies of normative beliefs regarding post divorce intergenerational family obligations This book fills a gap in the present literature concerning family obligation It addresses the weaknesses of prior research by focusing on family transitions and by presenting data from studies that employ contextual methods The content will provide guidance to policymakers and helping professionals who work with families and the unique focus and procedures of the studies are likely to set the standard for future assessments of normative beliefs about family obligations
