## **The Mill On The Floss Longman Study Texts:**

**Children's Literature** K. Lesnik-Oberstein, 2004-08-31 Children's Literature New Approaches is a guide for graduate and upper level undergraduate students of children's literature. It is structured through critics reading individual texts to bring out wider issues that are current in the field. Includes chronology of key events and publications, a selective guide to further reading, and a list of Web-based resources. *A Register of Admissions to King's College, Cambridge, 1945-1982* King's College (University of Cambridge), King's College (University of Cambridge). King's College Association, 1989

**Creating Texts** Walter Nash, David Stacey, 2014-09-25 Creating Texts emphasises a practical approach to composition and enables students to understand what is involved in the creation of a text and to learn from the practice of other writers. Extensively rewritten and updated from Walter Nash's earlier volume *Designs in Prose*, attention is paid to the general theory of composition in both traditional and original terms so that students are made familiar with the basic resources of composition in grammar and in the lexicon. The essence of every chapter is the discussion of examples of text, sometimes devised by the authors but more often drawn from the work of authors writing in diverse styles of English. This practical approach is most evident in the final section of the book where detailed suggestions for projects and exercises reinforce the connection between theory and practice and encourage students to develop their creative sense and to adapt their style of writing to fit the particular audience and context. In addition, this section is cross-referenced to the main text to allow students to consult easily the relevant chapter.

**The Lives of Machines** Tamara S. Ketabgian, 2011-03-22 *The Lives of Machines* is intelligent, closely argued, and persuasive, and puts forth a contention that will unsettle the current consensus about Victorian attitudes toward the machine. Jay Clayton, Vanderbilt University. Today we commonly describe ourselves as machines that let off steam or feel under pressure. *The Lives of Machines* investigates how Victorian technoculture came to shape this language of human emotion so pervasively and irrevocably, and argues that nothing is more intensely human and affecting than the nonhuman. Tamara Ketabgian explores the emergence of a modern and more mechanical view of human nature in Victorian literature and culture. Treating British literature from the 1830s to the 1870s, this study examines forms of feeling and community that combine the vital and the mechanical, the human and the nonhuman in surprisingly hybrid and productive alliances. Challenging accounts of industrial alienation that still persist, the author defines mechanical character and feeling not as erasures or negations of self but as robust and nuanced entities in their own right. *The Lives of Machines* thus offers an alternate cultural history that traces sympathies between humans, animals, and machines in novels and nonfiction about factory work as well as in other unexpected literary sites and genres, whether domestic, scientific, musical, or philosophical. Ketabgian historicizes a model of affect and community that continues to inform recent theories of technology, psychology, and the posthuman. *The Lives of Machines* will be of interest to students of British literature and history, history of science, and of technology, novel studies, psychoanalysis, and postmodern cultural studies. **The English Catalogue of Books [annual]** ,1892 Vols for 1898 1968 include a directory of publishers *George Eliot and Nineteenth-Century Psychology* Michael Davis,2016-12-05 In his study of Eliot as a psychological novelist Michael Davis examines Eliot s writings in the context of a large volume of nineteenth century scientific writing about the mind Eliot Davis argues manipulated scientific language in often subversive ways to propose a vision of mind as both fundamentally connected to the external world and radically isolated from and independent of that world In showing the alignments between Eliot s work and the formulations of such key thinkers as Herbert Spencer Charles Darwin T H Huxley and G H Lewes Davis reveals how Eliot responds both creatively and critically to contemporary theories of mind as she explores such fundamental issues as the mind body relationship the mind in evolutionary theory the significance of reason and emotion and consciousness Davis also points to important parallels between Eliot s work and new and future developments in psychology particularly in the work of William James In *Middlemarch* for example Eliot demonstrates more clearly than either Lewes or James the way the conscious self is shaped by language Davis concludes by showing that the complexity of mind which Eliot expresses through her imaginative use of scientific language takes on a potentially theological significance His book suggests a new trajectory for scholars exploring George Eliot s representations of the self in the context of science society and religious faith

**Critical Practice** Catherine Belsey,2003-12-16 What is poststructuralist theory and what difference does it make to literary criticism Where do we find the meaning of the text in the author s head in the reader s Or do we instead make meaning in the practice of reading itself If so what part do our own values play in the process of interpretation And what is the role of the text Catherine Belsey considers these and other questions concerning the relations between human beings and language readers and texts writing and cultural politics Assuming no prior knowledge of poststructuralism *Critical Practice* guides the reader confidently through the maze of contemporary theory It simply and lucidly explains the views of key figures such as Louis Althusser Roland Barthes Jacques Lacan and Jacques Derrida and shows their theories at work in readings of familiar literary texts *Critical Practice* argues that theory matters because it makes a difference to what we do when we read opening up new possibilities for literary and cultural analysis Poststructuralism in conjunction with psychoanalysis and deconstruction makes radical change to the way we read both a priority and a possibility With a new chapter updated guidance on further reading and revisions throughout this second edition of *Critical Practice* is the ideal guide to the present and future of literary studies **The Routledge Research Companion to Nineteenth-Century British Literature and Science** John Holmes,Sharon Ruston,2017-05-18 Tracing the continuities and trends in the complex relationship between literature and science in the long nineteenth century this companion provides scholars with a comprehensive authoritative

and up to date foundation for research in this field In intellectual material and social terms the transformation undergone by Western culture over the period was unprecedented Many of these changes were grounded in the growth of science Yet science was not a cultural monolith then any more than it is now and its development was shaped by competing world views To cover the full range of literary engagements with science in the nineteenth century this companion consists of twenty seven chapters by experts in the field which explore crucial social and intellectual contexts for the interactions between literature and science how science affected different genres of writing and the importance of individual scientific disciplines and concepts within literary culture Each chapter has its own extensive bibliography The volume as a whole is rounded out with a synoptic introduction by the editors and an afterword by the eminent historian of nineteenth century science Bernard Lightman

**The Mind of the Child** Sally Shuttleworth,2010-07-08 In the 1840s novelists such as Bront and Dickens began to explore the inner world of the child Simultaneously the first psychiatric studies of childhood were appearing Moving between literature and science this book explores issues such as childhood fears imaginary lands sexuality and the relation of the child to animal life

Parents and Children in the Mid-Victorian Novel Madeleine Wood,2020-10-30 This book produces an original argument about the emergence of trauma in the nineteenth century through new readings of Dickens Emily and Charlotte Bronte Collins Gaskell and Elliot Madeleine Wood argues that the mid Victorian novels present their protagonists in a state of damage provoked and defined by the conditions of the mid century family the cross generational relationship is presented as formative and traumatising By presenting family relationships as decisive for our psychological state as well as our social identity the Victorian authors pushed beyond the contemporary scientific models available to them Madeleine Wood analyses the literary and historical conditions of the mid century period that led to this new literary emphasis and which paved the way for the emergence of psychoanalysis in Vienna at the fin de si cle Analysing a series of theoretical texts Madeleine Wood shows that psychoanalysis shares the mid Victorian concern with the unequal relationship between adult and child focusing her reading through Freud s early writings and Jean Laplanche s general theory of seduction

**Reference Catalogue of Current Literature** ,1906 The Brontës and the Idea of the Human Alexandra Lewis,2019-05-16 Investigates the idea of the human within Bront sisters work offering new insight on their writing and cultural contexts

**A Companion to George Eliot** Amanda Anderson,Harry E. Shaw,2016-01-19 This collection offers students and scholars of Eliot s work a timely critical reappraisal of her corpus including her poetry and non fiction reflecting the latest developments in literary criticism It features innovative analysis exploring the relation between Eliot s Victorian intellectual sensibilities and those of our own era A comprehensive collection of essays written by leading Eliot scholars Offers a contemporary reappraisals of Eliot s work reflecting a broad range of current academic interests including religion science ethics politics and aesthetics Reflects the very latest developments in literary scholarship Traces the revealing links between Eliot s Victorian intellectual concerns and those of today

George Eliot and Schiller Deborah Guth,2016-07-22

Though Friedrich Schiller enjoyed prominent literary standing and great popularity in nineteenth century literary England his influence has been largely neglected in recent scholarship on the period First published in 2003 this book explores the substantial evidence of the importance of the playwright and philosopher s thought to George Eliot s novelistic art It demonstrates the relationship between Schiller s work and Eliot s plotting of moral vision the tensions in her work between realism and idealism and her aesthetics It also contends that the immense continental underpinnings of Eliot s writing should lead us to resituate her beyond national boundaries and view her as a major European as well as English writer This book will be of interest to those studying 19th Century English and European literature

**The Novel and Europe** Andrew Hammond,2016-10-05 This book examines the ways in which fiction has addressed the continent since the Second World War Drawing on novelists from Europe and elsewhere the volume analyzes the literary response to seven dominant concerns ideas of Europe conflict borders empire unification migration and marginalization offering a ground breaking study of how modern and contemporary writers have participated in the European debate The sixteen essays view the chosen writers not as representatives of national literatures but as participants in transcontinental discussion that has occurred across borders cultures and languages In doing so the contributors raise questions about the forms of power operating across and radiating from Europe challenging both the institutionalized divisions of the Cold War and the triumphalist narrative of continental unity currently being written in Brussels

**Apples and Orchards since the Eighteenth Century** Joanna Crosby,2023-11-16 Showing how the history of the apple goes far beyond the orchard and into the social cultural and technological developments of Britain and the USA this book takes an interdisciplinary approach to reveal the importance of the apple as a symbol of both tradition and innovation From the 18th century in Britain technology innovation in fruit production and orchard management resulted in new varieties of apples being cultivated and consumed while the orchard became a representation of stability In America orchards were contested spaces as planting seedling apple trees allowed settlers to lay a claim to land In this book Joanna Crosby explores how apples and orchards have reflected the social economic and cultural landscape of their times From the association between English apples and English virtues of plain speaking hard work and resultant high quality produce to practices of wassailing highlighting the effects of urbanisation and the decline of country ways and customs Apples and Orchards from the Eighteenth Century shows how this everyday fruit provides rich insights into a time of significant social change
