The Philosophers Gaze Modernity In The Shadows Of Enlightenment:

The Philosopher's Gaze David Michael Levin, 2023-04-28 David Michael Levin's ongoing exploration of the moral character and enlightenment potential of vision takes a new direction in *The Philosopher's Gaze*. Levin examines texts by Descartes, Husserl, Wittgenstein, Nietzsche, Heidegger, Benjamin, Merleau-Ponty, and Levinas using our culturally dominant mode of perception and the philosophical discourse it has generated as the site for his critical reflections on the moral culture in which we are living. In Levin's view, all these philosophers attempted to understand one way or another the distinctive pathologies of the modern age. But every one also attempted to envision, if only through the faintest of traces, traces of mutual recognition, traces of another way of looking and seeing the prospects for a radically different lifeworld. The world, after all, inevitably reflects back to us the character, the reach and range of our vision. In these provocative essays, the author draws on the language of hermeneutical phenomenology and at the same time refines phenomenology itself as a method of working with our experience and thinking critically about the culture in which we live. The ^ACivil War Dead and American Modernity Ian Finseth, 2018-01-02 *The Civil War Dead and American Modernity* offers a fundamental rethinking of the cultural importance of the American Civil War dead.

Picturing Space, Displacing Bodies Lyle Massey, 2007 In *Picturing Space Displacing Bodies*, Lyle Massey argues that we can only learn how and why certain kinds of spatial representation prevailed over others by carefully considering how Renaissance artists and theorists interpreted perspective. Combining detailed historical studies with broad theoretical and philosophical investigations, this book challenges basic assumptions about the way early modern artists and theorists represented their relationship to the visible world and how they understood these representations. By analyzing technical feats such as anamorphosis, the perspectival distortion of an object to make it viewable only from a certain angle, drawing machines, and printed diagrams, each chapter highlights the moments when perspective theorists failed to unite a singular ideal viewpoint with the artist's or viewer's viewpoint or were unsuccessful at conjoining fictive and lived space. Showing how these failures were subsequently incorporated rather than rejected by perspective theorists, the book presents an important reassessment of the standard view of Renaissance perspective. While many scholars have maintained that perspective rationalized the relationships among optics, space, and painting, *Picturing Space Displacing Bodies* asserts instead that Renaissance and early modern theorists often revealed a disjunction between geometrical ideals and practical applications. In some cases, they not only identified but also exploited these discrepancies. This discussion of perspective shows that the painter's geometry did not always conform to the explicitly rational Cartesian formula that so many have assumed, nor did it historically unfold according to a standard account of scientific development.

Vision and Blindness in Film Dago Schelin, 2019-02-13 In order to understand vision, we have to

look into concepts of blindness both diegetically in typical film characters and in the representation of sight or lack thereof A critical historical investigation into theories of vision shows that the way we understand visibility today scientifically and culturally is very different from pre modern notions and practices In this book Dago Schelin questions categories such as active and passive vision tactile visibility as well as blind vision and discusses them alongside a variety of movies that deal with vision and blindness Is there a connection between the filmmaker s gaze and an older pre Keplerian ontology of vision What is the role of sound in vision Are our eyes mere camcorders or might they be projectors These and other questions comprise the fascinating journey on which this study embarks

I See You Ellen Grabiner,2014-01-10 In the blockbuster

film Avatar science fiction and the technological prowess of director James Cameron meet in a heady concoction that while visually ravishing could easily be dismissed as eye candy While critics most frequently acclaimed its breakthrough 3 D technology close scrutiny of the film raises provocative questions about the relationship between mind and body appearance and reality It brings into focus the relationships of humans to their technology their planet and each other and highlights the nature and potential of film itself This work explores the theoretical and philosophical issues brought to bear in Avatar exploring the spaces between human and machine technology and nature chick flick and action adventure and old fashioned storytelling and cutting edge technology Central to the book s analysis is an examination of the extent to which Avatar melds the seer and the seen illuminating an alternative visual paradigm Instructors considering this book for use in a course may request an examination copy here

Redeeming Words David Michael Kleinberg-Levin,2013-10-21 In this probing look at Alfred D blin s 1929 novel Berlin Alexanderplatz and the stories of W G Sebald Redeeming Words offers a philosophical meditation on the power of language in literature David Kleinberg Levin draws on the critical theory of Benjamin and Adorno the idealism and romanticism of Kant Hegel H lderlin Novalis and Schelling and the nineteenth and twentieth century thought of Nietzsche Heidegger and Derrida He shows how D blin and Sebald writers with radically different styles working in different historical moments have in common a struggle against forces of negativity and an aim to bring about in response a certain redemption of language Kleinberg Levin considers the fast paced staccato and hard cut sentences of D blin and the ghostly languorous and melancholy prose fiction of Sebald to articulate how both writers use language in an attempt to recover and convey this utopian promise of happiness for life in a time of mourning

Trust in the World Josef Fröchtel, 2017-09-20 This book examines the theory originally raised in Gilles Deleuze's philosophy of film that cinema has the power to restore our trust in the world Fröchtel demonstrates that cinema does this in three main ways by restoring our belief in the absurd in the body and in a sceptical abstention from judging and acting Cinema shares this ability with other arts but what sets it apart in particular is that it evokes Modernity and its principle of subjectivity This book further develops the idea of trust and cinema by synthesizing the philosophies of complementary thinkers such as Kant Nancy Agamben Benjamin and Rancière It concludes with examination of Cavell's solution to the problem of scepticism and a synthesis of Kantian aesthetic theory with Cavellian pragmatism Originally published in German under the title *Vertrauen in die Welt* this English language translation features a new introduction that situates Fröchtel's work within contemporary analytical philosophy of film It will be of interest to scholars working in Continental aesthetics philosophy of film and film theory
