The Physics Of Christmas From The Aerodynamics Of Reindeer To The Thermodynamics Of Turkey:

The Physics of Christmas Roger Highfield, 2025-04-08 Why might Rudolph's nose have been red? Why do we actually give Christmas gifts? Why has smell become an important component in the Christmas shopping experience? Roger Highfield, science editor of London's Daily Telegraph and co-author of the highly acclaimed *The Arrow of Time*, has taken a long overdue look at our most cherished holiday from the rigorous but highly entertaining viewpoint of a scientist. What are the thermodynamics involved in cooking a turkey? What are the likely celestial candidates for the Star of Bethlehem? Is the concept of a virgin birth scientifically feasible? What happens to us physically when we overindulge in alcohol? How does snow form? Why are we always depressed after Christmas? How does Santa manage to deliver all those presents in one night? He has in fact little over two ten thousandths of a second to get between each of the 842 million households he must visit. *The Physics of Christmas* is that rare science book that manages to be as delightful as it is informative. **How Much Does Your Head Weigh?** Marg Meikle, 2010-08 Former CBC Radio host Marg Meikle's three humorous but fact-filled books *You Asked for It*, *Funny You Should Ask*, and *Ask Me Anything* are now available in an omnibus bindup at a sensational price. The award-winning books are included in their entirety along with over 140 illustrations. Here are the answers to all the questions that hundreds of kids asked her; questions that would likely stump most adults. Half the fun of reading the answers is the off on a tangent with more facts. Approach that Marg is famous for using. Among the hundreds of trivia questions answered are: Why is 13 unlucky? Why don't tattoos come off? Do twins have the same DNA? Why is it called a funny bone? What did we use before toilet paper? Do animals dream? Why can't you tickle yourself? Over 300 wacky but informative answers fill the pages, grouped under themes of Customs, Holidays, Superstitions, Food, The Opposite Sex, and more. **The Daily Reader** Fred White, 2009-10-13 Let Great Reading Fuel Your Writing. Great writers read voraciously and across many topics and genres. They read to learn, to research, to study the style of others, and to improve their own work. They read because they love the written word. But becoming well-read takes time, dedication, and patience. The thought can be daunting, especially when you're eager to get to your own writing. Fred White, author of *The Daily Writer*, helps you sort through the plethora of reading material available by providing you with 366 engaging excerpts from ancient poetry to modern science, on topics from allegory to food to writer's block. Each thoughtfully chosen excerpt is followed by a brief reflection and a prompt that allows you to integrate elements from each piece into your own writing. *The Daily Reader* makes broad reading accessible, invigorates your thirst for the written word, and equips you to put the power of the pros behind your writing.

SuperCooperators Martin Nowak, Roger Highfield, 2012-03-27 Looks at the importance of cooperation in human beings and in nature, arguing that this social tool is as important an aspect of evolution as mutation and natural selection. **The Laws of Thermodynamics** Jennifer Viegas, 2006 Presents a collection of essays that discuss the role of the sun in the solar system and covers such topics as solar winds and storms, magnetism, sunspots, ultraviolet radiation, and solar energy. **Can**

Reindeer Fly? Roger Highfield, 2015-09-24 How does snow form Why are we always depressed after Christmas How does Santa manage to deliver all those presents in one night He has in fact little over two ten thousandths of a second to get between each of the 842 million households he must visit This book contains information on how drugs might make us see flying reindeer how pollution is affecting the shape of Christmas trees and the intriguing correlation between the length of our Christmas card list and brain size **Next: New Generation Of Graphic Design** Jesse Marinoff Reyes, 2000-06-29 Young designers and students are hungry to know what their peers are doing in today's graphic design field This book showcases many of the best designers in their 20s and 30s who are producing innovative eye catching work with posters book covers and jackets CD packaging and other music media Brief interviews with each artist illuminate the ideas behind their work Next also helps jump start the creative process by presenting fresh edgy concepts that designers can't see anywhere else and it's a wonderful tool for older designers enabling them to get a handle on the visual language understood by younger consumers Selling points No other survey book focuses on designers in their 20s and 30s Includes an introduction by the dean of underground designers award winner Art Chantry **Forthcoming Books** Rose Arny, 1999
Talking Book Topics, 2001 Includes audio versions and annual title author index *Cassette Books* Library of Congress.
