

Painting Stormy Weather

David Curtis
**RAINY MORNING ON THE
RIALTO, VENICE**

Here the artist has made use of glistening highlights reflected on the wet ground, the rooftops and the awnings to recreate the atmosphere of a sudden rain shower.

The sheer power and drama of a storm make it one of the most challenging weather conditions for an artist to tackle. Though it is possible to recreate a stormy scene from photographs (this was the case with our project painting), there is no substitute for actually getting out there

among the elements. Observing the weather at night has a particular appeal, as you can see how the painting of the sky and clouds is the most important part of the scene. Your palette will come through in the way you paint the clouds, and the way you use the brush to create the stormy atmosphere.

Painting methods

Storms can come and go in a matter of minutes, so you have to learn to work quickly and intuitively, allowing the paint to suggest the power and drama of nature. To create swirling clouds by applying long, wavy strokes, leaving these marks wet to mix in layers. Try tilting the board at an angle to help colour drift down towards the bottom, giving an effect of rolls of rain in the distance. The painting rapidly, wet-on-wet, and using a wet-on-wet technique in places, and the response to eliminate every imperfection, however blotchy and blotchy can be wonderfully effective of storm clouds and swirling rain.

By using a dry brush and dragging the colour lightly over a rough surface, you can create lively, broken strokes that convey the impression of rain falling on roofs of old buildings across the sky. Use sweeping, single strokes that reflect the motion, paint the most of clouds and water and encourage the eye to move freely around the picture.
