The Political Landscape Constellations Of Authority In Early Complex Polities:

The Political Landscape Adam T Smith, 2003-10-07 This highly original and challenging book defies every easy form of classification. Ostensibly about early polities, its penetrating and erudite asides extend with equal facility into contemporary politics and the symmetrical deficiencies of modernism and postmodernism. To my knowledge, imaginative reflections of spatial representations have never previously found their way into the theoretical base of what has been thought of as an essentially materialistic archaeological science. It is a pleasure and a discovery to see the permanent and rightful place Adam Smith has now fashioned for them. Robert McC Adams, Secretary Emeritus, The Smithsonian Institution. If social theory in cultural anthropology was transformed in the last decades by a linguistic turn, research by archaeologists into the development and practices of early states now seems to be undergoing a geographic turn. Adam Smith's book, although drawing from modern currents in geography, anthropology, sociology, and political philosophy, brings original archaeological contributions to social theory by examining the making and re-making of landscapes in early complex polities, especially in Mesopotamian, Urartian, and Maya states. Smith observes these and other early states as political landscapes in which monuments come to constitute authority and shape memories. Smith's book represents a comprehensive turn from metahistorical reifications of the state to investigations of how the content of social roles was determined through the production of landscapes. The landscape of archaeology will be changed decisively by this book. Norman Yoffee, Professor, Dept of Near Eastern Studies and Dept of Anthropology, University of Michigan. This book emerges as both a remarkable scholarly achievement and something of a manifesto for contemporary political thinking and engagement. Susan E Alcock, author of *Archaeologies of the Greek Past: Landscape, Monuments, and Memories*. *Political Landscapes of Capital Cities* Jessica Joyce Christie, Jelena Bogdanovic, Eulogio Guzmán, 2016-08-08 *Political Landscapes of Capital Cities* investigates the processes of transformation of the natural landscape into the culturally constructed and ideologically defined political environments of capital cities. In this spatially inclusive, socially dynamic interpretation, an interdisciplinary group of authors, including archaeologists, anthropologists, and art historians, uses the methodology put forth in Adam T Smith's *The Political Landscape: Constellations of Authority in Early Complex Polities* to expose the intimate associations between human-made environments and the natural landscape that accommodate the sociopolitical needs of governmental authority. *Political Landscapes of Capital Cities* blends the historical, political, and cultural narratives of capital cities such as Bangkok, Cusco, Rome, and Tehran with a careful visual analysis hinging on the methodological tools of not only architectural and urban design but also cultural historiographical and anthropological studies. The collection provides further ways to conceive of how processes of urbanization, monumentalization, ritualization, naturalization, and unification affected capitals differently without losing grasp of local distinctive architectural and spatial features. The essays also articulate the many complex political and ideological agendas of a diverse set of sovereign entities that planned, constructed, displayed, and performed their societal

ideals in the spaces of their capitals ultimately confirming that political authority is profoundly spatial Contributors Jelena Bogdanovi Jessica Joyce Christie Talinn Grigor Eulogio Guzm n Gregor Kalas Stephanie Pilat Melody Rod ari Anne Toxey Alexei Vranich

The Political Machine Adam T. Smith, 2020-08-04 The Political Machine investigates the essential role that material culture plays in the practices and maintenance of political sovereignty Through an archaeological exploration of the Bronze Age Caucasus Adam Smith demonstrates that beyond assemblies of people polities are just as importantly assemblages of things from ballots and bullets to crowns regalia and licenses Smith looks at the ways that these assemblages help to forge cohesive publics separate sovereigns from a wider social mass and formalize governance and he considers how these developments continue to shape politics today Smith shows that the formation of polities is as much about the process of manufacturing assemblages as it is about disciplining subjects and that these material objects or machines sustain communities orders and institutions The sensibilities senses and sentiments connecting people to things enabled political authority during the Bronze Age and fortify political power even in the contemporary world Smith provides a detailed account of the transformation of communities in the Caucasus from small scale early Bronze Age villages committed to egalitarianism to Late Bronze Age polities predicated on radical inequality organized violence and a centralized apparatus of rule From Bronze Age traditions of mortuary ritual and divination to current controversies over flag pins and Predator drones The Political Machine sheds new light on how material goods authorize and defend political order

The Archaeology of Imperial Landscapes Bleda S. Düring, Tessa D. Stek, 2018-03-29 This book examines the poorly understood transformations in rural landscapes and societies that formed the backbone of ancient empires

The Archaeology of Power and Politics in Eurasia Charles W. Hartley, G. Baki Yazicioğlu, Adam T. Smith, 2012-11-19 For thousands of years the geography of Eurasia has facilitated travel conquest and colonization by various groups from the Huns in ancient times to the Union of Soviet Socialist Republics in the past century This book brings together archaeological investigations of Eurasian regimes and revolutions ranging from the Bronze Age to the modern day from Eastern Europe and the Caucasus in the west to the Mongolian steppe and the Korean Peninsula in the east The authors examine a wide ranging series of archaeological studies in order to better understand the role of politics in the history and prehistory of the region This book re-evaluates the significance of power authority and ideology in the emergence and transformation of ancient and modern societies in this vast continent

The Archaeology of Maritime Landscapes Ben Ford, 2011-05-21 Maritime cultural landscapes are collections of submerged archaeological sites or combinations of terrestrial and submerged sites that reflect the relationship between humans and the water These landscapes can range in size from a single beach to an entire coastline and can include areas of terrestrial sites now inundated as well as underwater sites that are now desiccated However what binds all of these sites together is the premise that each aspect of the landscape cultural political environmental technological and physical is interrelated and can not be understood without reference to the others In this maritime cultural landscape approach

individual sites are treated as features within the larger landscape and the interpretation of single sites add to a larger analysis of a region or culture This approach provides physical and theoretical links between terrestrial and underwater archaeology as well as prehistoric and historic archaeology consequently providing a framework for integrating such diverse topics as trade resource procurement habitation industrial production and warfare into a holistic study of the past Landscape studies foster broader perspectives and approaches extending the study of maritime cultures beyond the shoreline Despite this potential the archaeological study of maritime landscapes is a relatively untried approach with many questions regarding the methods and perspectives needed to effectively analyze these landscapes The chapters in this volume which include contributions from the United States the United Kingdom Norway and Australia address many of the theoretical and methodological questions surrounding maritime cultural landscapes The authors comprise established scholars as well as archaeologists at the beginning of their careers providing a healthy balance of experience and innovation The chapters also demonstrate parity between method and theory where the varying interpretations of culture and space are given equal weight with the challenges of investigating both wet and dry sites across large areas

Medieval and Early Modern Representations of Authority in Scotland and the British Isles Kate Buchanan, Lucinda H.S. Dean, 2016-05-20 What use is it to be given authority over men and lands if others do not know about it Furthermore what use is that authority if those who know about it do not respect it or recognise its jurisdiction And what strategies and language written and spoken visual and auditory material cultural and political did those in authority throughout the medieval and early modern era use to project and make known their power These questions have been crucial since regulations for governance entered society and are found at the core of this volume In order to address these issues from an historical perspective this collection of essays considers representations of authority made by a cross section of society within the British Isles Arranged in thematic sections the 14 essays in the collection bridge the divide between medieval and early modern to build up understanding of the developments and continuities that can be followed across the centuries in question Whether crown or noble government or church burgh or merchant all desired power and influence but their means of representing authority were very different These essays encompass a myriad of methods demonstrating power and disseminating the image of authority including material culture art literature architecture and landscapes saintly cults speeches and propaganda martial posturing and strategic alliances music liturgy and ceremonial display Thus this interdisciplinary collection illuminates the variable forms in which authority was presented by key individuals and institutions in Scotland and the British Isles By placing these within the context of the European powers with whom they interacted this volume also underlines the unique relationships developed between the people and those who exercised authority over them

The Oxford Handbook of the Archaeology of Death and Burial Sarah Tarlow, Liv Nilsson Stutz, 2013-06-06 This Handbook reviews the state of mortuary archaeology and its practice with forty four chapters focusing on the history of the discipline and its current scientific techniques and methods Written by

leading scholars in the field it derives its examples and case studies from a wide range of time periods and geographical areas *International Institutions in World History* Laust Schouenborg,2016-12-08 The discipline of IR has always suffered from a parochial occupation with the state and the Western system of states This book presents a case for a basic reorientation of IR away from the state and towards the study of social institutions in the sense of patterned practices ideas and norms rules The argument is that the state is an inherently modern phenomenon a modern social institution and that foundational concepts in IR should be based on a full appreciation of the wider record of human existence on earth trans historically and cross culturally This book will interest scholars and students within IR particularly IR theory anthropology archaeology and sociology *Chiefdoms, Collapse, and Coalescence in the Early American South* Robin Beck,2013-06-24 This book provides a new conceptual framework for understanding how the Indian nations of the early American South emerged from the ruins of a precolonial Mississippian world A broad regional synthesis that ranges over much of the Eastern Woodlands its focus is on the Indians of the Carolina Piedmont the Catawbas and their neighbors from 1400 to 1725 Using an eventful approach to social change Robin Beck argues that the collapse of the Mississippian world was fundamentally a transformation of political economy from one built on maize to one of guns slaves and hides The story takes us from first encounters through the rise of the Indian slave trade and the scourge of disease to the wars that shook the American South in the early 1700s Yet the book s focus remains on the Catawbas drawing on their experiences in a violent unstable landscape to develop a comparative perspective on structural continuity and change
