Presidents and the Politics of Agency Design David E. Lewis, 2004-09-02 The administrative state is the nexus of American policy making in the postwar period The vague and sometimes conflicting policy mandates of Congress the president and courts are translated into real public policy in the bureaucracy As the role of the national government has expanded the national legislature and executive have increasingly delegated authority to administrative agencies to make fundamental policy decisions How this administrative state is designed its coherence its responsiveness and its efficacy determine in Robert Dahl s phrase who gets what when and how This study of agency design thus has implications for the

study of politics in many areas The structure of bureaucracies can determine the degree to which political actors can change the direction of agency policy Politicians frequently attempt to lock their policy preferences into place through insulating structures that are mandated by statute or executive decree This insulation of public bureaucracies such as the National Transportation Safety Board the Federal Election Commission and the National Nuclear Security Administration is essential to understanding both administrative policy outputs and executive legislative politics in the United States This book explains why when and how political actors create administrative agencies in such a way as to insulate them from political control particularly presidential control *The Politics of Delegation*, 2002

Controlling the EU Executive? Gijs Jan Brandsma, Jens Blom-Hansen, 2017-09-07 Every year the EU Commission issues thousands of rules based on powers delegated by the Council of Ministers and the European Parliament But delegation is carefully controlled Traditionally control has been exerted through a system of committees of member state representatives comitology However this system was contested by the European Parliament which was left without any influence The Lisbon Treaty introduced a new control regime for delegated powers the so called delegated acts system which was meant to supplement the existing system The new system involves direct control by the Council of Ministers and the European Parliament and thus for the first time gave the European Parliament real influence over delegated powers However the choice over which delegation regime to use in practice has turned into one of the most vehement institutional conflicts in the EU political system This book represents the first comprehensive investigation of this conflict It does so by a combination of methods and data including process tracing of the introduction of the new system in the Lisbon Treaty case studies of selected post Lisbon delegation situations and statistical analysis of datasets comprising hundreds of post Lisbon legislative files

Strategically Created Treaty Conflicts and the Politics of International Law Surabhi Ranganathan, 2014-12-18 Treaty conflicts are not merely the contingent or inadvertent by products of the increasing juridification of international relations In several instances states have deliberately created treaty conflicts in order to catalyse changes in multilateral regimes Surabhi Ranganathan uses such conflicts as context to explore the role of international law in legal thought and practice Her examinations of the International Law Commission's work on treaties and of various scholars proposals on institutional action offer a fresh view of mainstream legal thought They locate in a variety of writings a common faith in international legal discourse built on liberal and constructivist assumptions Ranganathan's three rich studies of treaty conflict relating to the areas of seabed mining the International Criminal Court and nuclear governance furnish a textured account of the specific forms and practices that constitute such a legal discourse and permit a grounded understanding of the interactions that shape international law

Schlesinger, 2003-07-09 In the third volume of his series on Franklin Roosevelt the Pulitzer Prize winning historian focuses on the turbulent final years of FDR's first term A measure of economic recovery revived political conflict and emboldened Roosevelt's critics to denounce that man in the White house To

The Politics of Plunder Joseph B. Scholten, 2000-05-08 Between 279 and 229 B C the Aitolian koinon a federation of mountain cantons in west central Greece expanded to incorporate many of the neighboring lands and peoples lying between the Adriatic and Aegean Seas This new political configuration contributed to the development of modern systems of federal democracy based on proportional representation Despite these institutional advances the Aitolians and their polity are reviled in the ancient historical tradition which views them as backward semi barbarous brigands The Politics of Plunder is the first English language book in over a century to examine the political history of the Aitolian koinon in its era of expansion Joseph Scholten presents a chronological reconstruction of the koinon's course of expansion synthesizing a number of recent studies covering Aitolian topography epigraphy and institutional development that help to compensate for deficiencies in the ancient narrative record His study is the first to ask how a people and a polity so detested by their contemporaries succeeded in making such fundamental contributions to their regional political culture Scholten's careful investigation charts a middle course that neither whitewashes the Aitolians nor

credulously accepts the biased ancient tradition This balanced approach provides a much needed fresh perspective on the Aitolians and their koinon Discussing the history of the ancient Aegean Greek world and the political economic and social history of the Hellenistic Era this book will interest anyone concerned with those subjects or fascinated by the development of ancient Greek political institutions and theories particularly federalism

The Politics of Global Climate Change

Patrick M. Regan, 2015-11-17 In 2009 the US House of Representatives passed legislation requiring reductions in greenhouse gas emissions by 18 percent over the coming decade Later that year President Obama went to Copenhagen to sign a treaty requiring reductions by 50 percent over a two decade period The President came back with nothing no firm commitment to reduce emissions and only a vague target to hold global temperature rises to under 2 C How does a President who has a 75 vote majority in the House and a 19 vote majority in the Senate who has pre approval for a treaty reducing greenhouse gas production by 18 percent not achieve a treaty with at least the minimum goal of 18 percent reductions by 2020 Others have answered the puzzle by looking at institutional designs or negotiation dynamics This book articulates a multilevel process that starts with local politics to explain how they can influence international negotiations and why President Obama's efforts in Copenhagen were doomed to fail Understanding the role of local private interests can help form strategies for overcoming national resistance to climate change legislation and ultimately international agreements that could change the environmentally self destructive course we are on

The Politics of International Interaction with de facto States Eiki

Berg, James Ker-Lindsay, 2020-05-21 This comprehensive volume is the first systematic effort to explore the ways in which recognised states and international organisations interact with secessionist de facto states while maintaining the position that they are not regarded as independent sovereign actors in the international system It is generally accepted by policy makers and scholars that some interaction with de facto states is vital if only to promote a resolution of the underlying conflict that led to their decision to break away and yet this policy of engagement without recognition is not without complications and controversy This book analyses the range of issues and problems that such interaction inevitably raises The authors highlight fundamental questions of sovereignty conflict management and resolution settlement processes foreign policy and statehood This book will be of interest to policy makers students and researchers of international relations It was originally published as a special issue of the journal *Ethnopolitics*

The Politics of Adoption

Bruno Perreau, 2014-05-02 An argument that French adoption policies reflect and enforce the state's notions of gender parenthood and citizenship In May 2013 after months of controversy France legalized same sex marriage and adoption by homosexual couples Obstacles to adoption and parenting equality remain however many of them in the form of cultural and political norms reflected and expressed in French adoption policies In *The Politics of Adoption* Bruno Perreau describes the evolution of these policies In the past thirty years Perreau explains political and intellectual life in France have been dominated by debates over how to preserve Frenchness and these debates have driven policy making Adoption policies he argues link adoption to citizenship

reflecting and enforcing the postcolonial state's notions of parenthood, gender, and Frenchness. After reviewing the complex history of adoption, Perreau examines French political debates over adoption, noting among other things that intercountry adoptions stirred far less controversy than the difference between the sexes in an adopting couple. He also discusses judicial action on adoption, child welfare agencies as gatekeepers to parenthood as defined by experts, the approval process from the viewpoints of social workers and applicants, and adoption's link to citizenship and its use as a metaphor for belonging. Adopting a Foucaultian perspective, Perreau calls the biopolitics of adoption pastoral; it manages the individual for the good of the collective flock, it considers itself outside politics, and it considers not so much the real behavior of individuals as an allegorical representation of them. His argument sheds new light on American debates on bioethics, identity, and citizenship.

International Criminal Justice and the Politics of Compliance Christopher K. Lamont, 2010. This is a comprehensive study of compliance with legal obligations derived from the International Criminal Tribunal for the former Yugoslavia's ICTY Statute. Through the use of three models of compliance based on coercion, self-interest, and norms, Christopher Lamont explores both the domestic politics of war crimes indictments and efforts by external actors such as the European Union, the United States, and the Tribunal itself to induce compliance outcomes.
