The Postgraduate Guidebook Essential Skills For A Career In The Social Sciences:

Research Ethics for Social Scientists Mark Israel, Iain Hay, 2006-06-15 This is an excellent book which can be recommended both to the professional ethicist seeking to situate research ethics for a social scientific audience and to social scientists seeking an overview of the current ethical landscape of their discipline. Research Ethics Review Ethics is becoming an increasingly prominent issue for all researchers across the western world. This comprehensive and accessible guide introduces students to the field and encourages knowledge of research ethics in practice. Research Ethics for Social Scientists sets out to do four things. The first is to demonstrate the practical value of thinking seriously and systematically about what constitutes ethical conduct in social science research. Secondly, the text identifies how and why current regulatory regimes have emerged. Thirdly, it seeks to reveal those practices that have contributed to the adversarial relationships between researchers and regulators. Finally, the book hopes to encourage both parties to develop shared solutions to ethical and regulatory problems. Research Ethics for Social Scientists is an excellent introductory text for students as it introduces students to ethical theory and philosophy, provides practical guidance on what ethical theory means for research practice, provides case studies to give real examples of ethics in research action. The result is an informative, accessible, and practical guide to research ethics for any student or researcher in the social sciences. [The Handbook of Academic Writing: a Fresh Approach](#)

Rowena Murray, Sarah Moore, 2006-10-16 The Handbook of Academic Writing offers practical advice to busy academics who want and are often required to integrate writing into their working lives. It defines what academic writing is and the process of getting started through to completion, covering topics such as Gaining momentum, Reviewing and revising, Self-discipline, Writing regularly, Writers groups and retreats. Academic writing is one of the most demanding tasks that all academics and researchers face. In some disciplines, there is guidance on what is needed to be productive; successful writers, but in other disciplines, there is no training, support, or mentoring of any kind. This book helps those in both groups not only to improve their writing skills and strategies but equally importantly to find satisfaction in engaging in regular and productive writing. Underpinned by a diverse range of literature, this book addresses the different dimensions of writing. The fresh approach that Murray and Moore explore in this book includes developing rhetorical knowledge, focusing on writing behaviours, and understanding writing contexts. This book will help writers in academic contexts to develop a productive writing strategy not only for research monitoring exercises but also for the long term. *From Postgraduate to Social Scientist* Nigel Gilbert, 2006-02-09 From Postgraduate to Social Scientist is essential reading for any postgraduate or new researcher who is interested in a career in the social sciences. The book describes the skills needed for success in moving from being a student to becoming an academic or professional social scientist.
