The Powers Of Populations:

Understanding Offending Populations and the Power of Correctional Psychotherapy Karla Sapp, 2023-10-16 This book investigates the general correctional offender population and the psychotherapy services they receive. The offender population has long been considered the most difficult to engage in psychotherapy, often described as resistant, non-compliant, unworkable, and without feeling. This unique and culturally diverse population tends to find themselves as a result of going through a cycle of arrest, conviction, incarceration, and release. Although other offender populations such as female offenders, severely mentally ill, and sex offenders have received considerable attention in scholarship, there has been little research focused on the treatment of the general offender population and how to reduce recidivism through the appropriate delivery of effective assessment and treatment services. This book will bridge that gap in literature addressing who the offender population is, social and systematic factors they face, psychological understandings of criminal behavior, rehabilitation and psychotherapy theories and approaches to treatment, as well as best practices. Future efforts in justice initiatives, advocacy, and public policy. This book is best suited for upper-level undergraduates, graduate students, and researchers and practitioners in criminal justice fields and mental health professions working with offender populations.

Municipal Power and Population Decline in Japan Fumie Kumagai, 2020-08-20 This book provides an insightful sociological study of the declining Japanese population using statistical analysis to establish the significance of municipal power using demographic data on national, regional, prefectural, and municipal levels. Penned by one of Japan's eminent sociologists, it provides a quantitative characterization of population decline in Japan with a focus on regional variation and identifies the principal explanatory factors through GPI statistical software tools such as G-census and EvaCva within a historical perspective. Furthermore, it offers a qualitative assessment of what constitutes municipal power as this relates to regional local revitalization as a means of addressing municipal population decline. Using Goki Shichido as a theoretical framework, this book pays special attention to municipal variations within the same prefecture, presenting a completely unique approach. In combining these two dimensions of analyses, the book successfully reveals the impact of municipal power and socio-cultural identity of social capital in the region from both quantitative and qualitative perspectives at the municipal level. Demography issues in Japan have been receiving increasing attention among researchers given the growing number of declining populations in developed countries in tandem with rapid aging and low fertility trends. Providing an original and unique contribution to regional population analysis in the fields of regional demography, historical demography, and regional population policy, this book shows that the revitalization of the community is vital if Japan is to increase its population so as to renew a community *raison d'être*. The book is of interest to scholars of Asian studies more broadly and to sociologists, demographers, and policymakers interested in population studies.

specifically Providing an informative and vivid overview of the demographic situation of Japan the author offers excellent suggestions for effective regional policy in confronting a shrinking society This book presents a unique analysis of the regional variations on small municipal levels with demographic variables social indicators and historical identities An original contribution to regional population analysis in the fields of regional population policy regional demography and historical demography Toshihiko Hara Professor Emeritus Sapporo City University **Population Decline and the Remaking of Great Power Politics** Susan Yoshihara, Douglas A. Power to the Population Tadeusz Kugler, 2023-05 Demographic changes directly affect political and socioeconomic dynamics Whether they are the nationalities of migrating refugees the percentage of women in the workforce or aging as a phenomenon population decline age of marriage number of children or the resources of youth demographics can change the political dynamics of a country creating in some cases increased freedoms but also potentially causing conflict or civil war Power to the Population is a comprehensive guide to predicting and evaluating different possible futures for humanity These differing scenarios are of particular importance to decision makers and Tadeusz Kugler focuses on the optimism of what can be created by and for the population The book investigates the dynamic relationship between political choices and changing populations Kugler explores how government policies seemingly focused on localized power and economic development profoundly shape the demographic makeup on local and global scales The demographic future of a population not only regarding numbers but also in its diversity and how historically marginalized communities are undermined is not merely about one place time or people Demography has the potential to change the economic and political future of the world

Power and Influence Richard Corry, 2019-07-31 The world is a complex place and this complexity is an obstacle to our attempts to explain predict and control it In Power and Influence Richard Corry investigates the assumptions that are built into the reductive method of explanation the method whereby we study the components of a complex system in relative isolation and use the information so gained to explain or predict the behaviour of the complex whole He investigates the metaphysical presuppositions built into the reductive method seeking to ascertain what the world must be like in order that the method could work Corry argues that the method assumes the existence of causal powers that manifest causal influence a relatively unrecognised ontological category of which forces are a paradigm example The success of the reductive method therefore is an argument for the existence of such causal influences The book goes on to show that adding causal influence to our ontology gives us the resources to solve some traditional problems in the metaphysics of causal powers laws of nature causation emergence and possibly even normative ethics What results then is not just an understanding of the reductive method but an integrated metaphysical worldview that is grounded in an ontology of power and influence The Biological and Social Analyses of a Mississippian Cemetery from Southeast Missouri Thomas K. Oates,1970 *Islam and the Securitisation of Population Policies* Dr Katrina Riddell,2013-03-28 There has been much scholarly debate on the politically disruptive capabilities of Islam and the threats to global security posed by or to Muslim states and societies but within this dialogue there has been little recognition of the role of population policies in security issues Katrina Riddell s study focuses specifically on Islam and the securitization of population policies and sustainability Opening with a discussion of contemporary population discourses and their historical foundations the book examines how population growth has become an international security issue The author takes the examples of Pakistan and Iran to provide a nuanced understanding of Muslim states interaction with global debates on sustainability She also explores how Muslim and non Muslim states societies and agents perceive issues of population growth and control Providing an innovative approach to the pursuit of global sustainability and security this book presents useful material to scholars whose research focuses on Islam and the future
