The Practical Answer

John Bennett, Andrew Baird

The Practical Answer:

Trials of Reason David Wolfsdorf, 2008-01-22 Scholarship on Plato's dialogues persistently divides its focus between the dramatic or literary and the philosophical or argumentative dimensions of the texts. But this hermeneutic division of labor is naïve for Plato's arguments are embedded in dramatic dialogues and developed through complex largely informal exchanges between literary characters. Consequently it is questionable how readers can even attribute arguments and theses to the author himself. The answer to this question lies in transcending the scholarly divide and integrating the literary and philosophical dimensions of the texts. This is the task of *Trials of Reason*. The study focuses on a set of fourteen so-called early dialogues beginning with a methodological framework that explains how to integrate the argumentation and the drama in these texts. Unlike most canonical philosophical works the early dialogues do not merely express the results of the practice of philosophy. Rather they dramatize philosophy as a kind of motivation, the desire for knowledge of goodness. They dramatize philosophy as a discursive practice motivated by this desire and ideally governed by reason. And they dramatize the trials to which desire and reason are subject that is the difficulties of realizing philosophy as a form of motivation, a practice and an epistemic achievement. In short *Trials of Reason* argues that Plato's early dialogues are as much works of meta-philosophy as philosophy itself.

Systemic Decision Making Patrick T. Hester, Kevin MacG. Adams, 2017-04-22 This expanded second edition of the 2014 textbook features dedicated sections on action and observation so that the reader can combine the use of the developed theoretical basis with practical guidelines for deployment. It also includes a focus on selection and use of a dedicated modeling paradigm, fuzzy cognitive mapping, to facilitate use of the proposed multi-methodology. The end goal of the text is a holistic interdisciplinary approach to structuring and assessing complex problems, including a dedicated discussion of thinking, acting, and observing complex problems. The multi-methodology developed is scientifically grounded in systems theory and its accompanying principles, while the process emphasizes the nonlinear nature of all complex problems.
