Navigating Sovereignty C. Shih, 2016-02-16 In this book the author undertakes a postcolonial analysis of identities the Chinese state uses to confront world politics and globalization Because these identities are created at the confluence of Western modernity and Confucian tradition two elements that are continually reinterpreted themselves the result is an ambiguity regarding the identities best suited to explain Chinese behavior The author argues that this uncertainty is not a new condition but one that reaches back to end of the nineteenth century It is by understanding this ambiguity surrounding identities that will in turn help present day authorities predict the future course of Chinese behavior in world politics

The Mass Psychology of Ethnonationalism Dusan Kecmanovic, 2013-11-11 Throughout the nineteenth and twentieth centuries ethnonationalism has left its indelible mark on Europe and every other continent The latest events in the Balkans in central and eastern Europe and in the former Soviet Union unequivocally testify to the power and influence of ethnonationalism at the end of the second millennium What forces make people so committed to their ethnonational groups that they are ready to ignore all other concerns first and foremost

the rights and interests of people of other ethnicities What is the social psychological and anthropological underpinning of ethnonationalism And finally why and how do people adhere to nationalist attitudes and beliefs These questions are virtually impossible to avoid for anyone who has directly felt the impact of ethnonationalism but they also present themselves to anyone who has indirectly experienced the prejudices unleashed by ethnonationalist forces This book attempts to answer all these questions by focusing on national feeling and the social psychological and anthropological foundations that underly the sense of belonging that is essential to nationalism No matter how qualitatively different nationalist attitudes and beliefs are from national sentiment the latter has to be considered in any study of nationalism

A World Without Meaning Zaki Laidi, 2005-08-10 This sophisticated book by internationally renowned theorist Zaki Laidi tackles the problem of individual identity in a rapidly changing global political environment He argues that it is increasingly hard to find meaning in our ever expanding world especially after the collapse of political ideologies such as communism With the breakup of countries such as the former Yugoslavia it is clear that people are now looking to old models like nationalism and ethnicity to help them forge an identity But how effective are these old certainties in a globalized world in a permanent state of flux

A World Without Meaning Zaki Laïdi, 1998 In this provocative and incisive book Zaki Laidi

argues that as our world becomes ever larger our ability to find meaning in it diminishes With the end of communism came the end of the intimate alliance between power and ideology No power in our globalised world can any longer claim to provide meaning In despair we look back to old models religious traditions nationalism ethnicity to give us a sense of identity But in a globalised world in a permanent state of flux just how effective are these old certainties *Sociology of Globalization* Keri E. Legrás, 2017-01-10 In the twenty years of postrevolutionary rule in Mexico the war remained fresh in the minds of those who participated in it while the enigmas of the revolution remained obscured Demonstrating how textuality helped to define the revolution Culture and Revolution examines dozens of seemingly ahistorical artifacts to reveal the radical social shifts that emerged in the war's aftermath Presented thematically this expansive work explores radical changes that resulted from postrevolution culture including new internal migrations a collective imagining of the future popular biographical narratives such as that of the life of Frida Kahlo and attempts to create a national history that united indigenous and creole elite society through literature and architecture While cultural production in early twentieth century Mexico has been well researched a survey of the common roles and shared tasks within the various forms of expression has until now been unavailable Examining a vast array of productions including popular festivities urban events life stories photographs murals literature and scientific discourse including fields as diverse as anthropology and philology Horacio Legrás shows how these expressions absorbed the idiosyncratic traits of the revolutionary movement Tracing the formation of modern Mexico during the 1920s and 1930s Legrás also demonstrates that the proliferation of artifacts extending from poetry and film production to labor organization and political apparatuses gave unprecedented visibility to previously marginalized populations who ensured that no revolutionary faction would unilaterally shape Mexico's historical process during these formative years
