## **The Middle East Military Balance 2000 2001:**

**The Middle East Military Balance, 2000-2001** ,2001 Shlomo Brom,Yiftah Shapir,2002 Up to date authoritative information on military capabilities in the Middle East The explosion of violence between Israelis and Palestinians that began in late 2000 is a tragic reminder of the potential for armed conflict in the Middle East Although many developments in the 1990s appeared to have reduced the likelihood of war in the region stability between Israel and its Arab neighbors remains tenuous Security in the Persian Gulf also remains uncertain as Iran and Iraq have continued their pursuit of weapons of mass destruction Understanding the dynamics of security in the Middle East requires detailed information on the military capabilities of the region s countries The Middle East Military Balance is prepared annually by the Jaffee Center for Strategic Studies in Tel Aviv It is based on data from many sources including some that are unavailable to other institutes With its wealth of current hard to find information it offers an authoritative and indispensable guide to military capabilities in the Middle East Governments the media and researchers pay close attention to its data and analysis each year *The Military Balance in the Middle East* Anthony H. Cordesman,2004-09-30 Noted Middle East military expert Anthony H Cordesman details the complex trends that come into play in determining the military balance in a region that has become so critical to world peace This ready resource provides a wealth of information on military expenditures and major arms systems as well as qualitative trends by country and by zone However as Cordesman stresses because the greater Middle East is more a matter of rhetoric than military reality mere data summarizing trends in 23 different countries is no substitute for a substantive explanation Using tables graphs and charts this study explores every aspect of the regional military balance with attention to sub regional balances internal civil conflicts and low level border tensions The Middle East is certainly one of the most militarized areas in the world and changes in technology access to weapons of mass destruction and political instability contribute to a situation that has long been in constant flux Some of the regional flashpoints covered in this study include the Maghreb North Africa the Arab Israeli conflict dominated by Israel versus Syria and the Gulf divided into those states that view Iran as the primary threat and those who lived in fear of Iraq Internal conflicts such as those in Mauritania Algeria Libya Egypt Sudan Bahrain Saudi Arabia Iraq and Yemen increasingly dominate regional tensions In addition border conflicts within the region and with neighboring countries could further aggravate the delicate balance *Arms and Conflict in the Middle East* Riad A. Attar,2009-12-21 A study that contributes to the debate on whether defense spending encourages or hinders economic growth It assesses the effect of politics on economic growth in developing societies with a focus on the Middle East It urges Third World leaders to improve levels of freedom democracy and openness of their political systems *Armed Forces in the Middle East* Thomas Keaney,Barry Rubin,2013-11-05 An examination of the Middle East s leading armed forces and their role in both military and political affairs The book considers their missions doctrine training equipment and effectiveness as fighting forces **The Future of**

**Fighting Words** Michael Edward Brown, Sumit Ganguly, 2003 A study of the impact of language policies on ethnic relations in fifteen Asian and Pacific countries      Progress in International Relations Theory Colin Elman, Miriam Fendius Elman, 2003-08-29 All academic disciplines periodically appraise their effectiveness evaluating the progress of previous scholarship and judging which approaches are useful and which are not Although no field could survive if it did nothing but appraise its progress occasional appraisals are important and if done well can help advance the field This book investigates how international relations theorists can better equip themselves to determine the state of scholarly work in their field It takes as its starting point Imre Lakatos's influential theory of scientific change and in particular his methodology of scientific research programs MSRP It uses MSRP to organize its analysis of major research programs over the last several decades and uses MSRP's criteria for theoretical progress to evaluate these programs The contributors appraise the progress of institutional theory varieties of realist and liberal theory operational code analysis and other research programs in international relations Their analyses reveal the strengths and limits of Lakatosian criteria and the need for metatheoretical metrics for evaluating scientific progress      **Countering Terrorism** Arnold M. Terrorism, Freedom, and Security Philip B. Heymann, 2003 A former Deputy Attorney General of the United States argues that we must preserve our civil liberties and democratic values while fighting terrorism On September 11 2001 the United States began to consider the terrorist threat in a new light Terrorism was no longer something that happened in other

countries on other continents but became a pressing domestic concern for the US government and American citizens. The nation suddenly faced a protracted struggle. In *Terrorism, Freedom and Security*, Philip Heymann continues the discussion of responses to terrorism that he began in his widely read *Terrorism and America*. He argues that diplomacy, intelligence and international law should play a larger role than military action in our counterterrorism policy instead of waging war against terrorism. The United States needs a broader range of policies. Heymann believes that many of the policies adopted since September 11, including trials before military tribunals, secret detentions and the subcontracting of interrogation to countries where torture is routine, are at odds with American political and legal traditions and create disturbing precedents. Americans should not be expected to accept apparently indefinite infringements on civil liberties and the abandonment of such constitutional principles as separation of powers and the rule of law. Heymann believes that the United States can guard against the continuing threat of terrorism while keeping its traditional democratic values in place. **The Weapons of**

**Mass Destruction: Program of Iraq** United States. Congress. Senate. Committee on Armed Services. Subcommittee on Emerging Threats and Capabilities, 2002. *Small Arms Survey 2003*, 2003. This title includes information and analysis on global small arms production, stockpiles and legal and illicit transfers and a review of international, regional and national measures to address the issue of small arms proliferation. Israel's National Security Predicament David

Rodman, 2023-09-29. This book provides a ground-breaking assessment of the Israeli national security experience from the establishment of the country through to the present day. Seventy-five years after its establishment, the State of Israel continues to face an acute national security predicament as a result of the still unresolved Arab-Israeli conflict. This monograph offers a new framework for analyzing this experience, first exploring the crucial events of the past and present that define it, including interstate wars, asymmetrical wars, low-intensity conflicts and developments in weapons of mass destruction. The book then probes how Israel's evolving national security doctrine has addressed these various challenges over the years, highlighting the roles of a number of variables: deterrence, warning and decision, strategic depth and defensible borders, the quality and quantity of fighting men and machines, intelligence, self-reliance in military matters, foreign policy and the influence of ethnic demography, societal resilience, economic prosperity and water security. Written in accessible, non-technical language, the book will appeal to general readers seeking an introduction to Israeli security as well as to specialists and researchers in various fields, including Israeli history, Middle Eastern politics and security studies. *Laws, Outlaws, and Terrorists* Gabriella Blum, Philip B. Heymann, 2010-09-24 Guidance for maintaining national security without abandoning the rule of law and our democratic values In an age of global terrorism can the pursuit of security be reconciled with liberal democratic values and legal principles During its global war on terrorism the Bush administration argued that the United States was in a new kind of conflict one in which peacetime domestic law was irrelevant and international law inapplicable From 2001 to 2009 the United States thus waged war on terrorism in a no law zone In *Laws Outlaws and Terrorists* Gabriella Blum and Philip Heymann reject the argument that traditional American values embodied in domestic and international law can be ignored in any sustainable effort to keep the United States safe from terrorism They demonstrate that the costs are great and the benefits slight from separating security and the rule of law They call for reasoned judgment instead of a wholesale abandonment of American values They also argue that being open to negotiations and seeking to win the moral support of the communities from which the terrorists emerge are noncoercive strategies that must be included in any future efforts to reduce terrorism

*Energy Developments in the Middle East* Anthony H. Cordesman, 2004-09-30 The Middle Eastern and North African region MENA dominates world energy exports today and will likely do so for decades to come even if world consumers make steady progress in conservation renewable energy sources and increases from gas coal and nuclear power The MENA region however has been the scene of both internal crises and external conflicts On several occasions these crises have affected either the flow of MENA energy exports or the development of energy production and export capacity The politics economics and social dynamics that shape threats to regional stability are complex Cordesman details the factors behind these diverse forces and outlines current supply levels and future trends taking each of these variables into consideration The MENA area includes at least 22 states with a combined population of nearly 300 million each with different political economic demographic and security conditions

and needs It is divided into at least four sub regions including the Maghreb Mauritania Morocco Algeria Libya and Tunisia the Levant and the Arab Israeli confrontation states Egypt Israel Jordan Lebanon and Syria the Gulf Iran Iraq Kuwait Bahrain Qatar Saudi Arabia the UAE and Oman and the Red Sea states Yemen the Sudan and Somalia This important guide outlines the forces affecting each sub region including supply demand and financing and forecasts the likely impact that different scenarios would have on energy resources under varying world conditions
