The Mighty Mekong:

Last Days of the Mighty Mekong Brian Eyler, 2019-02-15 Celebrated for its natural beauty and its abundance of wildlife the Mekong river runs thousands of miles through China Myanmar Laos Thailand Cambodia and Vietnam Its basin is home to more than 70 million people and has for centuries been one of the world's richest agricultural areas and a biodynamic wonder Today however it is undergoing profound changes Development policies led by a rising China in particular aim to interconnect the region and urbanize the inhabitants And a series of dams will harness the river's energy while also stymieing its natural cycles and cutting off food supplies for swathes of the population In Last Days of the Mighty Mekong Brian Eyler travels from the river's headwaters in China to its delta in southern Vietnam to explore its modern evolution Along the way he meets the region's diverse peoples from villagers to community leaders politicians to policy makers Through conversations with them he reveals the urgent struggle to save the Mekong and its unique ecosystem **The Mighty Mekong** Howard Liss, 1967 Traces the 2 600 mile course of the Mekong River 11th longest river in the world which affects the lives and destinies of more than 50 million people in 7 countries The Mighty Mekong Mystery Joakim Öjendal, 1997 The Mighty MeKong Ronald R. Developing the Mekong Evelyn Goh, 2013-01-11 In Southeast Asia China's growing economic and political strength has been accompanied by adept diplomacy and active promotion of regional cooperation institutions and integration Southeast Asian states and China engage in strategic regionalism they seek regional membership for regime legitimation and collective bargaining and regional integration to enhance economic development regarded as essential for ensuring national and regime security Sino Southeast Asian regionalism is exemplified by the development plans for the Mekong River basin where ambitious projects for building regional infrastructural linkages and trade contribute to mediating the security concerns of the Mekong countries However Mekong regionalism also generates new insecurities Developing the resources of the Mekong has led to serious challenges in terms of governance distribution and economic externalities Resource allocation and exploitation conflicts occur most obviously within the realm of water projects especially hydropower development programmes While such disputes are not likely to erupt into armed conflict because of the power asymmetry between China and the lower Mekong states they exacerbate Southeast Asian concerns about China's rise and undermine Chinese rhetoric about peaceful development But the negative security consequences of developing the Mekong are also due to the shared economic imperative and the Southeast Asian states own difficulties with collective action due to existing intramural conflicts

The Mighty Mekong Claire Owen,ETA/Cuisenaire (Firm),2005-03-29 These engaging books focus on key concepts within the context of different countries Supportive visuals and activities embedded within each book help students make important connections to how math and science are used throughout the world [Hydropolitics in the Third World](#) Arun P. Elhance,1999 With more than 50 percent of the world s landmass covered by river basins shared by two or more states competition over water resources has always had the potential to spark violence And growing populations and accelerating demands for fresh water are putting ever greater pressures on already scarce water resources In this wide ranging study Arun Elhance explores the hydropolitics of six of the world s largest river basins In each case Elhance examines the basin s physical economic and political geography the possibilities for acute conflict and efforts to develop bilateral and multilateral agreements for sharing water resources The case studies lead to some sobering conclusions about impediments to cooperation but also to some encouraging ones among them that it may not be possible for Third World states to solve their water problems by going to war and that eventually even the strongest riparian states are compelled to seek cooperation with their weaker neighbors

As Borders Bend Xiangming Chen,2005 As do other mighty forces such as wars nationalist aspirations and the shifting courses of great rivers globalization changes the world s borders by bending them out of shape and creating new transnational spaces State political boundaries no longer draw the definitive line in people s lives they once did Borders continue to contain self described national populations and national activities but the penetration of economic globalization via growing cross border trade investment and resurgence of myriad regional ethnic groups is pushing and stretching the limits of borders into both interactive spaces and contested terrains Indeed new power centers with their own identities are springing out of once politically trivial and economically marginal landscapes While the terrorist attacks of 2001 and the SARS outbreak of 2003 prompted states to tighten border controls their efforts amount to only a temporary reversal of a powerful long term trend toward more open borders and the interactive transnational spaces that openness fosters This innovative book examines the complexities of de bordering and re bordering through a structured comparison of seven transborder subregions along the western Pacific Rim and an extended comparative analysis of the U S Mexico border and several European border regions Xiangming Chen offers a synthetic explanation for the complex and diverse processes and outcomes of economic growth social transformation infrastructure development and urban landscapes in the new transnational spaces around the porous and mutated borders on the Pacific Rim and beyond

Under Beijing's Shadow Murray Hiebert,2020-08-15 China s rise and stepped up involvement in Southeast Asia have prompted a blend of anticipation and unease among its smaller neighbors The stunning growth of China has yanked up the region s economies but its militarization of the South China Sea and dam building on the Mekong River has nations wary about Beijing s outsized ambitions Southeast Asians long felt relatively secure relying on the United States as a security hedge but that confidence began to slip after the Trump administration launched a trade war with China and questioned the usefulness of traditional

alliances This compelling book provides a snapshot of ten countries in Southeast Asia by exploring their diverse experiences with China and how this impacts their perceptions of Beijing's actions and its long term political economic military and soft power goals in the region
