Heintzelman, 1975 *Flight Strategies of Migrating Hawks* Paul Kerlinger, 1989 Hawks fly at very high altitudes sometimes over water and thus their flight behavior and migration patterns are extremely difficult to study Now based on nearly ten years of research this book provides the most complete analysis to date of how hawks migrate Paul Kerlinger has employed both direct observations and radar techniques to obtain a much more accurate understanding of the migratory behavior of hawks and the decisions they make in flight And he has integrated data on the flight behavior of raptors in general with information about their ecology physiology evolution and nonmigratory behavior Kerlinger begins with an overview discussing ecology and geography research methods natural history and evolution and atmospheric structure He then addresses specific aspects of flight behavior aerodynamics morphology mechanics direction altitude flocking water crossing speed selection daily distance traveled and flight strategies Kerlinger describes each aspect of behavior quantitatively testing mechanistic hypotheses In conclusion he examines how migrants integrate these behavioral components Throughout the text he draws comparisons between the migratory flight behavior of hawks and that of other taxa By means of such comparisons researchers can gain insight into the selective pressures that shape the behavior of migrant species *The Migrations of Birds* Alexander Wetmore, 1926 **How to Spot Hawks and Eagles** Clay Sutton, Patricia Sutton, 1996 Hawk and eagle watching is an increasingly popular birding activity Special knowledge is required however and in this lavishly photographed full color book naturalists authors Clay and Patricia Sutton provide all the information readers need to know no matter where they live in the United States and Canada Full color photos throughout **Report on the Migration of Birds in the Spring and Autumn of 1884** Brown, 1885 *Migrating Raptors of the World* Keith L.
